**> CONSTANTLY INNOVATING
TO MEET CLIENT NEEDS**

FOR NEARLY 40 YEARS, FACTSET HAS BEEN A TRUSTED PARTNER TO THE INVESTMENT COMMUNITY. OVER THAT TIME, AS CLIENTS' NEEDS HAVE CHANGED, WE HAVE FOCUSED ON CONSTANTLY INNOVATING AND EVOLVING TO MEET THOSE NEEDS. FISCAL YEAR 2017 WAS A YEAR MARKED BY THAT SPIRIT OF EVOLUTION.

Our clients value our data integration, our world-class analytics, and our industry-leading service.

It is clear in the current market that they need to optimize costs, increase efficiency, improve integration between systems, and better manage information flow and risk. These challenges mean our clients—and the industry—need more integrated, flexible solutions across their workflows. We set out to help them face their challenges head on.

In fiscal year 2017, we saw continued global growth as client count increased 13%. FactSet now serves nearly 5,000 clients and 89,000 users worldwide.

As we worked to deliver integrated solutions across multiple workflows, we maintained our commitment to our shareholders by growing annual subscription value (ASV), earnings per share, and returning value through a balanced capital allocation framework.

Fiscal year 2017 ASV grew 5.7% organically. We increased our sales to existing clients, deepening our relationships and strengthening our growth potential. We saw strong growth from Analytics, Content and Technology Solutions, and our recent acquisitions. Our core workstation product also performed well, and we added almost 5,000 new users in fiscal year 2017, an increase of 6% year-over-year.

2017 AWARDS ACROSS THE PORTFOLIO LIFECYCLE

In fiscal year 2016, FactSet won an unprecedented eight industry awards. In fiscal year 2017, we nearly doubled that total—earning 15 industry awards. Perhaps even more striking than the number of awards we won, is that they spanned the breadth of our business. These awards reinforce the concept that with our acquisitions we are bringing together world-class solutions to solve our clients' challenges across the portfolio lifecycle.

We remain focused on growing EPS and returning value to our shareholders. In 2017 our adjusted diluted EPS was up over 14% and we repurchased more than \$260 million in common stock, increasing our dividend by 12%.

MEETING ROOM 3

RETURN
VALUE

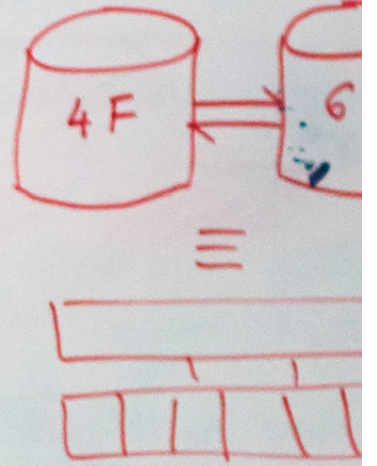

Clients require solutions that span larger workflows and provide consistent data across their organizations and systems.

Our workstation business remains strong and is a foundation for so much of what we offer to clients. However, with the industry looking for more efficiency and performance, clients require solutions that span larger workflows and provide consistent data across their organizations and systems—and we are prepared to fill that need as well.

Fiscal year 2017 was a year dedicated to building out our solutions for the portfolio lifecycle. A critical component of that strategy was the acquisition of four best-in-class companies—BISAM, Interactive Data Managed Solutions (renamed to FactSet Digital Solutions), Vermilion, and CYMBA.

The industry is looking for more efficiency and performance through end-to-end solutions and we are prepared to fill that need.

RESEARCH SOLUTIONS

FactSet workstations are the core of our research solutions for clients. We are now building on that expertise to provide users with end-to-end solutions, supporting their workflows from idea to execution.

For Investment Banking clients, the workflow calls for in-depth sector data, and this year we made progress by adding new and unique content essential to the banking industry.

The Research Analyst workflow requires specialized technology and content, and this year we invested in Partners, our research authoring and distribution product, as well as FactSet Fundamentals, our flagship content set for global company data.

PORTFOLIO MANAGEMENT AND TRADING SOLUTIONS

The Portware Enterprise execution management system (EMS) continued its strong growth. Additionally, our acquisition of CYMBA provides us with an order entry/management and pre-trade compliance system, which, combined with Portware's EMS, provides a more comprehensive solution for the front office. Building on the power of Portware Enterprise, we will scale an EMS solution across a wider group of clients. Portware's artificial intelligence capabilities provide traders with an efficiency highly sought after in an increasingly complex multi-asset class global economy.

ANALYTICS SOLUTIONS

Our suite of analytics products has long been a competitive strength for FactSet. In fiscal year 2017, we continued to diversify, and added two strategic components to bolster our middle office solution. The acquisition of BISAM (and its products B-One and Cognity) expanded our analytics solutions to include performance system capabilities, GIPS composites management, and expanded risk capabilities. Additionally, Vermilion's award-winning workflow solution for client reporting and communication, the Vermilion Reporting Suite, creates a workflow around all elements of the client reporting process and extends our analytics capabilities in reporting.

These products complement FactSet's existing products. We now provide a comprehensive workflow solution for the middle office linking performance, risk, and reporting.

Data continuity between our systems, a high priority for clients, has further strengthened our competitive position.

WEALTH SOLUTIONS

Wealth is another exciting opportunity area. The addition of FactSet Digital Solutions, in combination with FactSet's existing capabilities and extensive financial data coverage, establishes FactSet as a leading end-to-end provider of solutions for Wealth Management.

FactSet Digital Solutions provides an opportunity to capitalize on the shift in the industry toward technology-enabled advice. Investors are demanding additional digital tools that help them make investment decisions and provide flexible ways to interact with their advisors.

CONTENT AND TECHNOLOGY SOLUTIONS

The Content and Technology Solutions (CTS) business has grown by double digits over the last few years. This off-platform business has taken us beyond the workstation model and provides a natural stage to develop an open environment with FactSet technology and content where clients can build their own solutions and leverage third-party applications and data within the hosted FactSet environment.

In June 2017, we introduced an XML Transcript Feed to facilitate natural language processing. The data feed for events and transcripts provides instant access to more than 15 years of FactSet CallStreet's high-quality events and transcripts data. This feed spans eight different event types in a well-defined XML format and enables investment professionals to conduct natural language processing to determine sentiment and potentially identify previously unseen trends or opportunities to generate alpha.

Data continuity between our systems, a high priority for clients, has further strengthened our competitive position.

TECHNOLOGY AND INFRASTRUCTURE

The multi-year effort that has gone into upgrading our NextGen platform has provided us with the platform architecture necessary to offer open, flexible solutions for our clients. We made significant progress in client migration to this platform and saw an increase in adoption of our mobile and web solutions. We achieved notable improvement in speed, including improved parity in Asia.

As FactSet continues to grow, the development of our infrastructure is critical to having a strong foundation from which to serve our clients. In fiscal year 2017 we continued this progress, including the deployment of a new CRM and Portfolio Project Management system.

CONTENT

FactSet continues to add to the depth and breadth of our coverage in terms of instrument types, analytics, and data. For example, over the last year, FactSet has expanded its offerings to include IHS-Markit's pricing data for bonds, credit default swaps, and structured products; ICE's continuous evaluated fixed-income pricing and liquidity indicators services; and Informa Global Markets' market intelligence on credit markets, fixed income, and foreign exchanges.

Our investment in Fundamentals paid off with significant speed improvement. A critical functionality is turning preliminary financial information from publication to availability in our content suite. In fiscal year 2017 we were able to cut that turnaround time in half for the U.S. market. There was also a notable improvement in the turnaround time in the European and Asian markets.

DATA

Building on the foundation of our people, our values, and our technology, fiscal year 2018 will be marked by the acceleration of our evolution as a workflow company.

40

TURNING 40 BUT BUILT ON THE SAME FOUNDATION

FactSet will celebrate its 40th year in business at the end of fiscal year 2018.

Over these past 40 years, we have grown into a global company with over 9,000 employees in 23 countries. Year after year, we have delivered growth in ASV and earnings. In the last three years alone, we have grown over 32% in both ASV and EPS. As proud as we are of those achievements, we recognize that the key to our success, and to our success going forward, is the driving element behind it all—our focus on our people.

Building on the foundation of our people, our values, and our technology, fiscal year 2018 will be marked by the acceleration of our evolution as a workflow company. We focus on expanding our robust solutions across the portfolio lifecycle, integrating our acquisitions, and launching new products.

We enter fiscal year 2018 well positioned to extend our four-decade run of global growth.

ITEM 1. BUSINESS

Business Overview

FactSet Research Systems Inc. (the “Company” or “FactSet”) provides integrated financial information and analytical applications for the global investment community. The Company delivers insight and information to financial investment professionals through its analytics, service, content, and technology. By integrating comprehensive datasets and analytics across asset classes with client data, FactSet supports the workflow of both buy-side and sell-side clients. These professionals include portfolio managers, wealth managers, research and performance analysts, risk managers, research professionals, investment bankers, and fixed income professionals. From streaming real-time data to historical information, including quotes, estimates, news and commentary, FactSet offers unique and third-party content through desktop, wireless and off-platform solutions. The Company’s wide application suite offers tools and resources including company and industry analyses, full screening tools, portfolio analysis, risk profiles, alpha-testing, portfolio optimization and research management solutions. The Company’s revenues are derived from subscriptions to products and services such as workstations, analytics, enterprise data, research management, and trade execution.

Corporate History

FactSet was founded in 1978 and has been publicly held since 1996. The Company is dual listed on the New York Stock Exchange (“NYSE”) and the NASDAQ Stock Market (“NASDAQ”) under the symbol “FDS.” Fiscal 2017 marked the Company’s 39th year of operation, its 37th consecutive year of revenue growth and its 21st consecutive year of adjusted earnings growth as a public company.

In fiscal 2017, FactSet and its wholly owned companies Vermilion Holdings Limited (“Vermilion”) and Portware LLC (“Portware”), won top honors in more than nine industry awards competitions, including “Best Market Data Provider” and “Best Analytics Provider” in the Inside Market Data and Inside Reference Data Awards. In addition, Waters Rankings selected Vermilion for the second year in a row as the “Best Reporting System Provider.”

FactSet also earned top honors for its industry-leading service, winning “Best Client Services Solution” at the FTF News Technology Innovation Awards, Portware was honored as the “Best Buy-Side EMS” in the Markets Choice Awards, which recognize the best of the best across the institutional buy-side and sell-side: exchanges, sell-side trading desks, institutional asset owners, investment managers, and technology providers. In fiscal 2017, the Company completed numerous strategic acquisitions, to broaden its suite of products and provide end-to-end solutions for its clients. These acquisitions included the following:

- November 2016: Vermilion, a leading global provider of client reporting and communications software and services to the financial services industry.
- March 2017: BISAM, a leading provider of portfolio performance and attribution, multi-asset risk, GIPS composites management and reporting,
- April 2017: Interactive Data Managed Solutions business (“IDMS”), renamed to FactSet Digital Solutions, a managed solutions and digital portal provider helping wealth clients adapt to the industry’s digital transformation.

Client Subscription Growth

Annual subscription value (“ASV”) at any given point in time represents the forward-looking revenues for the next twelve months from all subscription services currently being supplied to clients. At August 31, 2017, ASV was \$1.32 billion, up 5.7% organically from a year ago. The increase in ASV during fiscal 2017 was driven by growth across the Analytics and Content & Technology Solutions (“CTS”) product suites.

During fiscal 2017, FactSet added 539 net new clients, increasing the number of clients by 12.8% over the prior year. The number of new client additions is an important metric for FactSet as new clients typically come on with modest deployments and often experience substantial growth in subsequent years. In terms of users, 4,910 net new users were added during fiscal 2017. FactSet saw healthy progression in the number of users at both its buy-side and sell-side clients.

The following chart provide a snapshot of FactSet's historic ASV growth:

Total ASV and International ASV Growth

Financial Information on Geographic Areas

Operating segments are defined as components of an enterprise that engage in business activities from which they may earn revenues and incur expenses, whose operating results are regularly reviewed by the enterprise's chief operating decision maker to make decisions about resources to be allocated to the segment and assess its performance, and for which discrete financial information is available. Financial information at the operating segment level is reviewed jointly by the Chief Executive Officer ("CEO") and senior management. Senior management consists of executives who directly report to the CEO, comprising the Chief Financial Officer, Chief Operating Officer, Global Head of Sales and Client Solutions, General Counsel, and Chief Human Resources Officer. Senior management, along with the CEO, constitute FactSet's chief operating decision making group ("CODMG") and is responsible for making decisions about resources allocated among the operating segments based on actual results.

FactSet's operating segments are aligned with how the Company, including its CODMG, manages the business and the demographic markets in which FactSet serves. The Company's internal financial reporting structure is based on three segments; the U.S., Europe and Asia Pacific. This alignment reflects the Company's approach to managing the business and transacting in the various markets in which FactSet serves by providing integrated global financial and economic information. Sales, consulting, data collection, product development and software engineering are the primary functional groups within the U.S., Europe and Asia Pacific segments that provide global financial and economic information to investment managers, investment banks and other financial services professionals. The U.S. segment services investment professionals including financial institutions throughout the Americas. The European and Asia Pacific segments service investment professionals located throughout Europe and the Asia Pacific region, respectively. Financial information, including revenues, operating income and long-lived assets related to the Company's operations in each geographic area are presented in Note 7, *Segment Information*, in the Notes to the Company's Consolidated Financial Statements included in Item 8.

The European segment maintains office locations in Bulgaria, Dubai, England, France, Germany, Italy, Latvia, the Netherlands, Spain, and Switzerland. The Asia Pacific segment has office locations in Australia, Hong Kong, India, Japan, and Singapore. Segment revenues reflect direct sales to clients based in their respective geographic locations. There are no intersegment or intercompany sales of the FactSet products and services. Each segment records compensation expense, including stock-based compensation, amortization of intangible assets, depreciation of furniture and fixtures, amortization of leasehold improvements, communication costs, professional fees, rent expense, travel, marketing, office and other direct expenses.

Expenditures associated with the Company's data centers, third party data costs and corporate headquarters charges are recorded by the U.S. segment and are not allocated to the other segments. The content collection centers located in India and the Philippines benefit all of the Company's operating segments and thus the expenses incurred at these locations are allocated to each segment based on a percentage of revenues.

The following charts depict revenues related to each of the Company's reportable segments.

Business Strategy

Research Solutions

FactSet's Research business offers a powerful data solution that combines global coverage, deep history, and unparalleled transparency with thousands of FactSet-sourced and third-party databases integrated in one flexible platform. The Research business has a strong focus on growing a number of users and clients types including investment banking, sell-side research, buy-side research, private equity, capital markets, investor relations, and media. This Research business offerings comprise Core Applications, including Universal Screening, Company & Security Analytics, Industry and Markets, Filings, Ownership, Research, News and our industry-leading Research Management Solutions ("RMS").

Portfolio Management and Trading Solutions

FactSet's Portfolio Management and Trading ("PMT") solutions focus on workflows that are specific and unique for the front office. This includes offering a multi-asset execution management system ("EMS") platform as well as compliance and order management functionality. These products are aimed at large asset managers, hedge funds and mid-market customers and combine automation and intelligent trading workflows. With a focus on serving traders and portfolio managers, we will continue our growth in this market segment.

Analytics Solutions

FactSet's Analytics business addresses workflows around risk, performance and reporting. FactSet's Analytics business has been one of our strongest growth drivers. Investment professionals want to focus on producing results. They need in-depth insight, powerful analytics, and comprehensive datasets integrated seamlessly with their portfolios. FactSet Portfolio Analysis ("PA") is a multi-asset class, global solution that helps investment professionals spend more time discovering alpha. PA is an interactive tool that helps users make smarter decisions with a flexible, multi-tile interface of reports and charts. FactSet's Multi-Asset Class ("MAC") risk model helps users understand risk factors across different asset types and classes. Additionally, the Company has enhanced its offering with client-requested functionality such as fixed income optimization and the Duration Times Spread ("DTS") attribution model.

Wealth Solutions

FactSet's Wealth business creates solutions that are specific and unique for the wealth management industry and help with investment portfolio management, advisory services, financial planning and other financial services. FactSet's medium to long-term investment themes in the wealth business will aim to achieve market-leading positions or differentiate offerings by providing end to end solutions, focusing on non-equity content and single security analytics, portfolio and risk analytics and digital strategy.

Content and Technology Solutions

FactSet's CTS business is focused on delivering value to its clients in the way they want to consume it. CTS offerings include delivery of content and analytics from the FactSet platform, as well as giving clients direct access to insight and information outside of the workstation through cloud-based application program interfaces ("APIs") and white label solutions.

FactSet Clients

Buy-side

FactSet is focused on understanding the buy-side workflow across all firm types and user types. These clients include portfolio managers, analysts, traders, wealth managers, performance teams and risk and compliance teams at a variety of firms, such as traditional asset managers, wealth advisors, hedge funds, insurance companies, plan sponsors and fund of funds.

As buy-side clients continues to shift towards multi-asset class investment strategies, FactSet is well positioned to be a partner in the space, given its ability to provide solutions across their entire workflow. Through its workstation, powerful analytics, unique content like FactSet's Geographic Revenue data, data feeds and portfolio services, FactSet is able to provide solutions across asset classes and at nearly every stage of the investment process.

The buy-side ASV growth rate for fiscal 2017 was 5.9%. Buy-side clients accounted for 84.1% of ASV as of August 31, 2017.

Sell-side

FactSet is a market leader on the sell-side and is continuing to expand beyond investment banking into various other parts of banking institutions. The Company anticipates that future growth may come from the breadth of solutions FactSet provides to the sell-side across analytics, content and technology.

FactSet has historically focused on selling workstations to banks. Over the last few years, its emphasis has shifted to focus on selling more differentiated product offerings outside the workstation including StreetAccount, and RMS. FactSet is also expanding its banking user base outside investment banking to commercial banking, research, quant groups, compliance and regulatory divisions and sales and trading teams.

The sell-side ASV growth rate for fiscal 2017 was 4.6%. Sell-side clients accounted for 15.9% of ASV as of August 31, 2017.

Talent

Since its founding, FactSet has built a collaborative culture that recognizes and rewards innovation and offers employees a variety of opportunities and experiences. FactSet's employees are critical to its success and the reason FactSet continues to execute at a high level. FactSet's focus on engaging and enabling employees to do their best work, is central to FactSet's ability to deliver the best insight and information to clients globally.

In fiscal 2017, FactSet was honored by the following recognition:

- Best Workplaces in Finance and Insurance from *FORTUNE*
- Top Companies for Graduates to Work for in the UK by TheJobCrowd® for the fourth consecutive year
- U.K.'s Best Workplaces from Great Place to Work® for the eighth consecutive year

As of August 31, 2017, employee headcount was 9,074, up 8.3% from a year ago. Excluding workforces acquired in fiscal 2017, headcount increased 2.4% from a year ago. Of FactSet's total employees, 2,493 were located in the U.S., 1,322 in Europe and 5,259 in the Asia Pacific region. Approximately 70% of the Company's employees were involved in operational roles including content collection and software and systems engineering, 27% had a client-focused role conducting sales and consulting services and the remaining 3% provided administrative support.

