NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FactSet Research Systems Inc. November 30, 1997 (Unaudited)

### 1. ORGANIZATION AND NATURE OF BUSINESS

FactSet Research Systems Inc. (the "Company") provides online integrated database services to the financial community. The Company's revenue is derived from subscription charges. Solely at the option of each client, these charges may be paid either in commissions on securities transactions (in which case subscription revenue is recorded as "Commissions") or on a cash basis (in which case subscription revenue is recorded as "Fees").

To facilitate the receipt of subscription revenue on a commission basis, the Company's wholly owned subsidiary, FactSet Data Systems, Inc. ("FDS"), is a member of the National Association of Securities Dealers, Inc. and is a registered broker-dealer under Section 15 of the Securities Exchange Act of 1934. FDS's only function is to facilitate the receipt of payments with respect to subscription charges and it does not otherwise engage in the securities business.

Subscription revenue paid in commissions is based on securities transactions introduced and cleared on a fully disclosed basis through one of two designated clearing brokers. A client paying subscription charges on a commission basis directs the clearing broker, at the time the client executes a securities transaction, to credit the commission on the transaction to FDS's account.

FactSet Pacific, Inc. and FactSet Limited are wholly owned subsidiaries of the Company and are U.S. corporations with branches in Tokyo and London, respectively.

### 2. ACCOUNTING POLICIES

The significant accounting policies of the Company and its subsidiaries are summarized below.

### Financial Statement Presentation

The accompanying consolidated financial statements include the accounts of the Company and its subsidiaries. All significant intercompany activity and balances have been eliminated from the consolidated financial statements.

The financial reporting format of the Consolidated Statements of Income has been revised to enhance comparability with other companies in the online information services industry and to improve understanding of the Company's results of operations. The Consolidated Statements of Income have been reclassified in all prior periods presented to conform to the current year presentation.

Cost of services is composed of compensation and benefits for the employees of the software engineering and consulting departments, clearing fees, data costs, computer maintenance and depreciation expenses, and communication costs. Selling, general, and administrative expenses include compensation and benefits for employees involved with sales, product development and various support functions, promotional expenses, rent, amortization of leasehold improvements, depreciation of furniture and fixtures, and office expenses. The components of other expenses are professional fees and miscellaneous expenses.

### Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates.

## Revenue Recognition

Subscription charges are quoted to clients on an annual basis, but are earned as services are provided on a month-to-month basis. Subscription revenue, whether commissions or fees, is recorded as earned each month, based on one-twelfth of the annual subscription charge quoted to each client. Amounts that have been earned but not yet paid through the receipt of commissions on securities transactions or through cash payments are reflected on the Consolidated Statements of Financial Condition as receivable from clients. Amounts that have been received through commissions on securities transactions or through cash

payments that are in excess of earned subscription revenue are reflected on the Consolidated Statements of Financial Condition as deferred fees and commissions.

### Clearing Fees

When subscription charges are recorded on a commission basis, the Company incurs clearing fees, which are the charges imposed by the clearing brokers used to execute and settle clients' securities transactions.

### Cash and Cash Equivalents

Cash and cash equivalents consist of demand deposits and money market investments with original maturities of three months or less.

#### **Investments**

Investment securities are classified as available-for-sale securities and are reported at market value or fair value as determined by management. Unrealized gains and losses on available-for-sale securities are recognized as a separate component of stockholders' equity, net of tax.

# Property, Equipment, and Leasehold Improvements

Depreciation of computers and related equipment acquired before September 1, 1994 is recognized using the double declining balance method over estimated useful lives of five years. Computers and related equipment acquired after September 1, 1994 are depreciated on a straight-line basis over estimated useful lives of three years. Depreciation of furniture and fixtures is recognized using the double declining balance method over estimated useful lives of five years. Leasehold improvements are amortized on a straight-line basis over the terms of the related leases or estimated useful lives of the improvements, whichever period is shorter.

### Deferred Taxes

Deferred taxes are determined using a balance sheet approach. The income statement effect is derived from changes in deferred taxes on the balance sheet. This approach gives consideration to the future tax consequences associated with differences between financial accounting and tax bases of assets and liabilities. A valuation allowance is established to the extent management considers it more likely than not that some portion or all of the deferred tax assets will be realized. The effect on deferred taxes from income tax law changes are recognized immediately upon enactment. The Company records deferred taxes for such items as accrued compensation, deferred fees and commissions, and property, equipment, and leasehold improvements.

### Stock-Based Compensation

The Company follows the disclosure-only provisions of Statement of Financial Accounting Standards No. 123, Accounting for Stock-Based Compensation.