In May 2017, John W. Wiseman was named the Company's new Executive Vice President, Global Head of Sales and Client Solutions. In this role, Mr. Wiseman reports directly to FactSet's Chief Executive Officer, Phil Snow, and is responsible for all global sales and client service activities for the Company.

As of August 31, 2017, approximately 500 FactSet employees within certain French and German subsidiaries were represented by mandatory works councils. No other employees are represented by a collective bargaining agreement.

Third Party Content

FactSet aggregates third party content from thousands of data suppliers, news sources, exchanges, brokers and contributors into its own dedicated online service, which clients access to perform their analyses. FactSet carries content from premier providers such as Australian Securities Exchange, Axioma, Inc., Bank of America Merrill Lynch, Barclays, Bureau van Dijk, Dow Jones & Company Inc., Information USA Inc., Interactive Data Corporation, LLC, Intex Solutions, Inc., London Stock Exchange, Morningstar, Inc., MSCI Inc., NASDAQ OMX, Northfield Information Services, Inc., NYSE Euronext Inc., ProQuote Limited, Russell Investments, S&P Global Inc., SIX Financial Thomson Reuters, Toyo Keizai Inc. and Tokyo Stock Exchange. FactSet seeks to maintain contractual relationships with a minimum of two content providers for each major type of financial

data, though certain data sets on which FactSet relies have a limited number of suppliers. The Company makes every effort, when reasonable, to locate alternative sources, to ensure that FactSet is not dependent on any one third party data supplier. The Company has entered into third party content agreements with varying lengths, which in some cases can be terminated on one year's notice, at predefined dates, and in other cases on shorter notice. No single vendor or data supplier represented 10% or more of FactSet's total data expenses in any fiscal year presented.

Data Centers

FactSet's business is dependent on its ability to process substantial volumes of data and transactions rapidly and efficiently on its networks and systems. The Company's global technology infrastructure supports its operations and is designed to facilitate the reliable and efficient processing and delivery of data and analytics to its clients. FactSet's data centers contain multiple layers of redundancy to enhance system performance, including maintaining, processing and storing data at multiple data centers. User connections are load balanced between data centers. In the event of a site failure, equipment problem or localized disaster, the remaining center has the capacity to handle the additional load. FactSet continues to be focused on maintaining a global technological infrastructure that allows the Company to support its growing business.

Several years ago, FactSet launched, "Project NextGen," to evolve away from large mainframe computers to a more distributed environment powered by a vast array of smaller, faster and more cost-effective machines. The Company operates fully redundant data centers in Virginia and New Jersey in the U.S. These data centers handle FactSet's entire client capacity. In addition, FactSet maintains a vast private wide area network that provides a high-speed direct link between the client's local network and the data content and powerful applications found on the Company's mainframe machines.

The Competitive Landscape

FactSet is part of the financial information services industry, which provides accurate financial information and software solutions to the global investment community. This extremely competitive market is comprised of both large, well-capitalized companies and smaller, niche firms including market data suppliers, news and information providers and many of the content providers that supply the Company with financial information included in the FactSet workstation. The largest competitors to FactSet are Bloomberg L.P., Thomson Reuters Inc. and S&P Global Market Intelligence. Other competitors and competitive products include online database suppliers and integrators and their applications, such as MSCI Inc., Morningstar Inc., BlackRock Solutions, RIMES Technologies Corporation and Wilshire Associates Inc. Many of these firms offer products or services which are similar to those sold by the Company. FactSet's development of its own robust sets of proprietary content combined with its news and quotes offering have resulted in more direct competition with the largest financial data providers.

Despite competing products and services, FactSet enjoys high barriers to entry and believes it would be difficult for another vendor to replicate quickly the extensive databases the Company currently offers. Through its in-depth analytics and superior client service, FactSet believes it can offer clients a more complete solution with one of the broadest sets of functionalities, through a desktop user interface or data feed. In addition, FactSet's applications, including its client support and service offerings, are entrenched in the workflow of many financial professionals given the downloading functions and portfolio analysis/screening capabilities offered. The Company is entrusted with significant amounts of our clients' own proprietary data, including portfolio holdings. As a result, the Company's products have become central to investment analysis and decision-making for clients.

Intellectual Property

FactSet has registered trademarks and copyrights for many of its products and services and will continue to evaluate the registration of additional trademarks and copyrights as appropriate. FactSet enters into confidentiality agreements with its employees, clients, data suppliers and vendors. The Company seeks to protect its software, documentation and other written materials under trade secret, copyright and patent laws. While FactSet does not believe it is dependent on any one of its intellectual property rights, the Company does rely on the combination of intellectual property rights and other measures to protect its proprietary rights. Despite these efforts, existing intellectual property laws may afford only limited protection.

Research and Product Development Costs

A key aspect of the Company's growth strategy is to enhance its existing products and applications by making them faster and the data within them more reliable. FactSet strives rapidly to adopt new technology that can improve its products and services. FactSet does not have a separate research and product development department, but rather the Product Development and Engineering departments work closely with the Sales function to identify areas of improvement with the goal of providing increased value to clients. As such, research and product development costs relate to the salary and benefits for the Company's product development, software engineering and technical support staff and, as such, these costs are expensed when incurred within cost of services as employee compensation. The Company expects to allocate a similar percentage of its

workforce in future years in order to continue to develop new products and enhancements, respond quickly to market changes and meet the needs of its clients efficiently. FactSet incurred \$215.0 million of research and product development costs during fiscal 2017, which was comparable to its spend on similar development during fiscal years 2016 and 2015 respectively.

Government Regulation

The Company is subject to reporting requirements, disclosure obligations and other recordkeeping requirements per the Securities and Exchange Commission (“SEC”) and the various local authorities that regulate each location in which FactSet operates in. The Company’s wholly owned subsidiary, P.A.N. Securities, Inc., is a member of the Financial Industry Regulatory Authority, Inc. and is a registered broker-dealer under Section 15 of the Securities and Exchange Act of 1934. P.A.N. Securities, Inc., as a registered broker-dealer, is subject to Rule 15c3-1 under the Securities and Exchange Act of 1934, which requires that the Company maintain minimum net capital requirements. The Company claims exemption under Rule 15c3-3(k)(2)(i).

Corporate Contact Information

FactSet was founded as a Delaware corporation in 1978, and its principal executive offices are in Norwalk, Connecticut.

Mailing address of the Company’s headquarters: 601 Merritt 7, Norwalk, Connecticut 06851

Telephone number: (203) 810-1000

Website address: www.factset.com

Available Information

Through the Investor Relations section of the Company’s website (<http://investor.factset.com>), FactSet makes available the following filings as soon as practicable after they are electronically filed with, or furnished to, the SEC: the Company’s Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K, Proxy Statements for the annual stockholder meetings, Reports on Forms 3, 4 or 5 and any amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934, as amended. All such filings are available free of charge.

FactSet broadcasts live its quarterly earnings calls via its investor relations website. Additionally, the Company provides notifications of news or announcements regarding its financial performance, including SEC filings, investor events, press and earnings releases, and blogs as part of its investor relations website. The contents of this website is not intended to be incorporated by reference into this report or in any other report or document the Company files and any reference to this website is intended to be inactive textual references only.

In addition, the Company’s Code of Ethical Conduct for Financial Managers and Code of Business Conduct and Ethics are posted in the Investor Relations section of the Company’s website and the same information is available in print to any stockholder who submits a written request to the Company’s Investor Relations department at its corporate headquarters. Any amendments to or waivers of such code required to be publicly disclosed by the applicable exchange rules or the SEC will be posted on the Company’s website. The Corporate Governance Guidelines and the charters of each of the committees of the Company’s Board of Directors, including the Audit Committee, Compensation and Talent Committee and Nominating and Corporate Governance Committee, are available on the Investor Relations section of the Company’s website. The same information is available in print, free of charge, to any stockholder who submits a written request to the Company’s Investor Relations department at its corporate headquarters.

Executive Officers of the Registrant

The following table shows the Company's executive officers as of August 31, 2017:

Name of Officer	Age	Office Held with the Company	Officer Since
F. Philip Snow	53	Chief Executive Officer	2014
Mark J. Hale	44	Executive Vice President, Chief Operating Officer	2015
John W. Wiseman	49	Executive Vice President, Global Head of Sales and Client Solutions	2017
Maurizio Nicolelli	49	Senior Vice President, Chief Financial Officer	2009
Edward Baker-Greene	54	Senior Vice President, Chief Human Resources Officer	2015
Rachel R. Stern	52	Senior Vice President, Strategic Resources and General Counsel	2009

F. Philip Snow – Chief Executive Officer. Mr. Snow was named Chief Executive Officer effective July 1, 2015. Prior to that, Mr. Snow held the title of President. He began his career at FactSet in 1996 as a Consultant, before moving to the Asia Pacific region to hold positions in the Tokyo and Sydney offices. After moving back to the U.S. in 2000, Mr. Snow held various sales leadership roles before assuming the role of Senior Vice President, Director of U.S. Investment Management Sales in 2013. Mr. Snow received a B.A. in Chemistry from the University of California at Berkeley and a Masters of International Management from the Thunderbird School of Global Management. He holds the Chartered Financial Analyst designation and is a member of the CFA Institute.

Mark J. Hale – Executive Vice President, Chief Operating Officer. Mr. Hale joined the Company in 1995 as a software engineer. During his tenure at FactSet, Mr. Hale has held several positions of increasing responsibility including Head of Software Engineering, and most recently, Senior Vice President, Director of Content Operations. Mr. Hale received a B.S. in Electrical and Computer Engineering from Carnegie Mellon University.

John W. Wiseman – Executive Vice President, Global Head of Sales and Client Solutions. Mr. Wiseman joined FactSet in 2004 as Vice President in the sales department. During his tenure at FactSet, Mr. Wiseman held several positions of responsibility including Senior Vice President, Global Head of Strategic Partnerships & Alliances. Prior to his experience with FactSet, Mr. Wiseman was a Senior Managing Director at Bear Stearns & Co. Inc. Mr. Wiseman received a B.A. in Political Science and Management Science from Duke University and a Master's of Business Administration from the University of Edinburgh.

Maurizio Nicolelli – Senior Vice President, Chief Financial Officer. Mr. Nicolelli joined the Company in 1996 as the Senior Accountant and held the position of Chief Accountant from 1999 to 2001. From 2002 to 2009, he served as Vice President and Comptroller of the Company. From October 2009 to 2013, he occupied the position of Senior Vice President, Principal Financial Officer and was named Chief Financial Officer in fiscal 2014. Prior to joining FactSet, he was employed at PricewaterhouseCoopers LLP. He holds a B.S. in Political Science from Syracuse University and an M.B.A. in Accounting from St. John's University. Mr. Nicolelli is a CPA licensed in the state of New York.

Edward Baker-Greene – Senior Vice President, Chief Human Resources Officer. Mr. Baker-Greene joined FactSet in June 2015 from Voya Financial, formerly ING, U.S., where he was Head of Human Resources for Retirement Solutions, Operations, and Information Technology. Previously, Mr. Baker-Greene worked at Fidelity Investments for 13 years. At Fidelity, he was a part of the Personal and Workplace Investing division, where he held roles in business and human resources capacities, including Senior Vice President/Managing Director, Relationship Management. Mr. Baker-Greene began his professional career as a lawyer focusing on employment law, recruiting, talent management, and human capital management. Mr. Baker-Greene received a B.A. from Tufts University and a J.D. from the University of Virginia School of Law.

Rachel R. Stern – Senior Vice President, Strategic Resources and General Counsel. Ms. Stern joined FactSet in 2001 as General Counsel. In addition to the Legal Department at FactSet, she is responsible for administration of our offices in Hyderabad and Manila; Facilities Management and Real Estate Planning; and Third-Party Content and Strategic Partnerships. Ms. Stern is admitted to practice in New York, and Washington D.C., and as House Counsel in Connecticut. Ms. Stern received a B.A. from Yale University, an M.A. from the University of London and a J.D. from the University of Pennsylvania Law School.

Additional Information

Additional information with respect to the Company's business is included in the following pages and is incorporated herein by reference:

Note 7 to Consolidated Financial Statements entitled Segment Information	61

ITEM 1A. RISK FACTORS

Set forth below and elsewhere in this report and in other documents FactSet files with the SEC are risks and uncertainties that could cause actual results to differ materially from those expressed by the forward-looking statements contained in this report. Investors should carefully consider the risks described below before making an investment decision. In assessing these risks, investors should also refer to the other information contained or incorporated by reference in this Annual Report on Form 10-K filed with the SEC, including the Company's consolidated financial statements and related notes thereto. FactSet's operating results are subject to quarterly and annual fluctuations as a result of numerous factors. As a consequence, operating results for a particular future period are difficult to predict, and, therefore, prior results are not necessarily indicative of future performance.

Risk factors which could cause future financial performance to differ materially from the expectations as expressed in any of FactSet's forward-looking statements made by or on the Company's behalf include, without limitation:

FactSet must ensure the protection and privacy of client data

Many of FactSet's products, as well as its internal systems and processes, involve the storage and transmission of proprietary information and sensitive or confidential data, including client portfolios. FactSet relies on a complex network of internal controls to protect the privacy of client data. If FactSet fails to maintain the adequacy of its internal controls, including any failure to implement required new or improved controls, misappropriation of client data by an employee or an external third party could occur. This data misappropriation could damage the Company's reputation and ultimately its business. Breaches of Company security measures could expose FactSet, its clients or the individuals affected to a risk of loss or misuse of this information, potentially resulting in litigation and liability for the Company, as well as the loss of existing or potential clients and damage to the Company's brand and reputation.

FactSet must continue to introduce new products and enhancements to maintain its technological position

The market for FactSet is characterized by rapid technological change, changes in client demands and evolving industry standards, which can render existing products obsolete and unmarketable. As a result, the Company's future success will continue to depend upon its ability to develop new products and enhancements that address the future needs of its target markets and to respond to their changing standards and practices. FactSet may not be successful in developing, introducing, marketing and licensing the Company's new products and enhancements on a timely and cost effective basis, and they may not adequately meet the requirements of the marketplace or achieve market acceptance. In addition, clients may delay purchases in anticipation of new products or enhancements.

FactSet must hire and retain key qualified personnel

The Company's business is based on successfully attracting and retaining talented employees. Competition for talent, including engineering personnel, in the industry in which the Company competes is strong. If the Company is less successful in its recruiting efforts, or if it is unable to retain key employees, its ability to develop and deliver successful products and services may be adversely affected. FactSet needs technical resources such as product development engineers to develop new products and enhance existing products. The Company relies upon sales personnel to sell its products and services and maintain healthy business relationships. FactSet's failure to attract and retain talented employees could have a material, adverse effect on the Company's business.

A decline in equity and/or fixed income returns may impact the buying power of investment management clients. Approximately 84.1% of the Company's annual subscription value ("ASV") is derived from its investment management clients. The prosperity of these clients is tied to equity assets under management. An equity market decline not only depresses assets under management but could cause a significant increase in redemption requests. Moreover, extended declines in the equity markets may reduce new fund or client creation, resulting in lower demand for services from investment managers.

Uncertainty, consolidation and business failures in the global investment banking industry may cause FactSet to lose clients and users

FactSet's sell-side clients that perform M&A advisory work, capital markets services and equity research, account for approximately 15.9% of its ASV. A significant portion of these revenues relate to services deployed by the largest banks. While improvements have been observed in the current fiscal year, the global investment banking industry continues to experience uncertainty and consolidation, which directly impacts the number of prospective clients and users within the sector. A lack of available credit would impact many of the large banking clients due to the amount of leverage deployed in past operations. A

lack of confidence in the global banking system could cause declines in merger and acquisitions funded by debt. Uncertainty, consolidation and business failures in the global investment banking sector could adversely affect the Company's financial results and future growth.

A dramatic shift from active to passive investing could negatively impact user count growth

The predominant investment strategy today is active investing, which attempts to outperform the market. The goal of active management is to beat a particular benchmark. The majority of assets under management are actively managed. Analyzing market trends, the economy and the company-specific factors, active managers are constantly searching out information and gathering insights to help them make their investment decisions. Passive management, or indexing, is an investment management approach based on investing in exactly the same securities, and in the same proportions, as an index such as Dow Jones Industrial Average or the S&P 500. It is called passive because portfolio managers do not make decisions about which securities to buy and sell; the managers merely follow the same methodology of constructing a portfolio as the index uses. The main advantage of active management is the expectation that the managers will be able to outperform the index due to their superior skills. They can make informed investment decisions based on their experiences, insights, knowledge and ability to identify opportunities that can translate into superior performance. The main advantage of passive investing is that it closely matches the performance of the index. Passive investing requires little decision-making by the manager. The manager tries to duplicate the chosen index, tracking it as efficiently as possible. This results in lower operating costs that are passed on to the investor in the form of lower fees. Approximately 84.1% of the Company's ASV is derived from its investment management clients. In the past decade, passively managed index funds have seen greater investor interest, and this trend has become more dramatic in recent years. A continued lessening of investor interest in actively managed equity funds could decrease demand for FactSet's products and services.

Competition in FactSet's industry may cause price reductions or loss of market share

FactSet continues to experience intense competition across all markets for its products with competitors ranging in size from smaller, highly specialized, single-product businesses to multi-billion dollar companies. While the Company believes the breadth and depth of its suite of products and applications offer benefits to its clients that are a competitive advantage, its competitors may offer price incentives to attract new business. Future competitive pricing pressures may result in decreased sales volumes and price reductions, resulting in lower revenues. Weak economic conditions may also result in clients seeking to utilize lower-cost information that is available from alternative sources. The impact of cost-cutting pressures across the industries FactSet serves could lower demand for its services. In recent years, FactSet has seen clients intensify their focus on containing or reducing costs as a result of the more challenging market conditions. Clients within the financial services industry that strive to reduce their operating costs may seek to reduce their spending on financial market data and related services. If clients elect to reduce their spending with FactSet, the Company's results of operations could be materially adversely affected. Clients may use other strategies to reduce their overall spending on financial market data services by consolidating their spending with fewer vendors, by selecting vendors with lower-cost offerings or by self-sourcing their needs for financial market data. If clients elect to consolidate their spending on financial market data services with other vendors and not FactSet, the Company's results of operations could be adversely affected.

Failure to maintain reputation

FactSet enjoys a positive reputation in the marketplace. FactSet's ability to attract and retain customers is affected by external perceptions of its brand and reputation. Reputational damage from negative perceptions or publicity could affect FactSet's ability to attract and retain clients and employees and its ability to price its products at their full value. Although the Company monitors developments for areas of potential risk to its reputation and brand, negative perceptions or publicity could have a material adverse effect on FactSet's business and financial results.

Increased accessibility to free or relatively inexpensive information sources may reduce demand for FactSet

Each year, an increasing amount of free or relatively inexpensive information becomes available, particularly through the Internet, and this trend may continue. The availability of free or relatively inexpensive information may reduce demand for FactSet's products. While the Company believes its service offering is distinguished by such factors as customization, timeliness, accuracy, ease-of-use, completeness and other added value factors, if users choose to obtain the information they need from public or other sources, FactSet's business, financial condition, and results of operations could be adversely affected.

FactSet's international operations involve special risks

In 2017, approximately 36% of FactSet's revenue related to operations located outside of the U.S. In addition, a significant number of its employees, 73%, are located in offices outside of the U.S. The Company expects to continue its international

growth, with international revenue accounting for an increased portion of total revenue in the future. The Company's international operations involve risks that differ from or are in addition to those faced by its U.S. operations. These risks include difficulties in developing products, services and technology tailored to the needs of clients around the world, including in emerging markets; different employment laws and rules and related social and cultural factors; different regulatory and compliance requirements, including in the areas of privacy and data protection, anti-bribery and anti-corruption, trade sanctions, marketing and sales and other barriers to conducting business; cultural and language differences; diverse or less stable political, operating and economic environments and market fluctuations; civil disturbances or other catastrophic events that reduce business activity; limited recognition of FactSet's brand; differing accounting principles and standards; restrictions on or adverse tax consequences from entity management efforts; and unexpected changes in U.S. or foreign tax laws. If the Company is not able to efficiently adapt to or effectively manage the business in markets outside of the U.S., its business prospects and operating results could be materially and adversely affected. In particular, political tension has been increasing in Manila, the Philippines. Civil unrest in Manila may make it difficult or impossible for FactSet to continue its operations there. Although FactSet has tested business continuity plans in place for its operations there, an extended period of civil unrest that halts or significantly impedes operations could have a material adverse effect on the Company.

Exposure to fluctuations in currency exchange rates that could negatively impact financial results and cash flows
The Company faces exposure to adverse movements in foreign currency exchange rates as 73% of FactSet's employees and 54% of its leased office space were located outside the U.S at August 31, 2017. These exposures may change over time and they could have a material adverse impact on the Company's financial results and cash flows. The Company's primary exposures relate to expenses denominated in British Pound Sterling, Euro, Indian Rupee, Japanese Yen and Philippine Peso. This exposure has increased over the past 12 months primarily as the Company's international employee base has increased, both organically and due to the fiscal 2017 acquisitions, by 613 net new employees, a 10% increase since August 31, 2016. FactSet's non-U.S. dollar denominated revenues expected to be recognized over the next 12 months are estimated to be approximately \$90 million, while its non-U.S. dollar denominated expenses are estimated to be approximately \$300 million, resulting in a net foreign currency exposure of approximately \$210 million. Although FactSet believes that its foreign exchange hedging policies are reasonable and prudent under the circumstances, the Company's attempt to hedge against these risks may not be successful, which could cause an adverse impact on its results of operations.

Volatility in the financial markets may delay the spending pattern of clients and reduce future ASV growth
Sales cycles for FactSet may fluctuate and be extended in times where the financial markets are volatile. The decision to purchase the FactSet service often requires management-level sponsorship, which often leads FactSet to engage in relatively lengthy sales efforts. Purchases (and incremental ASV) may therefore be delayed as uncertainties in the financial markets may cause clients to remain cautious about capital and data content expenditures, particularly in uncertain economic environments. The cycle associated with the purchase of the Company's service offerings typically depends upon the size of the client.

Failure to identify, integrate, or realize anticipated benefits of acquisitions

FactSet may be unable to successfully identify acquisitions or may experience integration or other risks resulting from its acquisitions, leading to an adverse effect on its financial results. As the Company continues to pursue selective acquisitions to support its business and growth strategy, it seeks to be a disciplined acquirer. There can be no assurance that it will be able to identify suitable candidates for successful acquisition at acceptable prices. In addition, the Company's ability to achieve the expected returns and synergies from past and future acquisitions and alliances depends in part upon its ability to effectively integrate the offerings, technology, sales, administrative functions and personnel of these businesses into FactSet's core business. The Company cannot assure its acquired businesses will perform at the levels anticipated. In addition, past and future acquisitions may subject the Company to unanticipated risks or liabilities or disrupt operations.

A prolonged or recurring outage at FactSet's data centers could result in reduced service and the loss of clients
FactSet's clients rely on the Company for the delivery of time-sensitive, up-to-date data. FactSet's business is dependent on its ability to process substantial volumes of data and transactions rapidly and efficiently on its computer-based networks and systems. The Company's computer operations and those of its suppliers and clients are vulnerable to interruption by fire, natural disaster, power loss, telecommunications failures, terrorist attacks, acts of war, internet failures, computer viruses and other events beyond the Company's reasonable control. FactSet maintains back-up facilities for each of its major data centers to minimize the risk that any such event will disrupt operations. However, a loss of the Company's services may induce its clients to seek alternative data suppliers. Any such losses or damages incurred by FactSet could have a material adverse effect on its business. Although the Company seeks to minimize these risks through security measures, controls and back-up data centers, there can be no assurance that such efforts will be successful or effective.

The negotiation of contract terms supporting new and existing data sets or products

FactSet aggregates third party content from thousands of data suppliers, news sources, exchanges, brokers and contributors into its own dedicated online service, which clients access to perform their analyses. Clients have access to the data and content found within the FactSet databases. These databases are important to the Company's operations as they provide clients with key information. FactSet has entered into third party content agreements with varying lengths, which in some cases can be terminated on one year's notice at predefined dates, and in other cases on shorter notice. FactSet seeks to maintain favorable contractual relationships with its data suppliers. The Company makes every effort, when reasonable, to locate alternative sources to ensure FactSet is not dependent on any one third party data supplier. FactSet believes it is not dependent on any one third party data supplier. The failure of FactSet to be able to maintain these relationships or the failure of its suppliers to deliver accurate data and in a timely manner could adversely affect the Company's business.

Third parties may claim FactSet infringes upon their intellectual property rights

FactSet may receive notice from others claiming that the Company has infringed upon their intellectual property rights. Responding to these claims may require the Company to enter into royalty and licensing agreements on less favorable terms, enter into settlements, stop selling or redesign affected products, pay damages or satisfy indemnification commitments with the Company's clients or vendors under contractual provisions of various license arrangements. If FactSet is required to enter into such agreements or take such actions, its operating margins may decline as a result. FactSet has made and expects to continue incurring expenditures to acquire the use of technology and intellectual property rights as part of its strategy to manage this risk.

Changes in securities laws and regulations may increase expenses or may harm demand

Many of FactSet's clients operate within a highly regulated environment. In light of the recent conditions in the U.S. financial markets and economy, the U.S. Congress and Federal regulators have increased their focus on the regulation of the financial services industry. The information provided by, or resident in, the service FactSet provides to its clients could be deemed relevant to a regulatory investigation or other governmental or private legal proceeding involving its clients, which could result in requests for information from FactSet that could be expensive and time consuming. In addition, clients subject to investigations or legal proceedings may be adversely impacted, possibly leading to their liquidation, bankruptcy, receivership, reductions in assets under management, or diminished operations that would adversely affect the Company's revenues.

Adverse resolution of litigation or governmental investigations may harm FactSet's operating results

FactSet is party to lawsuits in the normal course of business. Litigation can be expensive, lengthy and disruptive to normal business operations. Moreover, the results of complex legal proceedings are difficult to predict. Unfavorable resolution of lawsuits could have a material adverse effect on the Company's business, operating results or financial condition. For additional information regarding legal matters, see Item 3, *Legal Proceedings*, contained in Part I of this report.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 2. PROPERTIES

At August 31, 2017, the Company leased approximately 202,000 square feet of office space at its headquarters in Norwalk, Connecticut. Including new lease agreements executed during fiscal 2017, the Company's worldwide leased office space increased to approximately 1,143,000 square feet at August 31, 2017, up 71,000 square feet, or 7%, from August 31, 2016, and includes properties at the following locations:

Segment	Location
United States	Atlanta, Georgia
	Austin, Texas
	Boston, Massachusetts
	Chicago, Illinois
	Jackson, Wyoming
	Los Angeles, California
	Minneapolis, Minnesota
	New York, New York
	San Francisco, California
	Toronto, Canada
	Tuscaloosa, Alabama
Youngstown, Ohio	
Europe	Avon, France
	Amsterdam, The Netherlands
	Cologne, Germany
	Dubai, United Arab Emirates
	Frankfurt, Germany
	Gloucester, England
	London, England
	Madrid, Spain
	Milan, Italy
	Paris, France
	Riga, Latvia
	Sofia, Bulgaria
	Zurich, Switzerland
Asia Pacific	Hong Kong
	Singapore
	Chennai, India
	Mumbai, India
	Melbourne, Australia
	Sydney, Australia
Tokyo, Japan	

The Company has data content collection offices located in Hyderabad, India and Manila, the Philippines, which benefit all of the Company's operating segments. Additionally, the Company has data centers that support its technological infrastructure located in Manchester, New Hampshire, Piscataway, New Jersey and Reston, Virginia. The leases expire on various dates through 2031. The Company believes the amount of leased office space as of August 31, 2017 is adequate for its current needs and that additional space is available for lease to meet any future needs.

ITEM 3. LEGAL PROCEEDINGS

From time to time, FactSet is subject to legal proceedings, claims and litigation arising in the ordinary course of business, including intellectual property litigation. Based on currently available information, FactSet's management does not believe that the ultimate outcome of these unresolved matters against the Company, individually or in the aggregate, is likely to have a material adverse effect on the Company's consolidated financial position, its annual results of operations or its annual cash flows. However, these matters are subject to inherent uncertainties and management's view of these matters may change in the future.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

Part II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

(a) Market Information, Holders and Dividends

Market Information - FactSet common stock is listed on the New York Stock Exchange ("NYSE") and the NASDAQ Stock Market under the symbol FDS. The following table sets forth, for each fiscal period indicated, the high and low sales prices per share of the Company's common stock as reported on the NYSE:

	First	Second	Third	Fourth
2017				
High	\$ 183.17	\$ 183.64	\$ 182.56	\$ 172.22
Low	\$ 150.95	\$ 157.56	\$ 156.92	\$ 155.09
2016				
High	\$ 177.28	\$ 173.77	\$ 160.34	\$ 179.73
Low	\$ 153.00	\$ 135.95	\$ 143.08	\$ 149.39

Holdings of Record – As of October 25, 2017, there were approximately 156,748 holders of record of FactSet common stock. However, because many of FactSet's shares of common stock are held by brokers and other institutions on behalf of stockholders, FactSet is unable to estimate the total number of stockholders represented by these record holders. The closing price of FactSet's common stock on October 25, 2017, was \$188.20 per share as reported on the NYSE.

Dividends - In fiscal 2017, the Company's Board of Directors declared the following dividends:

Declaration Date	Dividends Per Share of Common Stock	Type	Record Date	Total Amount (in thousands)	Payment Date
August 10, 2017	\$ 0.56	Regular (cash)	August 31, 2017	\$ 21,853	September 19, 2017
May 5, 2017 ⁽¹⁾	\$ 0.56	Regular (cash)	May 31, 2017	\$ 21,951	June 20, 2017
February 6, 2017	\$ 0.50	Regular (cash)	February 28, 2017	\$ 19,709	March 21, 2017
November 10, 2016	\$ 0.50	Regular (cash)	November 30, 2016	\$ 19,852	December 20, 2016

⁽¹⁾ On May 5, 2017, FactSet's Board of Directors approved a 12.0% increase in the regular quarterly dividend beginning with the dividend payment in June 2017 which was \$0.56 per share, or \$2.24 per share per annum.

All of the above cash dividends were paid from existing cash resources. Future dividend payments will depend on the Company's earnings, capital requirements, financial condition and other factors considered relevant by FactSet, and is subject to final determination by the Company's Board of Directors.

(b) Recent Sales of Unregistered Securities

There were no sales of unregistered equity securities in fiscal 2017.

(c) Issuer Purchases of Equity Securities

The following table provides a month-to-month summary of the share repurchase activity under the current stock repurchase program during the three months ended August 31, 2017 (in thousands, except per share data):

Period	Total number of shares purchased	Average price paid per share	Total number of shares purchased as part of publicly announced plans or programs	Maximum number of shares (or approximate dollar value) that may yet be purchased under the plans or programs ⁽¹⁾
June 2017	—	—	—	\$288,195
July 2017	205,000	\$164.07	205,000	\$254,561
August 2017	65,000	\$160.76	65,000	\$244,111
	270,000		270,000	

⁽¹⁾ Repurchases may be made from time to time in the open market and privately negotiated transactions, subject to market conditions. No minimum number of shares to be repurchased has been fixed. There is no timeframe to complete the repurchase program and it is expected that share repurchases will be paid using existing and future cash generated by operations.

Securities Authorized for Issuance under Equity Compensation Plans – Information regarding securities authorized for issuance under equity compensation plans is incorporated by reference from the Company’s Proxy Statement filed on October 30, 2017, for its 2017 Annual Meeting of Stockholders.

Stock Performance Graph

The annual changes for the five-year period shown in the graph below are based on the assumption that \$100 had been invested in FactSet common stock, the Standard & Poor’s 500 Index, the NYSE Composite Index and the Dow Jones U.S. Financial Services Index on August 31, 2012. The total cumulative dollar returns shown on the graph represent the value that such investments would have had on August 31, 2017. Stockholder returns over the indicated period are based on historical data and should not be considered indicative of future stockholder returns.

	2012	2013	2014	2015	2016	2017
FactSet Research Systems Inc.	\$100	\$112	\$140	\$173	\$195	\$172
S&P 500 Index	\$100	\$117	\$143	\$141	\$155	\$177
NYSE Composite Index	\$100	\$116	\$139	\$128	\$135	\$149
Dow Jones U.S. Financial Services Index	\$100	\$136	\$162	\$168	\$170	\$213

The information contained in the above graph shall not be deemed to be soliciting material or filed or incorporated by reference in future filings with the SEC, or subject to the liabilities of Section 18 of the Securities Exchange Act of 1934, except to the extent that FactSet specifically incorporates it by reference into a document filed under the Securities Act of 1933 or the Securities Exchange Act of 1934.

ITEM 6. SELECTED FINANCIAL DATA

The following selected financial data has been derived from FactSet's consolidated financial statements. This financial data should be read in conjunction with Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations and Item 8, Financial Statements and Supplementary Data, of this Annual Report on Form 10-K.

Consolidated Statements of Income Data

- (1) Operating income in fiscal 2017 includes pre-tax charges of \$5.6 million related to modifications of certain share-based compensation grants \$5.0 million related to restructuring actions initiated by the Company and \$7.4 million of other non-recurring expenses related primarily to the BISAM and FactSet Digital Solutions acquisitions.
- (2) Fiscal 2017 net income includes \$4.2 million (after-tax) related to modifications of certain share-based compensation grants, \$3.7 million (after-tax) related to restructuring actions initiated by the Company and \$5.5 million (after-tax) of other non-recurring expenses related primarily to the BISAM and FactSet Digital Solutions acquisitions. Fiscal 2017 net income also includes a loss of \$0.9 million (after-tax) from the final working capital adjustment related to sale of FactSet's Market Metrics business in the fourth quarter of fiscal 2016. These charges were offset by income tax benefits of \$1.9 million related primarily to finalizing prior year tax returns and other discrete items.
- (3) Diluted EPS for fiscal 2017 includes a \$0.11 decrease in diluted EPS from the modifications of certain share-based compensation grants, a \$0.09 decrease from the restructuring actions, a \$0.13 decrease from the other non-recurring items related primarily to the BISAM and FactSet Digital Solutions acquisitions and \$0.02 decrease from the working capital adjustment, partially offset by a \$0.05 increase in diluted EPS from the income tax benefits.
- (4) Operating income in fiscal 2016 includes pre-tax charges of \$4.6 million related primarily to legal matters, \$2.8 million from restructuring actions initiated by the Company and \$1.8 million related to a change in the vesting of performance-based equity options.
- (5) Fiscal 2016 net income includes \$3.3 million (after-tax) of non-recurring items related primarily to legal matters, \$2.0 million (after-tax) from restructuring actions initiated by the Company, \$1.2 million (after-tax) related to a change in the vesting of performance-based equity instruments, income tax benefits of \$10.5 million primarily from the permanent reenactment of the U.S. Federal R&D Tax Credit, finalizing the fiscal 2015 tax returns and other discrete items and a gain of \$81.7 million (after-tax) related to the sale of FactSet's Market Metrics business in July 2016.
- (6) Diluted EPS for fiscal 2016 includes the net effect of a \$2.01 increase in diluted EPS from the gain on sale and a \$0.25 increase in diluted EPS from the income tax benefits, partially offset by a \$0.08 decrease from the non-recurring items related primarily to legal matters, a \$0.05 decrease from the restructuring actions and a \$0.03 decrease from a change in the vesting of performance-based equity instruments.
- (7) Operating income in fiscal 2015 includes pre-tax charges of \$3.0 million related to the vesting of performance-based equity instruments and \$3.2 million primarily from changes in the senior leadership responsible for the Company's sales force.
- (8) Fiscal 2015 net income includes \$2.1 million (after-tax) of incremental expenses related to the vesting of performance-based equity instruments, \$2.2 million (after-tax) related to the changes in the senior leadership responsible for the Company's sales force and income tax benefits of \$8.8 million primarily from the reenactment of the U.S. Federal R&D Tax Credit in December 2014, finalizing the fiscal 2014 tax returns and other discrete items.

- (9) Diluted EPS for fiscal 2015 includes the net effect of a \$0.21 increase in diluted EPS from the income tax benefits partially offset by a \$0.05 decrease from the vesting of performance-based equity instruments and a \$0.05 decrease from the changes in the senior leadership responsible for the Company's sales force.
- (10) Operating income for fiscal 2013 includes pre-tax charges totaling \$18.3 million related to the vesting of performance-based stock options granted in connection with the acquisitions of Market Metrics and StreetAccount.
- (11) Fiscal 2013 net income includes \$12.9 million (after-tax) of incremental expenses related to the vesting of performance-based stock options granted in connection with the acquisitions of Market Metrics and StreetAccount and income tax benefits of \$7.2 million primarily from the reenactment of the U.S. Federal R&D Tax Credit in January 2013, and finalizing the fiscal 2012 tax returns.
- (12) Diluted EPS for fiscal 2013 includes the net effect of a \$0.29 decrease from the vesting of performance-based options, partially offset by a \$0.16 increase in diluted EPS from the income tax benefits.

ITEM 7. MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Management’s Discussion and Analysis of Financial Condition and Results of Operations (“MD&A”) is designed to provide a reader of our financial statements with a narrative from the perspective of our management on our financial condition, results of operations, liquidity and certain other factors that may affect our future results. Our MD&A is presented in the following sections:

- Executive Overview
- Key Metrics
- Results of Operations
- Liquidity
- Capital Resources
- Foreign Currency
- Off-Balance Sheet Arrangements
- Share Repurchase Program
- Contractual Obligations
- Dividends
- Significant Accounting Policies
- Critical Accounting Estimates
- New Accounting Pronouncements
- Market Trends
- Forward-Looking Factors

The MD&A should be read in conjunction with the Consolidated Financial Statements and related Notes included in Item 8, Financial Statements and Supplementary Data, of this Annual Report on Form 10-K.