### Earnings Per Share

The computation of earnings per share in each year is based on the weighted average number of common shares and common share equivalents outstanding. The weighted average number of shares outstanding includes shares issued to the Company's employee stock ownership plan at the date authorized by the Board of Directors. Shares available pursuant to grants made under the Company's stock option plans are included as share equivalents using the treasury stock method.

On June 4, 1996, the Company increased the number of shares of common stock authorized from 5 million to 40 million, authorized 10 million shares of preferred stock issuable in series, and effected a 4-for-1 stock split with respect to the common stock. In connection with the stock splits, the par value of the common stock was reduced from \$1.00 to \$0.01 per share. For purposes of these financial statements, all common stock and per share amounts have been restated to reflect the stock splits.

### New Accounting Pronouncements

In February 1997, SFAS No. 128, Earnings Per Share ("SFAS 128"), was issued. This statement requires dual presentation of basic and diluted earnings per share ("EPS") on the face of the income statement and reconciliation of the numerator and the denominator between the basic and diluted EPS computations. SFAS 128 will be effective for the Company's 1999 fiscal year. Had SFAS 128 been effective for fiscal years 1998 and 1997 basic EPS for the three months ended November 30, 1997 and 1996 would have been \$0.29 and \$0.21, respectively. Diluted EPS is already reported on the face of the income statement.

In June 1997, SFAS No. 130, Reporting Comprehensive Income, and SFAS No. 131, Disclosures About Segments of an Enterprise and Related Information, were

issued. Disclosures required by these statements will be effective for the Company's 1999 fiscal year.

# MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

### OVERVIEW

### The Company

FactSet Research Systems Inc. is the leading provider of online integrated database services to the financial community. The Company's software technology combines multiple large-scale databases into a single mainframe information system accessible from clients' personal computers. Simultaneous access to over 85 databases creates a comprehensive, "one stop" source for financial and economic information, news, and commentary on tens of thousands of companies and securities worldwide. The Company's proprietary software tools enable clients to easily download, screen, manipulate, and analyze data in a virtually infinite array of formats, principally custom reports designed by and for the user. FactSet markets its services to investment managers, investment banks, and other financial services institutions throughout the world.

#### Business Environment

Demand for online information by the financial community is, to some degree, influenced by global financial market conditions.

The US and several European stock markets reached record highs during the past three years, resulting in an expanded audience for FactSet's services. While there is no reason to believe that future demand for online information will decrease, a significant decline in US and European equity markets could adversely impact the Company's results of operations.

Revenue derived from the Company's Asian and Pacific Rim clients is not a significant portion of the Company's total consolidated revenue. Accordingly, the significant volatility in recent months in Asian and Pacific Rim stock markets is not expected to materially impact the Company's future results of operations, cash flows and financial position.

### Future Investments

Substantial investments in people and technology are likely to be necessary to maintain the Company's growing presence in the global marketplace. Significant password growth, additional databases and office expansion have also caused the Company's capital spending requirements to increase. Enhancements to the Company's data centers are ongoing, office openings in New York City and Hong Kong are planned and expansion of the Tokyo office facility is scheduled. Accordingly, capital spending in fiscal 1998 is projected to be significantly higher than the \$6.0 million in fiscal 1997. Based on its strong financial position and historical levels of cash generation, the Company anticipates that foreseeable investments in people and technology will continue to be fully funded from operations.

The Company is actively developing programs to adjust mainframe applications and data provided by third parties to be fully year 2000 compliant. The Company does not expect this transition to have a material impact on future results of operations, cash flows, or financial position.

### RESULTS OF OPERATIONS

Unaudited and in thousands, except per share data

Three Months Ending Novembe	er 30, 1997	1996	% Change
Revenue	\$17,494	\$12,824	36.4
Operating expenses	12,896	9,484	36.0
Income from operations	4,598	3,340	37.7
Income before income taxes	4,965	3,457	43.6
Net income	2,775	1,962	41.4
Earnings per share	\$0.25	\$0.18	38.9

### Revenue

Revenue for the quarter ended November 30, 1997 was \$17.5 million, an increase of 36.4% over the year ago period. New clients, additional users at existing clients and incremental subscriptions to databases and services drove this growth.

At quarter end, client count totaled 512, a net addition of 64 new clients over the past twelve months. The Company's client retention rate continued to be in excess of 95%. The number of passwords in use grew to over 11,000 representing more than a 50% increase from the first quarter of fiscal 1997.

Total client commitments at November 30, 1997 rose to \$72.6 million, up 35% from the comparable period in fiscal 1997. The average commitment per client reached a new record of \$142,000, up 18% from \$120,000 per client a year ago. ("Commitments" represent a freeze frame of the annual revenue that the Company would receive from a particular client based on the services currently being supplied to that client.) At November 30, 1997, no individual client accounted for more than 4% of total commitments. In addition, commitments among the top ten clients represented less than 15% of total commitments. As a matter of policy, the Company does not seek to enter into written contracts with its clients. Accordingly, clients are free to add or delete services at any time. Historically, commitments have grown in virtually every month.