Executive Overview

FactSet Research Systems Inc. (the “Company” or “FactSet”) provides integrated financial information and analytical applications to the global investment community. We deliver insight and information to financial investment professionals through our analytics, service, content, and technology. By integrating comprehensive datasets and analytics across asset classes with client data, we support the workflow of both buy-side and sell-side clients. These professionals include portfolio managers, wealth managers, research and performance analysts, risk managers, research professionals, investment bankers and fixed income professionals. From streaming real-time data to historical information, including quotes, estimates, news and commentary, FactSet offers unique and third-party content through desktop, wireless, and off-platform solutions. Our wide application suite offers tools and resources including company and industry analyses, full screening tools, portfolio analysis, risk profiles, alpha-testing, portfolio optimization and research management solutions. Our revenues are derived from subscriptions to products and services such as workstations, analytics, enterprise data and content, research management and trade execution. Investment management (buy-side) clients account for 84.1% of our annual subscription value and the remainder is derived from investment banking firms (sell-side) that perform mergers and acquisitions (“M&A”) advisory work, capital markets services and equity research.

2017 Year in Review

Fiscal 2017 results continued our positive topline growth. Organic revenue was up 6.9% while annual subscription value (“ASV”) increased 5.7% organically. This fiscal year marked our 39th year of operation, our 37th consecutive year of revenue growth and our 21st consecutive year of adjusted earnings growth as a public company. We have dedicated ourselves to helping our clients navigate an uncertain environment. As of August 31, 2017, ASV totaled \$1.32 billion, an increase of \$166.8 million over the prior year. In addition, clients and users reached new highs of 4,744 and 88,846, respectively, in fiscal 2017. We returned \$341.9 million to stockholders in the form of share repurchases and dividends.

In fiscal 2017, we continued to diversify our suite of products through strategic acquisitions and product investments, including Vermilion Holdings Limited (“Vermilion”) in the first quarter of fiscal 2017, along with both BI-SAM Technologies (“BISAM”) and Interactive Data Managed Solutions, renamed FactSet Digital Solutions, in the third quarter of fiscal 2017. These acquisitions increased FactSet’s footprint in Europe, added to the Company’s robust product offerings, and provided end-to-end solutions to clients.

As a testament to our broadening suite of premium products and the strength of our business and service model FactSet was awarded “Best Market Data Provider” and “Best Data Analytics Provider” by Inside Market Data in fiscal 2017. We were also named the “Best Performance Measurement System Provider” by Waters Technology and other recognition included “Best Research and Analytics Tool” award for our wealth management tools at the annual Systems in the City Awards. Portware also earned “Best Buy-side EMS” for the fourth time and Vermilion was recognized as “Best Client Reporting Solution” by FTF News Technology Innovation and “Best Client Reporting Solution” by WealthBriefing European Awards.

Client Service / Consultants

A client-centric approach has always been a key foundation of our success at FactSet. We support our powerful information and analytical applications with a team of financial data and modeling experts. Client satisfaction is a key metric by which we measure the success of our service. According to our fiscal 2017 global client satisfaction survey, 95% of respondents were satisfied or very satisfied with FactSet’s support, consistent with the prior year. The depth of our knowledge, the data behind the models and the complex mathematics behind the answers each create an opportunity for us to forge close working relationships with our user community.

Our industry-leading customer care is largely due to the talent of our employee population. As of August 31, 2017, employee headcount was 9,074, up 8.3% from a year ago. Excluding workforces acquired in fiscal 2017, headcount increased 2.4% from a year ago. The increases were primarily in client-focused positions focused on client loyalty as evidenced by an annual client retention rate of greater than 95% of ASV as of August 31, 2017. Our consulting teams have been trained to listen to our clients’ needs and transfer this knowledge directly to the product development teams, helping us transform suggestions into new or enhanced product offerings.

Educating our clients is also an important component of our service. Not only do we teach our users the nuances of our software and content offerings, but FactSet personnel are often thought-leaders in a particular area of financial modeling in our rapidly evolving industry. As a result, clients look to FactSet as a trusted partner to stay on the cutting edge of financial modeling and analysis. During fiscal 2017, over 2,500 clients attended live or online FactSet training sessions, with over 54,000 eLearning courses taken.

In May 2017, John W. Wiseman was named the Company’s new Executive Vice President, Global Head of Sales and Client Solutions. In this role, Mr. Wiseman reports directly to FactSet’s Chief Executive Officer, Phil Snow, and is responsible for all global sales and client service activities for the Company.

In order to optimize costs, we have invested in expanding our footprint and talent pool in India and the Philippines, where we now have a combined workforce of over 5,000 people. Of our total employees, 2,493 were located in the U.S., 1,322 in Europe and 5,259 in Asia Pacific. Approximately 70% of the Company’s employees were involved in company operations including content collection and software and systems engineering, 27% had a client focused role conducting sales and consulting services and the remaining 3% provided administrative support.

Key Metrics

The following is a review of our key metrics:

	As of and for the Year ended August 31,		
	2017	2016	Change
<i>(in millions, except per share data, client and user counts)</i>			
Revenues	\$ 1,221.2	\$ 1,127.1	8.3%
Operating Income	\$ 352.1	\$ 349.7	0.7%
Net Income	\$ 258.3	\$ 338.8	(23.8%)
Diluted EPS	\$ 6.51	\$ 8.19	(20.5)
Free Cash Flow ⁽¹⁾	\$ 283.7	\$ 283.4	0.1%
ASV	\$ 1,316.6	\$ 1,149.9	14.5% ⁽²⁾⁽³⁾
Clients	4,744	4,205	12.8% ⁽⁴⁾
Users	88,846	83,936	5.8% ⁽⁵⁾

⁽¹⁾ We define free cash flow as cash provided by operating activities, which includes the cash cost for taxes and changes in working capital, less capital expenditures. The presentation of free cash flow is not intended to be considered in isolation or as a substitute for the financial information prepared and presented in accordance with GAAP. We use free cash flow, a non-GAAP measure, both in presenting our results to stockholders and the investment community, and in our internal evaluation and management of the business. Management believes that this financial measure and the information we provide are useful to investors because they permit investors to view our performance using the same metric that we use to gauge progress in achieving our goals. Free cash flow is also an indication of cash flow that may be available to fund further investments in future growth initiatives.

⁽²⁾ ASV grew 5.7% organically year over year. Organic ASV excludes ASV from acquisitions and dispositions completed within the last 12 months and the effects of foreign currency.

⁽³⁾ In the third quarter of fiscal 2017, FactSet changed its ASV definition to exclude professional services as these fees are not subscription based.

⁽⁴⁾ In the second quarter of fiscal 2017, FactSet changed its client count definition to capture clients with ASV greater than \$10,000 versus the previous metric of clients with ASV greater than \$24,000. The prior year client count was restated to reflect this change for comparison purposes.

⁽⁵⁾ In the second quarter of fiscal 2017, FactSet changed its user count definition to account for users from workstations previously not captured due to certain product bundling and also users of the StreetAccount web product. The prior year user count was restated to reflect this change for comparison purposes.

Annual Subscription Value Growth

Annual subscription value at any given point in time represents the forward-looking revenues for the next twelve months from all subscription services currently being supplied to clients. With proper notice to us, our clients are able to add to, delete portions of, or terminate service at any time, subject to certain contractual limitations. Organic ASV excludes ASV from acquisitions and dispositions completed within the past 12 months and the effects of foreign currency. ASV totaled \$1.32 billion at August 31, 2017, up 5.7% organically over the prior year. The increase in ASV was driven by growth across the majority of our key workflows including Analytics, Investment Banking, and Content and Technology Solutions (“CTS”). Additionally, we have leveraged relationships with existing clients to increase year over year sales through cross-selling and upselling of our diversified product suite.

Buy-side clients accounted for 84.1% of ASV while the remainder derived from sell-side firms that perform mergers and acquisitions advisory work, capital markets services and equity research. The buy-side ASV experienced a growth rate of 5.9% compared to prior year, down 440 basis points from fiscal 2016. The sell-side ASV had a 4.6% growth rate, down 310 basis points from the prior year.

ASV from our U.S. operations was \$825.1 million for the fourth quarter of 2017, up 4.9% organically from a year ago. International ASV totaled \$491.5 million, up 7.7% organically from a year ago. ASV from our international operations represented 37.3% of our Company-wide total, its highest level in FactSet history. Our European organic ASV achieved a growth rate of 6.1% over the last 12 months while Asia Pacific organic ASV grew by 12.8%. This substantial shift in ASV to international operations was due primarily to our recent acquisitions, which have significant sales and operations in Europe.

Client and User Additions

In the second quarter of fiscal 2017, FactSet changed its client count definition to capture clients with ASV greater than \$10,000 versus the previous metric of clients with ASV greater than \$24,000. The prior year client count was restated to reflect this change for comparison purposes. Our total client count was 4,744 as of August 31, 2017 representing an increase of 539 net new clients or an equivalent 12.8% increase over fiscal 2016, as a result of cross-selling within FactSet’s diverse product suite. We continue to focus on expanding our current client base as it is essential to our long-term growth strategy and encourages incremental sales growth of workstations, applications and content at our existing clients.

In the third quarter of fiscal 2017, FactSet changed its user count definition to account for users from workstations previously not captured due to certain product bundling and also users of the StreetAccount web product. The prior year user count was restated to reflect this change for comparison purposes. Using the new definition, as of August 31, 2017, there were 88,846 professionals using FactSet, an increase of 4,910 users or an equivalent 5.8% increase compared to fiscal 2016.

Annual client retention as of August 31, 2017, was greater than 95% ASV and 91% when expressed as a percentage of clients, down slightly from 92% in the prior year. Our retention success, demonstrating that a majority of our clients maintain their subscriptions to FactSet year over year, highlights the strength of our business model. August 31, 2017, our largest individual client accounted for 2% of total subscriptions, and annual subscriptions from our ten largest clients did not surpass 15% of total client subscriptions, consistent with August 31, 2016.

Returning Value to Stockholders

We repurchased 1.6 million shares for \$252.8 million during fiscal 2017 under the our existing share repurchase program. On March 27, 2017, the Board of Directors of FactSet approved a \$300.0 million expansion of to the existing share repurchase program. Including this expansion, \$244.1 million is available for future share repurchases as of August 31, 2017.

On May 5, 2017, our Board of Directors approved a 12.0% increase in the regular quarterly dividend, beginning with the dividend payment on June 2017, with an increase to \$0.56 per share, or \$2.24 per share per annum. Over the last 12 months, we have returned a total of \$341.9 million to stockholders in the form of dividends and share repurchases, funded by cash generated from operations.

On July 1, 2016, we entered into an accelerated share repurchase agreement (“ASR Agreement”) to repurchase \$120.0 million of our common stock. We received 595,607 shares of common stock on July 5, 2016, which was approximately 80% of the total number of shares of common stock expected to be repurchased under the ASR Agreement. The final settlement of the ASR Agreement occurred in the first quarter of fiscal 2017 with FactSet receiving an additional 102,916 shares of our common stock.

Capital Expenditures

Capital expenditures were \$36.9 million during fiscal 2017, down from \$47.7 million a year ago. Approximately \$21.4 million, or 58%, of our capital expenditures was primarily for purchases of more servers for our existing data centers, additional laptop computers and peripherals for new employees, upgrades to existing computer systems and improvements to our telecommunication equipment. The remainder of our capital expenditures was primarily for the build out of office space including \$4.4 million at our Chicago location, \$4.4 million at our New York locations and \$2.7 million at our India locations.

Results of Operations

For an understanding of the significant factors that influenced our performance during the past three fiscal years, the following discussion should be read in conjunction with the Consolidated Financial Statements and the Notes to Consolidated Financial Statements presented in this Annual Report on Form 10-K.

<i>(in thousands, except per share data)</i>	Years ended August 31,					
	2017	2016	Change	2016	2015	Change
Revenues	\$ 1,221,179	\$ 1,127,092	8.3%	\$ 1,127,092	\$ 1,006,768	12.0%
Cost of services	\$ 566,580	\$ 487,409	16.2%	\$ 487,409	\$ 405,339	20.2%

Operating income	\$ 352,135	\$ 349,676	0.7%	\$ 349,676	\$ 331,918	5.4%
Net income	\$ 258,259	\$ 338,815	NM	\$ 338,815	\$ 241,051	NM
Diluted earnings per common share	\$ 6.51	\$ 8.19	NM	\$ 8.19	\$ 5.71	NM
Diluted weighted average common shares	39,642	41,365		41,365	42,235	

Revenues

Fiscal 2017 compared to Fiscal 2016

Revenues in fiscal 2017 were \$1,221.2 million, up 8.3% compared to fiscal 2016. The increase in revenue was primarily driven by organic ASV growth, continued momentum for our multi-asset class analytic solutions, workstations, data feeds products and the additions to our product offerings from our fiscal 2017 acquisitions. We have seen an increase in new business with

solid wins from plan sponsors, hedge funds and wealth managers, as well as growing sales to existing clients through cross-selling opportunities. Our recent acquisitions have also given rise to higher revenues from professional services fees. Offsetting these positive factors, we experienced cancellations due to firm consolidations and failures. Excluding the effects of acquisitions and dispositions completed in the last 12 months and foreign currency, our organic revenue growth rate for fiscal 2017 was 6.9%.

Fiscal 2016 compared to Fiscal 2015

Revenues in fiscal 2016 were \$1,127.1 million, up 12.0% compared to fiscal 2015. Our revenue growth drivers during fiscal 2016 were robust demand for our analytics suite of products, including an expansion of our multi-asset class value added products, accelerated growth in our CTS, advancement in Workstation Solutions and significant progress in the Portware LLC ("Portware") business, partially offset by the impact of foreign currency.

Revenues by Geographic Region

<i>(in thousands)</i>	Years ended August 31,		
	2017	2016	2015
U.S.	\$ 784,146	\$ 755,492	\$ 678,774
<i>% of revenues</i>	64.2%	67.0%	67.4%
Europe	\$ 330,332	\$ 277,682	\$ 251,522
Asia Pacific	106,701	93,918	76,472
International	\$ 437,033	\$ 371,600	\$ 327,994
<i>% of revenues</i>	35.8%	33.0%	32.6%
Consolidated	\$ 1,221,179	\$ 1,127,092	\$ 1,006,768

Fiscal 2017 compared to Fiscal 2016

Revenues from our U.S. segment increased 3.8% to \$784.1 million in fiscal 2017 compared to \$755.5 million in fiscal 2016. Our U.S. revenue growth reflects the performance of our analytic solutions, CTS, as well as revenue from our recent acquisitions. Excluding the effects of acquisitions and dispositions completed in the last 12 months, organic revenues in the U.S. were up 6.2% compared to fiscal 2016. Revenues from our U.S. operations accounted for 64.2% of our consolidated revenues during fiscal 2017, a decrease from 67.0% in the prior year as our recent acquisitions have mainly increased international revenue.

European revenues grew 19.0% year over year, which was attributable to solid growth in CTS, analytics, client price increases, and our recent acquisitions. Foreign currency exchange rate fluctuations reduced our European growth rate by 40 basis points. Excluding the effects of acquisitions and dispositions completed in the last 12 months and foreign currency, European revenues grew 8.3% compared to fiscal 2016.

The Asia Pacific revenue growth rate of 13.6% was primarily due to increased subscriptions to our content, PA and core workstation product offerings. Additionally, foreign currency exchange rate fluctuations increased our Asia Pacific growth rate by 46 basis points. Excluding the effects of acquisitions and dispositions completed in the last 12 months and foreign currency, Asia Pacific revenues grew 12.7% compared to fiscal 2016.

Fiscal 2016 compared to Fiscal 2015

Revenues from our U.S. segment increased 11.3% to \$755.5 million in fiscal 2016 compared to \$678.8 million in fiscal 2015. Our fiscal 2016 U.S. revenue growth rate of 11.3% reflects increases in the number of users and clients of FactSet within the U.S., predominantly at buy-side hedge fund and middle-market clients. Additionally, we recognized \$21.9 million of incremental revenue from the acquisition of Portware. Revenues from our U.S. operations accounted for 67.0% of our consolidated revenues during fiscal 2016, down from 67.4% in fiscal 2015, as our international ASV growth rate surpassed our U.S. ASV growth rate by 200 basis points.

European revenues advanced 10.4% year over year which was attributable to increases in client and user counts, increased sales of PA subscriptions and incremental Portware revenues of \$7.3 million, partially offset by the negative effects of foreign currency. Foreign currency exchange rate fluctuations reduced our European growth rate by 30 basis points.

The Asia Pacific revenue growth rate of 22.8% was primarily due to an increase in the number of workstations, advancement in our multi-asset class risk and analytics, as well positive growth in our fee business. Portware contributed \$4.1 million in sales since its acquisition in fiscal 2016. Additionally, foreign currency exchange rate fluctuations increased our Asia Pacific growth rate by 90 basis points.

Operating Expenses

(in thousands)	Years ended August 31,		
	2017	2016	2015
Cost of services	\$ 566,580	\$ 487,409	\$ 405,339
Selling, general and administrative ("SG&A")	302,464	290,007	269,511
Total operating expenses	\$ 869,044 ⁽¹⁾	\$ 777,416 ⁽²⁾	\$ 674,850 ⁽³⁾
Operating income	\$ 352,135	\$ 349,676	\$ 331,918
Operating Margin	28.8%	31.0%	33.0%

⁽¹⁾ Total operating expenses in fiscal 2017 include \$5.0 million from restructuring actions initiated by the Company, \$5.6 million related to a change in the vesting of performance-based stock options, and \$7.5 million of acquisition-related costs. Of this total, \$11.8 million was reported within SG&A expenses with the remainder in cost of services.

⁽²⁾ Total operating expenses in fiscal 2016 include \$4.6 million related primarily to legal matters, \$2.8 million from restructuring actions initiated by the Company and \$1.8 million related to a change in the vesting of performance-based stock options. Of this total, \$6.0 million was reported within SG&A expenses with the remainder in cost of services.

⁽³⁾ Total operating expenses in fiscal 2015 include an incremental \$3.0 million from the vesting of performance-based equity instruments and \$3.2 million related to changes in the senior leadership responsible for the Company's sales force. Of this total, \$3.8 million was reported within SG&A expenses with the remainder in cost of services.

Cost of Services

Fiscal 2017 compared to Fiscal 2016

Cost of services increased 16.2% to \$566.6 million compared to the same period a year ago. Expressed as a percentage of revenues, cost of services was 46.4% in fiscal 2017, an increase of 320 basis points from a year ago. The increase was primarily driven by higher employee compensation, including stock-based compensation, computer related expenses, amortization of intangibles and acquisition-related costs.

Employee compensation, including stock-based compensation, when expressed as a percentage of revenues increased 200 basis points in fiscal 2017 compared to fiscal 2016. Over the past 12 months, we have added 699 new employees, which includes head count expansion from our recent acquisitions of 498 new employees (primarily in the European segment), as well as base salary changes and incremental hires in our centers of excellence located in India and the Philippines. This increase was also due to new employees hired in the past year, of which a significant number are involved with content collection, engineering and product development, as we continue to focus on servicing our existing client base, expanding our content and improving our applications. As of August 31, 2017, approximately 70% of our employee based performed operational roles. Employee compensation also increased due to a non-recurring charge of \$5.9 million related to restructuring actions initiated by the Company and a change in the vesting of performance-based stock options.

Computer related expenses, which include depreciation, maintenance, software and other fees increased 30 basis points, when expressed as a percentage of revenues, in fiscal 2017 compared to fiscal 2016 due to expenses and depreciation associated with additional laptop computers and peripherals for new employees, upgrades to existing computer systems and improvements to our telecommunication equipment. Amortization of intangible assets increased 30 basis points, when expressed as a percentage of revenues, in fiscal 2017 compared to fiscal 2016 primarily due to our fiscal 2017 acquisitions, which added approximately \$93.2 million of intangible assets to be amortized over a weighted-average life of 11.5 years. Additionally, acquisition-related costs increased cost of sales by approximately 40 basis points when expressed as a percentage of revenue year over year.

Fiscal 2016 compared to Fiscal 2015

Cost of services increased 20.2% to \$487.4 million in fiscal 2016 as compared to fiscal 2015. Expressed as a percentage of revenues, cost of services was 43.2% in fiscal 2016, an increase of 290 basis points from fiscal 2015. The increase was primarily driven by higher employee compensation, including stock-based compensation, amortization of intangibles and computer-related expenses.

Employee compensation, including stock-based compensation, when expressed as a percentage of revenues increased 230 basis points in fiscal 2016 compared to fiscal 2015. This increase was primarily due to new employees hired in the past year. In fiscal 2016, we have added 604 net new employees involved with content collection and 266 net new engineering and product development employees, as we continue to focus on servicing our existing client base, expanding our content and improving our applications. The increase in employee headcount includes 123 employees added from the Portware acquisition in cost of sales related roles. Amortization of acquired intangible assets, when expressed as a percentage of revenues, increased 50 basis points in fiscal 2016 compared to fiscal 2015 primarily due to the addition of \$75.5 million of intangible assets related to the acquisition of Portware. Computer-related expenses, which include depreciation, maintenance, software

and other fees, increased 40 basis points when expressed as a percentage of revenues, as we require additional computer hardware and peripherals for new employees, upgrades to existing computer systems and the development of new internal systems to support our growing infrastructure.

Selling, General and Administrative

Fiscal 2017 compared to Fiscal 2016

SG&A expenses increased 4.3% to \$302.5 million during fiscal 2017 compared to \$290.0 million in fiscal 2016. Expressed as a percentage of revenues, SG&A expenses decreased 90 basis points to 24.8% in fiscal 2017 primarily due to lower employee compensation expense partially offset by higher professional fees and occupancy costs, including rent expense and depreciation of furniture and fixtures. Additionally, fiscal 2016 included a non-recurring charge of \$3.3 million related primarily to legal matters.

Employee compensation, including stock-based compensation, when expressed as a percentage of revenues decreased 160 basis points from a year ago due to a continued shift in our employee base from SG&A to cost of service related roles. This decrease in employee compensation was offset by a non-recurring charge of \$4.4 million related to restructuring actions initiated by the Company and a change in the vesting of performance-based stock options. Professional fees, expressed as a percentage of revenues, increased 30 basis points from costs associated with acquisitions in the fiscal 2017. Occupancy costs, when expressed as a percentage of revenue, increased 30 basis points due to the increase in the worldwide-leased office space of 71,000 square feet including new or expanded offices in Germany, Switzerland, Bulgaria, India and the Netherlands.

Fiscal 2016 compared to Fiscal 2015

SG&A expenses increased 7.6% to \$290.0 million during fiscal 2016 compared to \$269.5 million in fiscal 2015. Expressed as a percentage of revenues, SG&A expenses decreased 110 basis points to 25.7% in fiscal 2016 primarily due to lower employee compensation and lower occupancy costs, which include depreciation of furniture and fixtures, partially offset by expenses related to non-recurring legal matters and higher marketing costs.

Employee compensation, including stock-based compensation, when expressed as a percentage of revenues decreased 150 basis points compared to fiscal 2015 due to a higher percentage of our employee base working in a cost of services capacity compared to an SG&A role. Of our total employee headcount increase in fiscal 2016 compared to fiscal 2015, only 14% were in SG&A related roles, including 43 employees from the Portware acquisition. Additionally, approximately 142 employees in SG&A related roles left the Company as part of the sale of the Market Metrics business in July 2016. As such, employee compensation classified as SG&A expense declined compared to the growth in cost of services. Occupancy costs, when expressed as a percentage of revenues, decreased 20 basis points, primarily due to furniture and leasehold improvements becoming fully depreciated. The Company incurred approximately \$3.3 million in non-recurring expenses in fiscal 2016 related primarily to legal matters. Marketing expenses increased \$1.2 million year over year driven by incremental branding and advertising costs.

Operating Income and Operating Margin

Fiscal 2017 compared to Fiscal 2016

Operating income increased 0.7% to \$352.1 million in fiscal 2017 compared to the prior year. Our operating margin for fiscal 2017 was 28.8%, down from 31.0% a year ago. Expenses related to employee compensation, professional fees, computer related costs, amortization of intangibles and acquisition-related costs all increased in fiscal 2017, resulting in our total operating expenses increasing 11.8% year over year. We also recognized non-recurring charges of approximately \$18.0 million related to restructuring actions initiated by the Company, a change in the vesting of performance-based stock options and other acquisition-related costs, compared to non-recurring charges of approximately \$7.0 million in the prior fiscal year. The higher expenses were offset partially by a year over year increase in revenues of 8.3%, driven partially by our recent acquisitions.

Fiscal 2016 compared to Fiscal 2015

Operating income increased 5.4% to \$349.7 million in fiscal 2016 compared to fiscal 2015. Our operating margin for fiscal 2016 was 31.0%, down from 33.0% in fiscal 2015. The lower operating margin was primarily due to Portware's operations, which reduced our operating margin by 120 basis points in fiscal 2016. Additionally, higher employee compensation, including stock-based compensation, reduced our operating margin collectively by 90 basis points. In fiscal 2016, we also incurred non-recurring charges of approximately \$4.6 million related primarily to legal matters. Offsetting these drivers was organic revenue growth of 9.9% and lower occupancy costs.

Operating Income by Segment

(in thousands)	Years ended August 31,		
	2017	2016	2015
U.S.	\$ 137,105	\$ 165,251	\$ 172,980
Europe	153,676	131,410	116,310
Asia Pacific	61,354	53,015	42,628
Consolidated	\$ 352,135	\$ 349,676	\$ 331,918

Our operating segments are aligned with how we manage the business and the demographic markets in which we serve and how the chief operating decision maker assesses performance. Our internal financial reporting structure is based on three reportable segments, the U.S., Europe and Asia Pacific. This structure helps us better manage the business and view the markets we serve. Sales, consulting, data collection, product development and software engineering are the primary functional groups within each segment. Each segment records compensation expense, including stock-based compensation, amortization of intangible assets, depreciation of furniture and fixtures, amortization of leasehold improvements, communication costs, professional fees, rent expense, travel, marketing, office and other direct expenses. Expenditures associated with our data centers, third party data costs and corporate headquarters charges are recorded by the U.S. segment and are not allocated to the other segments. The content collection centers located in India and the Philippines benefit all of our segments, so the expenses incurred at these locations are allocated to each segment based on a percentage of revenues.

Fiscal 2017 compared to Fiscal 2016

U.S. operating income decreased 17.0% to \$137.1 million during fiscal 2017 compared to \$165.3 million a year ago. The decrease in U.S. operating income is primarily due to increases in expenses related to employee compensation, and occupancy costs, partially offset by revenue growth of 3.8%. Employee compensation increased primarily due to a 3.6% increase in the U.S. employee headcount year over year and a change in the vesting of performance-based stock options. Occupancy costs including rent expense and depreciation of furniture and fixtures increased due primarily to an increase in rent expense at our New York location.

European operating income increased 16.9% to \$153.7 million during fiscal 2017 compared to \$131.4 million a year ago. The increase in European operating income was due to revenue growth of 19.0% and benefits from a stronger U.S. dollar, offset by higher employee compensation, occupancy costs, and amortization of intangibles. European revenues grew due to recent acquisitions, which have a significant sales presence in European markets. The impact of foreign currency increased European operating income by \$6.2 million year over year. Employee compensation was higher year over year as a result of 473 net new employees in our European offices in the last 12 months. These employees are primarily from our recent acquisition of FactSet Digital Solutions, which is headquartered in Germany. Occupancy costs including rent expense and depreciation of furniture and fixtures increased due primarily to an increase in rent expense in Germany associated with the 2017 acquisitions. Amortization of intangibles increased due to the addition of approximately \$93.2 million of intangibles in the current year, the majority of which reside in our European segment.

Asia Pacific operating income increased 15.7% to \$61.4 million during fiscal 2017 compared to \$53.0 million a year ago. The increase in Asia Pacific operating income was due to revenue growth of 13.6% and benefits from a stronger U.S. dollar, partially offset by increases in employee compensation and occupancy costs. Employee compensation was higher year over year as a result of a 2.7% increase in our Asia Pacific workforce in the last 12 months. Occupancy costs increased due primarily to an increase in rent expense at our India locations. The impact of foreign currency increased Asia Pacific operating income by \$1.4 million year over year.

Fiscal 2016 compared to Fiscal 2015

U.S. operating income decreased 4.5% to \$165.3 million during fiscal 2016 compared to \$173.0 million during fiscal 2015. The decrease in U.S. operating income is attributed to employee compensation growth, non-recurring charges of \$4.4 million and \$8.3 million of incremental amortization expense from Portware, partially offset by revenue growth of 11.3%. Employee compensation increased primarily due to a 7.6% increase in the U.S. employee headcount year over year. The non-recurring charges were related primarily to legal matters.

European operating income increased 13.0% to \$131.4 million during fiscal 2016 compared to \$116.3 million during fiscal 2015. The increase in European operating income was due to revenue growth of 10.4% and benefits from a stronger U.S. dollar. The impact of foreign currency increased European operating income by \$5.1 million year over year.

Asia Pacific operating income increased 24.4% to \$53.0 million during fiscal 2016 compared to \$42.6 million during fiscal 2015. The increase in Asia Pacific operating income was due to revenue growth of 22.8% and benefits from a stronger U.S. dollar, partially offset by increases in employee compensation. The impact of foreign currency increased Asia Pacific operating income by \$6.5 million year over year. Employee compensation increased due to a 19.3% increase in the Asia Pacific employee headcount year over year.

Income Taxes, Net Income and Diluted Earnings per Share

<i>(in thousands)</i>	Years ended August 31,		
	2017	2016	2015
Provision for income taxes	\$ 86,053	\$ 122,178	\$ 92,703
Net income	\$ 258,259	\$ 338,815	\$ 241,051
Diluted earnings per common share	\$ 6.51	\$ 8.19	\$ 5.71

Income Taxes

Fiscal 2017 compared to Fiscal 2016

The fiscal 2017 provision for income taxes was \$86.1 million, down 29.6% from the same period a year ago. This decrease was primarily due to tax expense of \$30.8 million related to the gain on sale of our Market Metrics business in the fourth quarter of fiscal 2016. Excluding the tax impact of the gain, the provision for income taxes decreased by 5.9% year over year related primarily to our organizational realignment. Effective September 1, 2016 we realigned certain aspects of our global operations from FactSet Research Systems Inc., our U.S. parent company, to FactSet UK Limited, a U.K. operating company, to better position us to serve our growing client base outside the U.S. Due to the realignment we recognized a 200 basis point benefit in our annual tax rate. Additionally, excluding the gain on sale in the prior year, our provision for income taxes decreased due to a decrease in taxable income year over year. This decrease was due primarily to higher interest expense incurred as a result of an increase in our outstanding debt borrowings by approximately \$300 million.

Fiscal 2016 compared to Fiscal 2015

The fiscal 2016 provision for income taxes was \$122.2 million, up 31.8% compared to fiscal 2015. In the fourth quarter of fiscal 2016, the Company recognized tax expense of \$30.8 million related to the gain on sale of our Market Metrics business. Excluding tax expense from the gain, the provision for income taxes was \$91.4 million in fiscal 2016, a decrease of 1.4% from fiscal 2015, primarily due to income tax benefits from the permanent reenactment of the U.S. Federal R&D Tax Credit in December 2015, finalizing prior year tax returns and other discrete items. Overall, we recognized income tax benefits of \$10.5 million in fiscal 2016 compared to \$6.5 million in the same period in fiscal 2015. Offsetting the tax benefits and excluding the gain on sale was an increase in taxable income of \$14.8 million.

Net Income and Diluted Earnings per Share

Fiscal 2017 compared to Fiscal 2016

Net income decreased 23.8% to \$258.3 million and diluted earnings per share decreased 20.5% to \$6.51 during fiscal 2017 compared to fiscal 2016. A large component of the decrease in net income and diluted earnings per share year over year related to the after-tax gain of \$81.7 million from the sale of the Market Metrics business in fiscal 2016. This gain increased diluted earnings per share by \$2.01. Excluding the prior year after-tax gain on sale, net income increased 0.4% year over year, while diluted EPS increased by 5.3%. During fiscal 2017, net income and earnings per share increased due to revenue growth of 8.3% year over year, couple with a reduction to the income tax provision of 29.6% primarily related to the gain from the sale of our Market Metrics business along with an organizational realignment. Additionally, during fiscal 2017, foreign currency movements increased operating income by \$7.1 million compared to a benefit of \$11.6 million in the same period of fiscal 2016. These increases were partially offset by incremental employee compensation expense due to the hiring of 699 net new employees (including 498 employees from acquisitions completed in the last 12 months), an increase in professional fees, occupancy costs, computer related expenses, amortization of intangibles and acquisition-related costs. The increase in diluted earnings per share was also driven by a decrease in diluted shares outstanding as a result of continued share repurchases in fiscal 2017.

Fiscal 2016 compared to Fiscal 2015

Net income increased 40.6% to \$338.8 million and diluted earnings per share increased 43.4% to \$8.19 during fiscal 2016 compared to fiscal 2015. A large component of the increase in net income and diluted earnings per share during fiscal 2016

was an after-tax gain of \$81.7 million related to the sale of the Market Metrics business. The gain increased diluted earnings per share by \$2.01. Excluding the after-tax gain on sale, net income increased 6.7% in fiscal 2016 compared to fiscal 2015, while diluted EPS was \$6.18. The increase year over year was primarily due to organic ASV growth of 8.8% and tax benefits of \$10.5 million related to the permanent reenactment of the U.S. Federal R&D tax credit and finalizing the fiscal 2015 tax returns and other discrete items. These increases were partially offset by incremental employee compensation expense due to the hiring of 1,015 net new employees (including 166 employees from acquisitions completed in fiscal 2016). Additionally, Portware's operations reduced our operating margin by 120 basis points in fiscal 2016. In fiscal 2016 we also incurred non-recurring charges of approximately \$3.3 million, after-tax, related primarily to legal matters. During fiscal 2016, foreign currency movements increased operating income by \$11.6 million compared to a benefit of \$11.2 million in the same period of fiscal 2015.

Liquidity

The table below, for the periods indicated, provides selected cash flow information:

	Years ended August 31,		
	2017	2016	2015
<i>(in thousands)</i>			
Net cash provided by operating activities	\$ 320,527	\$ 331,140	\$ 306,442
Capital expenditures ⁽¹⁾	(36,862)	(47,740)	(25,682)
Free cash flow ⁽²⁾	\$ 283,665	\$ 283,400	\$ 280,760
Net cash used in investing activities	\$ (347,306)	\$ (158,408)	\$ (64,877)
Net cash used in financing activities	\$ (8,161)	\$ (91,002)	\$ (187,326)
Cash and cash equivalents at end of year	\$ 194,731	\$ 228,407	\$ 158,914

⁽¹⁾ Included in net cash used in investing activities during each fiscal year reported.

⁽²⁾ We define free cash flow as cash provided by operating activities, which includes the cash cost for taxes and changes in working capital, less capital expenditures.

Fiscal 2017 compared to Fiscal 2016

Cash and cash equivalents aggregated to \$194.7 million, or 13.8% of our total assets at August 31, 2017, compared with \$228.4 million, or 22.4% of our total assets at August 31, 2016. Our cash and cash equivalents decreased \$33.7 million during fiscal 2017 due primarily to \$303.1 million in cash paid for acquisitions (net of cash acquired), \$252.8 million in share repurchases under the existing share repurchase program, dividend payments of \$80.9 million, capital expenditures of \$36.9 million and \$7.4 million from the purchase of investments (net of proceeds). These cash outflows were partially offset by cash provided by operations of \$320.5 million, \$275.0 million in net proceeds from long-term debt, \$50.0 million in proceeds from the exercise of employee stock options, \$10.3 million in tax benefits from share-based payment arrangements and \$1.3 million from the effects of foreign currency fluctuation.

Free cash flow for fiscal 2017 was \$283.7 million compared to \$283.4 million in the prior year comparable period. Free cash flow generated during fiscal 2017 was attributable to \$258.3 million of net income adjusted for \$78.3 million of non-cash items partially offset by \$36.9 million in capital expenditures and \$16.0 million of negative working capital changes. Free cash flow increased slightly from the comparable year ago period, due primarily to a reduction in capital expenditures partially offset by a decrease in net cash provided by operating activities. The decrease in net cash provided by operating activities was the result of higher client receivables and the timing of taxes payments. Our day's sales outstanding ("DSO") was 41 days as of August 31, 2017, representing an increase from 31 days at August 31, 2016. The increase in DSO was primarily related to our recent acquisitions as we work to align their collection policies with those of FactSet.

Net cash used in investing activities was \$347.3 million in fiscal 2017, representing a \$188.9 million increase from fiscal 2016 due primarily to an increase in the cash used in acquisitions and the purchases of investments (net of proceeds), partially offset by a decrease in capital expenditures. Additionally, in fiscal 2016 we recognized proceeds from the sale of our Market Metrics business of \$153.1 million. Acquisitions during fiscal 2017, largely related to BISAM and Vermilion, resulted in a cash outflow of \$303.1 million compared to a net cash outflow of \$262.9 million for the Portware acquisition during fiscal 2016. Purchase of investments (net of proceeds) results in an increased cash outflow of \$6.5 million in fiscal 2017 compared to fiscal 2016. The decrease in capital expenditures of \$10.9 million was due fiscal 2016 including the fit-out of new space in New York, Chicago and at our corporate headquarters in Norwalk. Fiscal 2017 capital expenditures related primarily to computer equipment for our U.S. locations and additional expenses at our Chicago, New York, and India locations.