For the first quarter of fiscal 1998, revenue from overseas operations came in at \$2.1 million, a 80% increase over fiscal 1997's comparable amount. As a result, international operations represented 12% of consolidated quarterly revenue compared to 9% a year ago. The impact on the Company's results of operations from foreign currency fluctuations was immaterial. The majority of international clients pay for services in U.S. dollars and the net monetary asset position maintained by the Company's non-U.S. offices was insignificant.

### Operating Expenses

Cost of services includes employee compensation and benefits, clearing fees, data costs, computer maintenance and depreciation expenses, and communication costs. During the first quarter of fiscal 1998, cost of services increased to \$6.9 million, a 34.8% increase over the year earlier period. A larger employee base and additional data expenses were the primary catalysts of this increase. The engineering and consulting staff increased by over 45% the past twelve months causing employee compensation and benefits to rise by \$750,000 on a quarter over quarter basis. New databases caused data cost to rise \$300,000, or 32.6% over the year ago period.

Selling, general, and administrative ("SG&A") expenses include employee compensation and benefits, promotional expenses, rent, amortization of leasehold improvements, depreciation of furniture and fixtures, and office expenses. For 1998's first fiscal quarter, SG&A expenses totaled \$5.3 million up 36.8% versus the comparable period a year earlier. Merit pay raises and new employees produced this increase. The number of employees in the sales, product development, and various support departments increased by 20% compared to the end of 1997's first fiscal quarter. Accordingly, for the three months ended November 30, 1997 employee compensation increased by \$1.0 million versus fiscal 1997's comparable period.

### Operating Margins

Operating margins for the quarter ending November 30, 1997 increased by 30 basis points when compared to the year ago period. Margin improvements were largely the result of a change in the mix between Fee and Commission revenue and declining depreciation expense on computer equipment as a percentage of revenue. These improvements were partially offset by higher compensation levels related to the increased staffing levels.

Fee (cash) revenue produces a higher margin than Commission revenue. While net revenue to the Company is essentially the same under both payment methods, to cover the clearing charges, Commission clients pay a higher amount than clients who pay in cash. During 1998's first fiscal quarter, the percentage of cash revenue increased to 56% of the consolidated total versus 50% during the year ago quarter. Depreciation expense on computer equipment decreased as a percentage of revenue due to an increase in computer equipment that had become fully depreciated at 1997's fiscal year end.

### Liquidity

Cash generated by operating activities totaled \$4.1 million for the three months ended November 30, 1997 versus \$4.2 million a year ago. Cash used in investing activities were \$840,000, up from 1996's comparable total of \$1.5 million. As discussed above under the caption "Future Investments," the Company expects that capital expenditures for fiscal 1998 will be significantly higher than the \$6.0 million incurred during fiscal 1997.

All capital and operating expense requirements have been financed by cash from operations. At November 30, 1997, cash, cash equivalents, and investments totaled \$31.5 million. The Company has no outstanding indebtedness.

### Accounting Pronouncements

In fiscal 1998, SFAS No. 128, Earnings Per Share; SFAS No. 130, Reporting Comprehensive Income; and SFAS No. 131, Disclosures About Segments of an Enterprise and Related Information, were issued. Refer to Note 2, "Accounting Policies" for further information.

### Forward-Looking Statements

This Management's Discussion and Analysis of the Company's results of operations and financial condition contains forward-looking statements that are based on management's current expectations and beliefs. The phrases "no reason to believe," "could adversely impact," "are not expected," "are likely necessary," "are ongoing," "are planned," "is scheduled," "is projected," "it is anticipated," "will continue," "does not expect," and "commitments" are intended to identify such forward-looking statements. These statements are not guarantees of future performance and involve certain risks, uncertainties, and assumptions which are difficult to predict ("future factors"). Therefore, actual results may differ materially from what is expressed or forecasted in such forward-looking statements. The Company undertakes no obligation to publicly update any forward-looking statements as a result of new information, future events, or otherwise. Future factors include the Company's ability to locate and hire qualified personnel and to maintain its leading technological position; the successful negotiation of contract terms to add and maintain databases; the ongoing employment of key personnel; the absence of U.S. or foreign governmental policy restricting international business; and the sustainability of historical levels of profitability and growth rates in cash flow generation.

### Part II OTHER INFORMATION

Item 1. Legal Proceedings: None

Item 2. Changes in Securities: None

Item 3. Submission of Matters to a Vote of Security Holders: None

Item 4. Other Information: None

Item 5. Reports on Form 8-K: None

### Item 6. Exhibits

## Exhibit Number

3.1	Restated Certificate of Incorporation (1)
3.2	By-laws (1)