During fiscal 2017, net cash used in financing activities was \$8.2 million compared to \$91.0 million in fiscal 2016. This decrease was due primarily to FactSet entering into an ASR Agreement to repurchase \$120.0 million of our common stock in

July 2016. We received 595,607 shares of common stock on July 5, 2016, which was approximately 80% of the total number of shares of common stock expected to be repurchased under the ASR Agreement. The final settlement of the ASR Agreement occurred in the first quarter of fiscal 2017 with us receiving an additional 102,916 shares of our common stock. Excluding cash used in the ASR Agreement, cash provided by financing activities in fiscal 2016 was \$29.0 million, resulting in a fluctuation of \$37.2 million in the current year. This fluctuation was due to an increase in cash used to repurchase common stock under our existing share repurchase program of \$24.2 million, an increase in payments of regular quarterly dividends of \$6.7 million, lower proceeds from employee stock plans of \$6.8 million and lower tax benefits from share-based payment arrangements of \$7.9 million. Cash used in share repurchases increased year over year as we repurchased 1.6 million shares for \$252.8 million under the existing share repurchase program compared to 1.5 million shares for \$232.3 million in fiscal 2016. Dividend payments increased as our Board of Directors approved a 12.0% increase in the regular quarterly dividend to \$0.56 per share, or \$2.24 per share per annum, beginning with the dividend payment in June 2017. The year over year fluctuation was also due to additional borrowings under our 2017 Credit Agreement (defined in *Capital Needs*) of \$575.0 million, used to fund our acquisition of BISAM on March 17, 2017 and retire our existing debt of \$365.0 million. In fiscal 2016 we borrowed \$265.0 million under our previous credit agreement to fund our acquisition of Portware on October 16, 2015. Refer to the *Capital Resources* section of the MD&A for a discussion of our long-term debt borrowings.

We expect that for at least the next 12 months, our operating expenses will continue to constitute a significant use of our cash. As of August 31, 2017, our total cash and cash equivalents worldwide was \$194.7 million, with \$575.0 million in outstanding borrowings. Approximately \$17.8 million of our total available cash and cash equivalents is held in bank accounts located within the U.S., \$141.2 million in Europe (predominantly within the UK, France, and Germany) and the remaining \$35.7 million is held in the Asia Pacific region. As of August 31, 2017, we believe our liquidity (including cash on hand, cash from operating activities and other cash flows that we expect to generate) within each geographic segment will be sufficient to meet our short-term and long-term operating requirements, as they occur, including working capital needs, capital expenditures, dividend payments, stock repurchases, growth objectives and other financing activities. In addition, we expect existing foreign cash, cash equivalents and cash flows from operations to continue to be sufficient to fund our foreign operating activities and cash commitments for investing activities, such as capital expenditures, for at least the next 12 months and thereafter for the foreseeable future.

Fiscal 2016 compared to Fiscal 2015

Cash and cash equivalents aggregated to \$228.4 million, or 22.4% of our total assets at August 31, 2016, compared with \$158.9 million, or 21.6% of our total assets at August 31, 2015. Our cash and cash equivalents increased \$69.5 million during fiscal 2016 due to cash provided by operations of \$331.1 million, \$153.1 million in proceeds from the sale of our Market Metrics business, \$56.9 million in proceeds from the exercise of employee stock options, \$265.0 million in proceeds from long-term debt and \$18.2 million in tax benefits from share-based payment arrangements. These cash inflows were partially offset by \$262.9 million in cash paid to acquire Portware, \$356.8 million in share repurchases, dividend payments of \$74.2 million, capital expenditures of \$47.7 million and purchases of investments, net of proceeds, of \$0.9 million.

Free cash flow for fiscal 2016 was \$283.4 million. Free cash flow generated during fiscal 2016 was attributable to \$338.8 million of net income, including an after-tax gain on sale of \$81.7 million, \$50.6 million of positive working capital changes and \$58.3 million in non-cash expenses less \$47.7 million in capital expenditures. Free cash flow generated in fiscal 2016 was up \$2.6 million from the comparable year ago period due to higher levels of net income and the timing of payables and accrued compensation, offset by incremental capital expenditures.

Net cash used in investing activities was \$158.4 million in fiscal 2016, representing a \$93.5 million increase from fiscal 2015. This increase was primarily due to our acquisition of Portware in the first quarter of fiscal 2016 which resulted in a net cash outflow of \$262.9 million compared to a net cash outflow of \$34.8 million for acquisitions occurring in fiscal 2015. Additionally, cash used in investing activities increased year over year due to an increase in capital expenditures, primarily due to the fit-out of new space in New York, Chicago and the expansion of our corporate headquarters in Norwalk. These cash outflows were partially offset by net proceeds of \$153.1 million from the sale of our Market Metrics business and an increase in proceeds from the sales of investments (net of purchases) of \$3.5 million year over year.

During fiscal 2016, net cash used in financing activities was \$91.0 million compared to \$187.3 million in fiscal 2015. The year over year decrease in cash used was primarily due to proceeds from long-term debt of \$265.0 million, offset by an increase in cash used in share repurchases of \$100.6 million, lower proceeds and tax benefits from stock options exercised of \$25.4 million, and an increase in payments of regular quarterly dividends of \$7.7 million. The proceeds from long-term debt related to additional borrowings under our previous credit agreement used to fund our acquisition of Portware on October 16, 2015. Cash used in share repurchases increased year over year as we repurchased 1.5 million shares for \$232.3 million under the existing share repurchase program and 0.6 million shares for \$120.0 million related to the ASR Agreement entered into in July 2016. We repurchased 1.7 million shares for \$252.8 million in fiscal 2015 under the existing share repurchase program.

Dividend payments increased as our Board of Directors approved a 13.6% increase in the regular quarterly dividend to \$0.50 per share, or \$2.00 per share per annum, beginning with the dividend payment in June 2016.

Capital Resources

Capital Expenditures

Capital expenditures were \$36.9 million during fiscal 2017, down from \$47.7 million a year ago. Approximately \$21.4 million, or 58%, of our capital expenditures was primarily for purchases of more servers for our existing data centers, additional laptop computers and peripherals for new employees, upgrades to existing computer systems and improvements to our telecommunication equipment. The remainder of our capital expenditures was primarily for the build out of office space including \$4.4 million at our Chicago location, \$4.4 million at our New York locations and \$2.7 million at our India locations.

Capital expenditures were \$47.7 million during fiscal 2016, up from \$25.7 million in fiscal 2015. Approximately \$27.7 million, or 58%, of our capital expenditures related to the build out of office space including \$15.1 million at our New York location, \$3.9 million at our Chicago location and \$1.4 million at our corporate headquarters in Norwalk. The remainder of our capital expenditures was primarily for purchases of more servers for our existing data centers, additional laptop computers and peripherals for new employees, upgrades to existing computer systems and improvements to our telecommunication equipment.

Capital Needs

Long-Term Debt

On March 17, 2017, the Company entered into a Credit Agreement (the "2017 Credit Agreement") between FactSet, as the borrower, and PNC Bank, National Association ("PNC"), as the administrative agent and lender. The 2017 Credit Agreement provides for a \$575.0 million revolving credit facility (the "2017 Revolving Credit Facility"). We may request borrowings under the 2017 Revolving Credit Facility until its maturity date of March 17, 2020. The 2017 Credit Agreement also allows FactSet, subject to certain requirements, to arrange for additional borrowings with PNC for an aggregate amount of up to \$225.0 million, provided that any such request for additional borrowings must be in a minimum amount of \$25.0 million. At our option, a borrowing may be in the form of a base rate loan or a LIBOR rate loan. Borrowings under the loan bear interest on the outstanding principal amount at a rate equal to the daily LIBOR rate plus 1.00%. Interest on the loan outstanding is payable quarterly in arrears and on the maturity date. There are no prepayment penalties if we elect to prepay the outstanding loan amounts prior to the scheduled maturity date. The principal balance is payable in full on the maturity date.

In conjunction with FactSet's entrance into the 2017 Credit Agreement, the Company borrowed \$575.0 million in the form of a LIBOR rate loan under the 2017 Revolving Credit Facility and retired the outstanding debt under its previous credit agreement between FactSet, as the borrower, and Bank of America, N.A., as the lender. The total principal amount of the debt outstanding at the time of retirement was \$365.0 million and there were no prepayment penalties. Proceeds from the 2017 Revolving Credit Facility were also used to fund FactSet's acquisition of BISAM.

All outstanding loan amounts are reported as *Long-term debt* within the Consolidated Balance Sheet at August 31, 2017. During fiscal 2017 and 2016, we paid approximately \$8.4 million and \$3.1 million, respectively, in interest on our outstanding loan amounts. The principal balance is payable in full on the maturity date.

As of August 31, 2017, no commitment fee was owed by FactSet since it borrowed the full amount under the 2017 Credit Agreement. In fiscal 2017, FactSet incurred approximately \$0.4 million in legal costs to draft and review the 2017 Credit Agreement. These costs were capitalized as loan origination fees and are amortized into interest expense over the term of the loan using the effective interest method.

The 2017 Credit Agreement contained covenants restricting certain FactSet activities, which are usual and customary for this type of loan. In addition, the 2017 Credit Agreement required that FactSet maintain a consolidated leverage ratio, as measured by total funded debt/EBITDA below a specified level as of the end of each fiscal quarter. The Company was in compliance with all of the covenants of the 2017 Credit Agreement as of August 31, 2017.

As of August 31, 2017, the fair value of our long-term debt was \$575.0 million, which we believe approximates carrying amount as the terms and interest rates approximate market rates given its floating interest rate basis.

Letters of Credit

From time to time, we are required to obtain letters of credit in the ordinary course of business. Approximately \$1.9 million of standby letters of credit have been issued in connection with various current leased office spaces as of August 31, 2017. These standby letters of credit contain covenants that, among other things, require us to maintain minimum levels of

consolidated net worth and certain leverage and fixed charge ratios. As of August 31, 2017 and 2016, we were in compliance with all covenants contained in the standby letters of credit.

Foreign Currency

Foreign Currency Exposure

Certain wholly owned subsidiaries within the European and Asia Pacific segments operate under a functional currency different from the U.S. dollar. The financial statements of these foreign subsidiaries are translated into U.S. dollars using period-end rates of exchange for assets and liabilities and average rates for the period for revenues and expenses. Translation gains and losses that arise from translating assets, liabilities, revenues and expenses of foreign operations are recorded in accumulated other comprehensive loss as a component of stockholders' equity.

As of August 31, 2017, our non-U.S. dollar denominated revenues expected to be recognized are estimated to be approximately \$90 million while our non-U.S. dollar denominated expenses are approximately \$300 million, which translates into a net foreign currency exposure of approximately \$210 million per year. Our foreign currency exchange exposure is related to our operating expense base in countries outside the U.S., where 73% of our employees were located as of August 31, 2017. During fiscal 2017, foreign currency movements decreased operating income by \$7.1 million, compared to \$11.6 million a year ago.

Foreign Currency Hedges

As of August 31, 2017, FactSet maintained foreign currency forward contracts to hedge approximately 75% of its Indian Rupee exposure through the third quarter of fiscal 2019. The gross notional value of foreign currency forward contracts to purchase Indian Rupees with U.S. dollars was Rs. 3.8 billion.

There were no other outstanding foreign currency forward contracts as of August 31, 2017. A loss on derivatives of \$2.9 million was recorded into operating income during fiscal 2017, compared to a loss of \$0.5 million in fiscal 2016.

Off-Balance Sheet Arrangements

At August 31, 2017 and 2016, we had no off-balance sheet financing or other arrangements with unconsolidated entities or financial partnerships (such as entities often referred to as structured finance or special purpose entities) established for purposes of facilitating off-balance sheet financing or other debt arrangements or for other contractually limited purposes.

Share Repurchase Program

In fiscal 2017, we repurchased 1.6 million shares for \$252.8 million compared to 1.5 million shares for \$232.3 million in fiscal 2016 under the our existing share repurchase program. Over the last 12 months, we have returned \$341.9 million to stockholders in the form of share repurchases and dividends, funded by cash generated from operations. On March 27, 2017, the Board of Directors of FactSet approved a \$300.0 million expansion of to the existing share repurchase program. Including this expansion, \$244.1 million is available for future share repurchases as of August 31, 2017.

On July 1, 2016, we entered into an ASR Agreement to repurchase \$120.0 million of our common stock. We received 595,607 shares of common stock on July 5, 2016, which was approximately 80% of the total number of shares of common stock expected to be repurchased under the ASR Agreement. The final settlement of the ASR Agreement occurred in the first quarter of fiscal 2017 with us receiving an additional 102,916 shares of our common stock.

Contractual Obligations

Fluctuations in our operating results, the degree of success of our accounts receivable collection efforts, the timing of tax and other payments as well as necessary capital expenditures to support growth of our operations will impact our liquidity and cash flows in future periods. The effect of our contractual obligations on our liquidity and capital resources in future periods should be considered in conjunction with the factors mentioned here.

The following table summarizes our significant contractual obligations as of August 31, 2017 and the corresponding effect that these obligations will have on our liquidity and cash flows in future periods:

(in millions)	Payments due by period				Total
	2018	2019-2020	2021-2022	2023 and thereafter	
Operating lease obligations ⁽¹⁾	\$ 38.1	\$ 63.5	\$ 41.0	\$ 139.1	\$ 281.7
Purchase commitments ⁽²⁾	74.9	3.6	2.5	—	81.0
Loan outstanding ⁽³⁾	—	575.0	—	—	575.0
Total contractual obligations by period ⁽⁴⁾	\$ 113.0	\$ 642.1	\$ 43.5	\$ 139.1	\$ 937.7

⁽¹⁾ Operating lease amounts include future minimum lease payments under all our non-cancelable operating leases with an initial term in excess of one year. For more information on our operating leases, see Note 19, Commitments and Contingencies, in the Notes to the Company's Consolidated Financial Statements included in Item 8.

⁽²⁾ Purchase commitments represent payments due in future periods in respect of obligations to our various data vendors as well as commitments to purchase goods and services such as telecommunication and computer maintenance services.

⁽³⁾ Represents the amount due under the Company's 2017 Credit Agreement.

⁽⁴⁾ Non-current income taxes payable of \$11.5 million and non-current deferred tax liabilities of \$24.9 million have been excluded in the table above due to uncertainty regarding the timing of future payments.

Purchase orders do not necessarily reflect a binding commitment but are merely indicative of authorizations and intention to conclude purchases in the future. For the purpose of this tabular disclosure, purchase obligations for goods and services are defined as agreements that are enforceable and legally binding on us and that specify all significant terms, including: fixed or minimum quantities to be purchased; fixed, minimum or variable price provisions; and the approximate timing of the transaction. It is expected that all the contractual obligations noted in the table will be funded from existing cash and cash flows from operations. Expected timing pertaining to the contractual obligations included in the table above has been estimated based on information currently available. The amounts paid and the timing of those payments may differ based on when the goods and services provided by our vendors to whom we are contractually obligated are actually received as well as due to changes to agreed-upon amounts for any of our obligations.

At August 31, 2017, we leased approximately 1,143,000 square feet of office space, which we believe is adequate for our current needs and that additional space is available for lease to meet any future needs. Including new lease agreements executed during fiscal 2017, our worldwide-leased office space increased by approximately 71,000 square feet, or 7%, from August 31, 2016. This increase was primarily due to leases related to acquisitions completed in fiscal 2017 as well as expanded office space in India, offset by the consolidation of certain other office spaces.

As disclosed earlier in the *Capital Resources* section of this MD&A, FactSet entered into the 2017 Credit Agreement on March 17, 2017 and borrowed \$575.0 million. In conjunction with the 2017 Credit Agreement, FactSet retired its outstanding loan amount of \$365.0 million under the previous credit agreement.

With the exception of the new leases entered into in the ordinary course of business and the 2017 Credit Agreement, there were no other significant changes to our contractual obligations during fiscal 2017.

Dividends

On May 5, 2017, our Board of Directors approved a 12.0% increase in the regular quarterly dividend beginning with the dividend payment on June 2017 which was \$0.56 per share, or \$2.24 per share per annum. With our dividends and our share repurchases, in the aggregate, we have returned \$341.9 million to shareholders over the past 12 months. Future cash dividends will depend on our earnings, capital requirements, financial condition and other factors we considered relevant and is subject to final determination by our Board of Directors.

During fiscal years 2017 and 2016, our Board of Directors declared the following dividends:

Declaration Date	Dividends Per Share of Common Stock	Type	Record Date	Total \$ Amount (in thousands)	Payment Date
August 10, 2017	\$ 0.56	Regular (cash)	August 31, 2017	\$ 21,853	September 19, 2017
May 5, 2017	\$ 0.56	Regular (cash)	May 31, 2017	\$ 21,951	June 20, 2017
February 6, 2017	\$ 0.50	Regular (cash)	February 28, 2017	\$ 19,709	March 21, 2017
November 10, 2016	\$ 0.50	Regular (cash)	November 30, 2016	\$ 19,852	December 20, 2016
August 5, 2016	\$ 0.50	Regular (cash)	August 31, 2016	\$ 20,019	September 20, 2016
May 6, 2016	\$ 0.50	Regular (cash)	May 31, 2016	\$ 20,171	June 21, 2016
February 5, 2016	\$ 0.44	Regular (cash)	February 29, 2016	\$ 18,044	March 15, 2016
November 6, 2015	\$ 0.44	Regular (cash)	November 30, 2015	\$ 18,208	December 15, 2015
August 10, 2015	\$ 0.44	Regular (cash)	August 31, 2015	\$ 18,179	September 15, 2015

All of the above cash dividends were paid from existing cash resources. Future cash dividends will depend on our earnings, capital requirements, financial condition and other factors we considered relevant and is subject to final determination by our Board of Directors.

Significant Accounting Policies

We describe our significant accounting policies in Note 3, *Summary of Significant Accounting Policies*, of the Notes to our Consolidated Financial Statements included in Item 8 below.

Critical Accounting Estimates

We consider an accounting estimate to be critical if: (i) the accounting estimate requires us to make assumptions about matters that were highly uncertain at the time the accounting estimate was made, and (ii) changes in the estimate that are reasonably likely to occur from period to period, or use of different estimates that we reasonably could have used in the current period, would have a material impact on our financial condition or results of operations. Management has discussed the development and selection of these critical accounting estimates with the Audit Committee of our Board of Directors. In addition, there are other items within our consolidated financial statements that require estimation, but are not deemed critical as defined above. Changes in estimates used in these and other items could have a material impact on our financial statements.

Business Combinations

We record acquisitions using the purchase method of accounting. All of the assets acquired, liabilities assumed, contractual contingencies and contingent consideration are recognized at their fair value on the acquisition date. The application of the purchase method of accounting for business combinations requires management to make significant estimates and assumptions in the determination of the fair value of assets acquired and liabilities assumed in order to properly allocate purchase price consideration between assets that are depreciated and amortized from goodwill. Our estimates are based on historical experience, information obtained from the management of the acquired companies and when appropriate, includes assistance from independent third party appraisal firms. Our significant assumptions and estimates can include, but are not limited to, the cash flows that an asset is expected to generate in the future, the appropriate weighted-average cost of capital, and the cost savings expected to be derived from acquiring an asset. These estimates are inherently uncertain and unpredictable. In addition, unanticipated events and circumstances may occur which may affect the accuracy or validity of such estimates.

Performance-based Equity Awards

We have an employee stock-based compensation plan, which allows for the issuance of performance-based equity awards to employees. Accounting guidance requires the measurement and recognition of compensation expense for all performance-based equity awards made to employees based on the estimated fair values of the awards that are expected to vest. At the end of each reporting period, management must make assumptions regarding the likelihood of achieving our performance targets because the number of stock options that vest will be predicated on us achieving these levels. However, there is no current guarantee that such options will vest in whole or in part.

February 2015 Performance-based Option Grant Review

In connection with the acquisition of Code Red, we granted 137,522 performance-based stock options during the second quarter of fiscal 2015. Of the total amount granted, 68,761 performance-based options were eligible to vest if certain Code Red ASV and operating margin targets were achieved over a two-year measurement period ending February 28, 2017. At the conclusion of the measurement period, 70% of the options were deemed eligible to vest, with the remaining options being forfeited. The option holders must remain employed by FactSet through February 28, 2019 in order for the options to vest. As

of August 31, 2017, total unamortized stock-based compensation of \$0.8 million will be recognized as expense over the remaining vesting period of 1.4 years.

The remaining 68,761 options granted in February 2015 are eligible to cliff vest based on a four-year measurement period ending February 28, 2019. As of August 31, 2017, total unamortized stock-based compensation of \$0.4 million will be recognized as expense over the remaining vesting period of 1.4 years. A change, up or down, in the actual financial performance levels achieved by Code Red in future fiscal years could result in the following changes to the current estimate of the vesting percentage and related expense:

Vesting Percentage (in thousands)	Cumulative Catch-up Adjustment*	Remaining Expense to be Recognized
0%	\$ (769)	\$ —
10%	\$ (577)	\$ 108
40% (current expectation)	\$ —	\$ 431
70%	\$ 577	\$ 755
100%	\$ 1,153	\$ 1,078

* Amounts represent the cumulative catch-up adjustment to be recorded if there was a change in the vesting percentage as of August 31, 2017.

October 2015 and August 2016 Performance-based Option Grant Review

In connection with the acquisition of Portware during the first quarter of fiscal 2016, we granted 530,418 performance-based stock options. In the fourth quarter of fiscal 2017, we modified the vesting of these grants to allow 70% of the options to become eligible to vest, with the remaining options being forfeited. In conjunction with this modification, we recognized a cumulative catch-up adjustment of \$1.8 million. The remaining options will vest 40% on the second anniversary date of the grant and 20% on each subsequent anniversary date provided the option holders remain employed by FactSet. As of August 31, 2017, total unamortized stock-based compensation of \$2.9 million will be recognized as expense over the remaining vesting period of 3.1 years.

We granted 20,911 additional performance-based stock options to Portware employees in the fourth quarter of fiscal 2016 with similar performance conditions. In the fourth quarter of fiscal 2017, FactSet modified the vesting of these grants to allow 70% of the options to become eligible to vest, with the remaining options being forfeited. In conjunction with this modification, FactSet recognized a cumulative catch-up adjustment of \$0.1 million. The remaining options will vest 40% on the second anniversary date of the grant and 20% on each subsequent anniversary date provided the option holders remain employed by FactSet. As of August 31, 2017, total unamortized stock-based compensation of \$0.4 million will be recognized as expense over the remaining vesting period of 3.9 years.

January 2017 Performance-based Option Grant Review

In connection with the acquisition of Vermilion, FactSet granted 61,744 performance-based stock options in January 2017. These performance-based options will vest 40% on the second anniversary date of the grant and 20% on each subsequent anniversary date if certain Vermilion revenue and operating income targets are achieved by November 30, 2018. The option holders must also remain employed by FactSet for the options to be eligible to vest. As of August 31, 2017, FactSet does not believe these growth targets are probable of being achieved, and as such, no stock-based compensation expense is expected to be recognized in connection with these performance-based options. A change in the actual financial performance levels achieved by Vermilion in future fiscal years could result in the following changes to the current estimate of the vesting percentage and related expense:

Vesting Percentage (in thousands)	Cumulative Catch-up Adjustment*	Remaining Expense to be Recognized
0% (current expectation)	\$ —	\$ —
100%	\$ 338	\$ 2,367

* Amounts represent the cumulative catch-up adjustment to be recorded if there was a change in the vesting percentage as of August 31, 2017.

June 2017 Performance-based Option Grant Review

In connection with the acquisition of BISAM, FactSet granted 206,417 performance-based stock options in June 2017. These performance-based options will vest 40% on the second anniversary date of the grant and 20% on each subsequent anniversary date if certain BISAM revenue and operating income targets are achieved by March 31, 2019. The option holders must also remain employed by FactSet for the options to be eligible to vest. As of August 31, 2017, FactSet does not believe these growth targets are probable of being achieved, and as such, no stock-based compensation expense is expected to be recognized in connection with these performance-based options. A change in the actual financial performance levels achieved by BISAM in future fiscal years could result in the following changes to the current estimate of the vesting percentage and related expense:

Vesting Percentage (in thousands)	Cumulative Catch-up Adjustment*	Remaining Expense to be Recognized
0%(current expectation)	\$ —	\$ —
80%	\$ 237	\$ 6,870
90%	\$ 267	\$ 7,729
100%	\$ 296	\$ 8,588

* Amounts represent the cumulative catch-up adjustment to be recorded if there was a change in the vesting percentage as of August 31, 2017.

Accrued Compensation

We make significant estimates in determining our accrued compensation. Approximately 15% of our total employee compensation is variable and discretionary. We conduct a final review of Company and departmental individual performance each year end to determine the amount of discretionary employee compensation. We also review compensation throughout the year to determine how overall performance tracks against management's expectations. Management takes these and other factors, including historical performance, into account in reviewing accrued compensation estimates on a quarterly basis and adjusts accrual rates as appropriate. As of August 31, 2017 and 2016 the amount of the variable employee compensation recorded within accrued compensation was \$39.2 million and \$38.2 million, respectively.

Goodwill and Intangible Assets

Goodwill is not amortized as it is estimated to have an indefinite life. At least annually, we are required to test goodwill at the reporting unit level for potential impairment, and, if impaired, write down to fair value based on the present value of discounted cash flows. Our reporting units evaluated for potential impairment were the U.S., Europe and Asia Pacific, which is aligned with how the chief operating decision making group ("CODMG"), composed of the CEO and senior management, manages the business and the demographic markets in which FactSet serves. The three reporting units are consistent with the operating segments reported as there is no discrete financial information available for the subsidiaries within each operating segment. The impairment test requires management to make judgments in connection with these reporting units, including assigning assets, liabilities, goodwill and other indefinite-lived intangible assets to reporting units and determining the fair value of each reporting unit.

Our impairment analysis contains uncertainties as it requires management to make assumptions and apply judgment to estimate industry and economic factors including market conditions, legal and technological factors and the profitability of our business strategies. It is our policy to conduct impairment testing based on our current business strategies taking into consideration present industry and economic conditions, as well as future expectations. We have not made any material changes in our impairment analysis methodology during the past three fiscal years. While we do not believe there is a reasonable likelihood that there will be a material change in the future estimates or assumptions we use to test for goodwill impairment losses, we may be exposed to an impairment charge that could be material if actual results are not consistent with our estimates and assumptions. Future events could cause us to conclude that indicators of impairment do exist and that goodwill associated with our previous acquisitions is impaired, which could result in an impairment loss in our Consolidated Statements of Income and a write-down of the related asset.

We performed our annual goodwill impairment test during the fourth quarter of fiscal 2017, consistent with previous years, it was determined that there was no impairment, with the fair value of each of the Company's reporting units significantly exceeding carrying value. The carrying value of goodwill as of August 31, 2017 and 2016, was \$707.6 million and \$452.9 million, respectively.

Our identifiable intangible assets consist of acquired content databases, client relationships, software technology, non-compete agreements and trade names resulting from acquisitions, which have been fully integrated into our operations. Depending on the nature of the intangible asset, it is amortized on either a straight-line or an accelerated basis using estimated useful lives ranging from two to twenty years. These useful lives are evaluated quarterly to determine whether events and circumstances warrant a revision to the remaining period of amortization. If the estimate of the remaining useful life

is changed, the remaining carrying amount of the intangible asset is amortized prospectively over that revised remaining useful life. There were no adjustments to the useful lives of intangible assets subject to amortization during any of the periods presented. These intangible assets have no assigned residual values as of August 31, 2017 and 2016.

Intangible assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of such assets may not be recoverable. Determination of recoverability is based on an estimate of undiscounted future cash flows resulting from the use of the asset and its eventual disposition. Measurement of any impairment loss for intangible assets that management expects to hold and use is based on the amount the carrying value exceeds the fair value of the asset. No indicators of impairment of intangible assets has been identified during any of the periods presented. Our ongoing consideration of the recoverability could result in impairment charges in the future, which could adversely affect our results of operations. The carrying value of intangible assets as of August 31, 2017 and 2016, was \$173.5 million and \$93.2 million, respectively.

Long-lived Assets

Long-lived assets, comprised of property, equipment and leasehold improvements are evaluated for impairment whenever events or changes in circumstances indicate that the carrying value may not be recoverable. Factors that may cause an impairment review include significant changes in technology that make current computer-related assets that we use in our operations obsolete or less useful and significant changes in the way we use these assets in our operations. When evaluating long-lived assets for potential impairment if impairment indicators are present, we first compare the carrying value of the asset to the asset's estimated future cash flows (undiscounted and without interest charges). If the estimated future cash flows are less than the carrying value of the asset, we calculate an impairment loss. The impairment loss calculation compares the carrying value of the asset to the asset's estimated fair value, which may be based on estimated future cash flows (discounted and with interest charges). We recognize an impairment loss if the amount of the asset's carrying value exceeds the asset's estimated fair value. If we recognize an impairment loss, the adjusted carrying amount of the asset becomes its new cost basis. The new cost basis will be depreciated (amortized) over the remaining useful life of that asset. Using the impairment evaluation methodology described here, there have been no long-lived asset impairment charges for each of the last three years. The carrying value of long-lived assets as of August 31, 2017 and 2016, was \$100.5 million and \$84.6 million, respectively.

Our impairment loss calculations contain uncertainties because they require management to make assumptions and to apply judgment to estimate future cash flows and asset fair values, including forecasting useful lives of the assets and selecting the discount rate that reflects the risk inherent in future cash flows. We have not made any material changes in our impairment loss assessment methodology during the past three fiscal years. We do not believe there is a reasonable likelihood that there will be a material change in the estimates or assumptions we use to calculate long-lived asset impairment losses. However, if actual results are not consistent with our estimates and assumptions used in estimating future cash flows and asset fair values, we may be exposed to losses that could be material.

Estimated Tax Provision and Tax Contingencies

We are subject to income taxes in the U.S. and numerous foreign jurisdictions. Our tax provision is an estimate based on our understanding of laws in Federal, state and foreign tax jurisdictions. These laws can be complicated and are difficult to apply to any business including ours. The tax laws also require us to allocate our taxable income to many jurisdictions based on subjective allocation methodologies and information collection processes. Our effective tax rates differ from the statutory rate primarily due to the impact of state taxes, foreign operations, R&D and other tax credits, tax audit settlements, incentive-stock options and domestic production activities deductions. Our annual effective tax rate was 25.0%, 26.5% and 27.8% in fiscal 2017, 2016 and 2015, respectively.

We recognize the benefit of an income tax position only if it is more likely than not that the tax position will be sustained upon tax examination, based solely on the technical merits of the tax position as of the reporting date. Otherwise, no benefit can be recognized. The tax benefits recognized are measured based on the largest benefit that has a greater than 50% likelihood of being realized upon ultimate settlement. We will classify the liability for unrecognized tax benefits as current to the extent that we anticipate payment of cash within one year. Additionally, we accrue interest on all tax exposures for which reserves have been established consistent with jurisdictional tax laws. Interest is classified as income tax expense in the financial statements.

As of August 31, 2017, we had gross unrecognized tax benefits totaling \$11.5 million, including \$1.5 million of accrued interest, recorded as *Taxes Payable* (non-current) within the Consolidated Balance Sheet. Unrecognized tax benefits represent tax positions taken on tax returns but not yet recognized in the consolidated financial statements. When applicable, we adjust the previously recorded tax expense to reflect examination results when the position is effectively settled. If recognized, the unrecognized tax benefits and related interest would be recorded as a benefit to tax expense on the

Consolidated Statements of Income. Audits by multiple tax authorities are currently ongoing. Significant judgment is required in evaluating our uncertain tax positions and determining our provision for income taxes. For this reason, we regularly engage in discussions and negotiations with tax authorities regarding tax matters in various jurisdictions. Although we believe our reserves are reasonable, no assurance can be given that the final outcome of these matters will not be different from that which is reflected in our historical income tax provisions and accruals. We adjust these reserves in light of changing facts and circumstances, such as the closing of a tax audit or the refinement of an estimate. To the extent that the final outcome of these matters is different than the amounts recorded, such differences will affect the provision for income taxes in the period in which such determination is made. The provision for income taxes includes the effect of reserve provisions and changes to reserves that are considered appropriate, as well as the related net interest.

Our provision for income taxes is subject to volatility and could be adversely impacted by numerous factors such as changes in tax laws, regulations, or accounting principles, including accounting for uncertain tax positions or interpretations of them. Significant judgment is required to determine recognition and measurement. Further, as a result of certain ongoing employment and capital investment actions and commitments, our income in certain countries is subject to reduced tax rates and in some cases is wholly exempt from tax. Our failure to meet these commitments could adversely affect our provision for income taxes. In addition, we are subject to the continuous examination of our income tax returns by the Internal Revenue Service and other tax authorities. We regularly assess the likelihood of adverse outcomes resulting from these examinations to determine the adequacy of our provision for income taxes. There can be no assurance that the outcomes from these continuous examinations will not have an adverse impact on our operating results and financial condition.

New Accounting Pronouncements

See Note 3, *Summary of Significant Accounting Policies*, in the Notes to the Company's Consolidated Financial Statements included in Item 8 for a full description of recent accounting pronouncements, including the expected dates of adoption, which we include here by reference.

Market Trends

In the ordinary course of business, we are exposed to financial risks involving the volatility of equity markets as well as foreign currency and interest rate fluctuations.

Approximately 84.1% of our ASV is derived from our investment management clients. The prosperity of these clients is tied to equity assets under management. An equity market decline not only depresses assets under management but could cause a significant increase in redemption requests. Moreover, extended declines in the equity markets may reduce new fund or client creation, resulting in lower demand for services from investment management clients. Our investment banking clients that perform M&A advisory work, provide capital markets services and equity research, account for approximately 15.9% of our ASV. A significant portion of these revenues relate to services deployed by the largest banks. Credit continues to impact many of the large banking clients due to the amount of leverage deployed in past operations. Clients could encounter similar problems. A lack of confidence in the global banking system could cause declines in M&A funded by debt. Additional uncertainty, consolidation and business failures in the global investment banking sector could adversely affect our financial results and future growth. Regardless, the size of banks in general is shrinking as they deleverage their balance sheets and adjust their expense bases to future revenue opportunities. Our revenues may decline if banks, including those involved in recent merger activity, significantly reduce headcount in the areas of corporate M&A, capital markets and equity research to compensate for the issues created by other departments.

Due to the global nature of our operations, we conduct business outside the U.S. in several currencies including the British Pound Sterling, Euro, Indian Rupee, Japanese Yen and Philippine Peso. To the extent that our international activities increase in the future, our exposure to fluctuations in currency exchange rates will correspondingly increase. To manage this exposure, we utilize derivative instruments (foreign currency forward contracts). By their nature, all derivative instruments involve, to varying degrees, elements of market and credit risk. The market risk associated with these instruments resulting from currency exchange movements is expected to offset the market risk of the underlying transactions, assets and liabilities being hedged. Credit risk is managed through the continuous monitoring of exposure to the counterparties associated with these instruments. Our primary objective in holding derivatives is to reduce the volatility of earnings associated with changes in foreign currency.

On June 23, 2016, the United Kingdom ("UK") held a referendum in which British citizens approved an exit from the European Union ("EU"), commonly referred to as "Brexit." As a result of the referendum, the global markets and currencies had been adversely impacted, including a sharp decline in the value of the British Pound Sterling as compared to the U.S. dollar at that time. Volatility in exchange rates is expected to continue in the short term as the UK negotiates its exit from the EU. The UK inflation rate has also experienced significant price level increase compared to the past four years. As the negotiation process continues and the timeframe from the initial vote increases, the UK economic performance has been stronger than originally expected. Increased European confidence and UK consumer spending has contributed to the recovery of the economic

outlook. In the longer term, as negotiations continue, any impact from Brexit on us will depend, in part, on the outcome of tariff, trade, regulatory and other negotiations. Although it is unknown what the result of those negotiations will be, it is possible that new terms may adversely affect our operations and financial results. While we evaluate our own risks and uncertainty related to Brexit, we will continue to partner with our clients to help them navigate the fluctuating international markets. Our products, including our datasets such as GeoRev, allow our clients to understand geographic exposure and assess the risks of operating on a global scale so they may make informed business decisions.

Forward-Looking Factors

Forward-Looking Statements

In addition to current and historical information, this Annual Report on Form 10-K, including Management's Discussion and Analysis of Financial Condition and Results of Operations, contains forward-looking statements regarding future events and our future results that are based on management's current expectations, estimates, forecast and projections about the industries in which we operate and the beliefs and assumptions of our management. All statements, other than statements of historical facts, are statements that could be deemed to be forward-looking statements. These include statements about our strategy for growth, product development, market position, subscriptions and expected expenditures and financial results. Forward-looking statements may be identified by words like "expects," "anticipates," "plans," "intends," "projects," "should," "indicates," "continues," "ASV," "subscriptions," "believes," "estimates," "may" and similar expressions. In addition, any statements that refer to projections of our future financial performance, our anticipated growth, trends in our business and other characterizations of future events or circumstances are forward-looking statements. Readers are cautioned that these forward-looking statements are only predictions and not guarantees of future performance and involve a number of risks, uncertainties and assumptions. Therefore, actual results may differ materially from what is expressed or forecasted in such forward-looking statements. We will publicly update forward-looking statements as a result of new information or future events in accordance with applicable Securities and Exchange Commission regulations.

We intend that all forward-looking statements we make will be subject to safe harbor protection of the federal securities laws as found in Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. These statements involve certain known and unknown risks and uncertainties that could cause our actual results to differ materially from those expressed or implied in our forward-looking statements. Such risks and uncertainties include, among others, those listed in Part 1 Item 1A, *Risk Factors*, of this Annual Report on Form 10-K. We do not intend, and undertake no obligation, to update any of our forward-looking statements after the date of this Annual Report to reflect actual results or future events or circumstances.

Business Outlook

The following forward-looking statements reflect our expectations as of September 26, 2017. Given the number of risk factors, uncertainties and assumptions discussed below, actual results may differ materially. We do not intend to update our forward-looking statements until our next quarterly results announcement, other than in publicly available statements.

First Quarter Fiscal 2018 Expectations

- GAAP Revenues are expected to be in the range of \$327 million and \$333 million.
- GAAP operating margin is expected to be in the range of 28% and 29%. Adjusted operating margin is expected to be in the range of 31% and 32%.
- The annual effective tax rate is expected to be in the range of 25% and 26%.
- GAAP diluted EPS is expected to be in the range of \$1.75 and \$1.81. Adjusted diluted EPS is expected to be in the range of \$1.93 and \$1.99. The midpoint of the adjusted EPS range represents 12% growth over the prior year.

Dividend Payment

On August 10, 2017, we declared a regular quarterly dividend of \$0.56 per share. The cash dividend of \$21.9 million was paid on September 19, 2017, to common stockholders of record on August 31, 2017 using our existing cash generated by operations.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

In the normal course of business, we are exposed to foreign currency exchange risk that could impact our financial position and results of operations.

Foreign Currency Exchange Risk

We conduct business outside the U.S. in several currencies including the British Pound Sterling, Euro, Indian Rupee, Japanese Yen and Philippine Peso. The financial statements of these foreign subsidiaries are translated into U.S. dollars using period-end rates of exchange for assets and liabilities and average rates for the period for revenues and expenses. Over the next 12 months, our non-U.S. dollar denominated revenues expected to be recognized are estimated to be approximately \$90 million while our non-U.S. dollar denominated expenses are approximately \$300 million, which translates into a net foreign currency exposure of approximately \$210 million per year. To the extent that our international activities recorded in local currencies increase in the future, our exposure to fluctuations in currency exchange rates will correspondingly increase. To manage the exposures related to the effects of foreign exchange rate fluctuations, we utilize derivative instruments (foreign currency forward contracts). By their nature, all derivative instruments involve, to varying degrees, elements of market and credit risk. The market risk associated with these instruments resulting from currency exchange movements is expected to offset the market risk of the underlying transactions, assets and liabilities being hedged. We do not believe there is significant risk of loss in the event of non-performance by the counterparties associated with these instruments because these transactions are executed with a major financial institution. Further, our policy is to deal with counterparties having a minimum investment grade or better credit rating. Credit risk is managed through the continuous monitoring of exposures to such counterparties. Our primary objective in holding derivatives is to reduce the volatility of earnings associated with changes in foreign currency.

As of August 31, 2017, FactSet maintained foreign currency forward contracts to hedge approximately 75% of its Indian Rupee exposure through the third quarter of fiscal 2019. The gross notional value of foreign currency forward contracts to purchase Indian Rupees with U.S. dollars was Rs. 3.8 billion.

There were no other outstanding foreign currency forward contracts as of August 31, 2017. A loss on derivatives of \$2.9 million was recorded into operating income in fiscal 2017, compared to a loss of \$0.5 million a year ago. The gains and losses on foreign currency forward contracts mitigate the variability in operating expenses associated with currency movements. These transactions are designated and accounted for as cash flow hedges in accordance with applicable accounting guidance. The changes in fair value for these foreign currency forward contracts are initially reported as a component of accumulated other comprehensive loss and subsequently reclassified into operating expenses when the hedged exposure affects earnings. The related cash flow impacts of all of our derivative activities are reflected as cash flows from operating activities.

A sensitivity analysis was performed based on the estimated fair value of all foreign currency forward contracts outstanding at August 31, 2017. If the U.S. dollar had been 10% weaker, the fair value of outstanding foreign currency forward contracts would have increased by \$5.4 million, which would have had an immaterial impact on our Consolidated Balance Sheet. Such a change in fair value of our financial instruments would be substantially offset by changes in our expense base. Had we not had any hedges in place as of August 31, 2017, a hypothetical 10% weaker U.S. dollar against all foreign currencies from the quoted foreign currency exchange rates at August 31, 2017, would result in a decrease in operating income by \$20.3 million over the next 12 months. A hypothetical 10% weaker U.S. dollar against all foreign currencies at August 31, 2017 would increase the fair value of total assets by \$69.5 million and equity by \$61.9 million.

On June 23, 2016, the UK held a referendum in which British citizens approved an exit from the EU, commonly referred to as "Brexit." As a result of the referendum, the global markets and currencies have been adversely impacted, including a sharp decline in the value of the British Pound Sterling as compared to the U.S. dollar. Volatility in exchange rates is expected to continue in the short term as the UK negotiates its exit from the EU. In the longer term, any impact from Brexit on us will depend, in part, on the outcome of tariff, trade, regulatory and other negotiations. Although it is unknown what the result of those negotiations will be, it is possible that new terms may adversely affect our operations and financial results.

Interest Rate Risk

Cash and Cash Equivalents

The fair market value of our cash and investments at August 31, 2017, was \$227.2 million. Our cash and cash equivalents consist of demand deposits and money market funds with original maturities of three months or less and are reported at fair value. Our investments consist of certificates of deposits with original maturities greater than three months, but less than one

year and, as such, are classified as Investments within our Consolidated Balance Sheet. It is anticipated that the fair market value of our cash and investments will continue to be immaterially affected by fluctuations in interest rates. Preservation of principal is the primary goal of our cash and investment policy. Pursuant to our established investment guidelines, we try to achieve high levels of credit quality, liquidity and diversification. Our investment guidelines do not permit us to invest in puts, calls, strips, short sales, straddles, options, commodities, precious metals, futures or investments on margin. Because we have a restrictive investment policy, our financial exposure to fluctuations in interest rates is expected to remain low. We do not believe that the value or liquidity of our cash and investments have been significantly impacted by current market events.

Debt

As of August 31, 2017, the fair value of our long-term debt was \$575.0 million, which approximated its carrying amount given its floating interest rate basis and was determined based on quoted market prices for debt with a similar maturity. It is anticipated that the fair market value of our debt will continue to be immaterially affected by fluctuations in interest rates and we do not believe that the value of our debt has been significantly impacted by current market events. The debt bears interest on the outstanding principal amount at a rate equal to the daily LIBOR rate plus 1.00%. During fiscal 2017 we paid \$8.4 million in interest on our outstanding Loan amount compared to \$3.1 million in the prior year. Assuming all terms of our outstanding long-term debt remained the same, a hypothetical 25 basis point change (up or down) in the one-month LIBOR rate would result in a \$1.4 million change in our annual interest expense.

Management's Statement of Responsibility for Financial Statements

FactSet's consolidated financial statements are prepared by management, which is responsible for their fairness, integrity and objectivity. The accompanying consolidated financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America and include amounts based on management's estimates and judgments. All financial information in this Annual Report on Form 10-K has been presented on a basis consistent with the information included in the accompanying financial statements.

FactSet's policies and practices reflect corporate governance initiatives that are compliant with the listing requirements of the New York Stock Exchange, the NASDAQ Stock Market and the corporate governance requirements of the Sarbanes-Oxley Act of 2002. Management, with oversight by the Company's Board of Directors, has established and maintains a strong ethical climate so that its affairs are conducted to the highest standards of personal and corporate conduct.

FactSet maintains accounting systems, including internal accounting controls, designed to provide reasonable assurance of the reliability of financial records and the protection of assets. The concept of reasonable assurance is based on recognition that the cost of a system should not exceed the related benefits. The effectiveness of those systems depends primarily upon the careful selection of financial and other managers, clear delegation of authority and assignment of accountability, inculcation of high business ethics and conflict-of-interest standards, policies and procedures for coordinating the management of corporate resources, and the leadership and commitment of top management. In compliance with the Sarbanes-Oxley Act of 2002, FactSet assessed its internal control over financial reporting as of August 31, 2017, and issued a report (see below).

The Audit Committee of the Board of Directors, which consists solely of independent non-employee directors, is responsible for overseeing the functioning of the accounting system and related controls and the preparation of annual financial statements. The Audit Committee periodically meets with management and the independent accountants to review and evaluate their accounting, auditing and financial reporting activities and responsibilities, including management's assessment of internal control over financial reporting. The independent registered public accounting firm has full and free access to the Audit Committee and has met with the committee, with and without management present.

Management's Report on Internal Control over Financial Reporting

Management is responsible for establishing and maintaining adequate internal control over financial reporting for FactSet. Internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. Internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of the assets of the Company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the Company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions or that the degree of compliance with the policies or procedures may deteriorate.

Management (with the participation of the principal executive officer and principal financial officer) conducted an evaluation of the effectiveness of FactSet's internal control over financial reporting based on the framework in Internal Control—Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission except for the internal controls of BI-SAM Technologies, FactSet Digital Solutions and Vermilion Holdings Limited which (in aggregate) constituted 4.8% of net assets (excluding goodwill and intangible assets) as of August 31, 2017 and 4.5% of revenues for the year then ended. Based on this evaluation, management concluded that FactSet's internal control over financial reporting was effective as of August 31, 2017. Ernst & Young LLP, an independent registered public accounting firm, has audited the effectiveness of FactSet's internal control over financial reporting and has issued a report on FactSet's internal control over financial reporting, which is included in their report on page 46.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders of FactSet Research Systems Inc.

We have audited the accompanying consolidated balance sheets of FactSet Research Systems Inc. as of August 31, 2017 and 2016, and the related consolidated statements of income, comprehensive income, stockholders' equity and cash flows for each of the three years in the period ended August 31, 2017. Our audits also included the financial statement schedule listed in the Index at Item 8. These financial statements and schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of FactSet Research Systems Inc. at August 31, 2017 and 2016, and the consolidated results of its operations and its cash flows for each of the three years in the period ended August 31, 2017, in conformity with U.S. generally accepted accounting principles. Also, in our opinion, the related financial statement schedule, when considered in relation to the basic financial statements taken as a whole, presents fairly in all material respects the information set forth therein.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), FactSet Research Systems Inc.'s internal control over financial reporting as of August 31, 2017, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework), and our report dated October 30, 2017 expressed an unqualified opinion thereon.

Stamford, Connecticut
October 30, 2017

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders of FactSet Research Systems Inc.

We have audited FactSet Research Systems Inc.'s internal control over financial reporting as of August 31, 2017, based on criteria established in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework) (the COSO criteria). FactSet Research Systems Inc.'s management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

As indicated in the accompanying Management's Report on Internal Control over Financial Reporting, management's assessment of and conclusion on the effectiveness of internal control over financial reporting did not include the internal controls of BI-SAM Technologies, FactSet Digital Solutions and Vermilion Holdings Limited, which in aggregate, constituted 4.8% of net assets (excluding goodwill and intangible assets) as of August 31, 2017 and 4.5% of revenues for the year then ended. Our audit of internal control over financial reporting of FactSet Research Systems Inc. also did not include an evaluation of the internal control over financial reporting of BI-SAM Technologies, FactSet Digital Solutions and Vermilion Holdings Limited.

In our opinion, FactSet Research Systems Inc. maintained, in all material respects, effective internal control over financial reporting as of August 31, 2017, based on the COSO criteria.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of FactSet Research Systems Inc. as of August 31, 2017 and 2016, and the related statements of income, comprehensive income, stockholders' equity and cash flows for each of the three years in the period ended August 31, 2017 of FactSet Research Systems Inc. and our report dated October 30, 2017, expressed an unqualified opinion thereon.

Notes to the Consolidated Financial Statements

1. ORGANIZATION AND NATURE OF BUSINESS

FactSet Research Systems Inc. (the “Company” or “FactSet”) provides integrated financial information and analytical applications for the global investment community. The Company delivers insight and information to financial investment professionals through its analytics, service, content, and technology. By integrating comprehensive datasets and analytics across asset classes with client data, FactSet supports the workflow of both buy-side and sell-side clients. These professionals include portfolio managers, wealth managers, research and performance analysts, risk managers, research professionals, investment bankers, and fixed income professionals. From streaming real-time data to historical information, including quotes, estimates, news and commentary, FactSet offers unique and third-party content through desktop, wireless and off-platform solutions. The Company’s wide application suite offers tools and resources including company and industry analyses, full screening tools, portfolio analysis, risk profiles, alpha-testing, portfolio optimization and research management solutions. The Company’s revenues are derived from subscriptions to products and services such as workstations, analytics, enterprise data, research management, and trade execution.

2. BASIS OF PRESENTATION

FactSet conducts business globally and is managed on a geographic basis. The accompanying consolidated financial statements include the accounts of the Company and its wholly owned subsidiaries. All intercompany activity and balances have been eliminated from the consolidated financial statements.

The Company’s consolidated financial statements are prepared in accordance with U.S. generally accepted accounting principles. The preparation of consolidated financial statements and related disclosures in conformity with accounting principles generally accepted in the U.S. requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Significant estimates have been made in areas that include allocation of purchase price to acquired assets and liabilities, stock-based compensation, income taxes, accrued compensation, valuation of goodwill, and useful lives and valuation of fixed and intangible assets. The Company bases its estimates on historical experience and on various other assumptions that are believed to be reasonable, the results of which form the basis for making judgments about the carrying values of assets and liabilities. Actual results could differ from those estimates.

The Company has evaluated subsequent events through the date that the financial statements were issued.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The significant accounting policies of the Company and its subsidiaries are summarized below.

Revenue Recognition

The majority of the Company’s revenues are derived from subscriptions to services such as workstations (also referred to as users), content and applications. The majority of clients are invoiced monthly to reflect the actual services provided. The remaining clients are invoiced quarterly, annually or biannually in advance. Subscription revenue is earned each month as the service is rendered to clients on a monthly basis. FactSet recognizes revenue when the client subscribes to FactSet services, the service has been rendered and earned during the month, the amount of the subscription is fixed or determinable based on established rates quoted on an annualized basis and collectability is reasonably assured. A provision for billing adjustments and cancellation of services is estimated and accounted for as a reduction to revenue, with a corresponding reduction to accounts receivable.

Accounts Receivable and Deferred Fees

Amounts that have been earned but not yet paid are reflected on the Consolidated Balance Sheets as Accounts receivable, net of reserves. Amounts invoiced in advance of client payments that are in excess of earned subscription revenues are reflected on the Consolidated Balance Sheet as Deferred fees. As of August 31, 2017, the amount of accounts receivable that was unbilled totaled \$5.3 million, which was billed in fiscal 2018.

The Company calculates its receivable reserve through analyzing aged client receivables, reviewing the recent history of client receivable write-offs and understanding general market and economic conditions. In accordance with this policy, a receivable reserve of \$2.7 million and \$1.5 million was recorded as of August 31, 2017 and 2016, respectively, within the Consolidated Balance Sheets as a reduction to accounts receivable.

Cost of Services

Cost of services is comprised of compensation for Company employees within the content collection, consulting, product development, software and systems engineering groups in addition to data costs, computer maintenance and depreciation expenses, amortization of identifiable intangible assets, and client-related communication costs.

Selling, General and Administrative

Selling, general and administrative expenses include compensation for the sales and various other support and administrative departments in addition to travel and entertainment expenses, marketing costs, rent, amortization of leasehold improvements, depreciation of furniture and fixtures, office expenses, professional fees and other miscellaneous expenses.

Research and Product Development Costs

FactSet does not have a separate research and product development department, but rather the Product Development and Engineering departments work closely with the Sales function to identify areas of improvement with the goal of providing increased value to clients. As such, research and product development costs relate to the salary and benefits for the Company's product development, software engineering and technical support staff and, as such, these costs are expensed when incurred within cost of services as employee compensation. The Company expects to allocate a similar percentage of its workforce in future years in order to continue to develop new products and enhancements, respond quickly to market changes and meet the needs of its clients efficiently. FactSet incurred \$215.0 million of research and product development costs during fiscal 2017, which was comparable to its spend on similar development during fiscal years 2016 and 2015 respectively.

Earnings per Share

Basic earnings per share ("EPS") is computed by dividing net income by the number of weighted average common shares outstanding during the period. Diluted EPS is computed by dividing net income by the number of weighted average common shares outstanding during the period increased by the dilutive effect of potential common shares outstanding during the period. The number of potential common shares outstanding has been determined in accordance with the treasury stock method to the extent they are dilutive. Common share equivalents consist of common shares issuable upon the exercise of outstanding share-based compensation awards, including employee stock options and restricted stock. Under the treasury stock method, the exercise price paid by the optionee, future stock-based compensation expense that the Company has not yet recognized and the amount of tax benefits that would be recorded in additional paid-in capital ("APIC") when the award becomes deductible are assumed to be used to repurchase shares.

Comprehensive Income (Loss)

The Company discloses comprehensive income (loss) in accordance with applicable standards for the reporting and display of comprehensive income (loss) in a set of financial statements. Comprehensive income (loss) is defined as the change in net assets of a business enterprise during a period from transactions generated from non-owner sources. It includes all changes in equity during a period except those resulting from investments by owners and distributions to owners.

Fair Value Measures

Fair value is defined as the price that would be received from selling an asset or paid to transfer a liability (i.e., the "exit price") in an orderly transaction between market participants at the measurement date. In determining fair value, the use of various valuation methodologies, including market, income and cost approaches is permissible. The Company considers the principal or most advantageous market in which it would transact and considers assumptions that market participants would use when pricing the asset or liability. The accounting guidance for fair value measurements establishes a fair value hierarchy that requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. There are three levels of inputs that may be used to measure fair value based on the reliability of inputs. A financial instrument's categorization within the fair value hierarchy is based upon the lowest level of input that is significant to the fair value measurement. The Company's cash equivalents are classified as Level 1 while the Company's derivative instruments (foreign exchange forward contracts) and certificates of deposit are classified as Level 2. There were no Level 3 assets or liabilities held by FactSet as of August 31, 2017 or 2016.

Cash and Cash Equivalents

Cash and cash equivalents consist of demand deposits and corporate money market funds with original maturities of three months or less and are reported at fair value. The Company's corporate money market funds are traded in an active market and the net asset value of each fund on the last day of the quarter is used to determine its fair value.

Investments

Investments consist of certificates of deposits with original maturities greater than three months, but less than one year and, as such, are classified as Investments (short-term) on the Consolidated Balance Sheets. These certificates of deposit are held for investment and are not debt securities. Investments also include mutual funds, which FactSet may withdraw from at any time, as such, they are presented as Investments (short-term) on the Consolidated Balance Sheets. The Company's investments are associated with its purchase of certificates of deposits in India with maturities of less than twelve months from the date of purchase. Interest income earned from these investments during fiscal 2017, 2016 and 2015 were \$1.6 million, \$1.6 million and \$2.0 million, respectively. The Company's cash, cash equivalents and investments portfolio did not experience any realized or unrealized losses as a result of counterparty credit risk or ratings change during fiscal 2017 and 2016.

Property, Equipment and Leasehold Improvements

Property, equipment and leasehold improvements are stated at cost, less accumulated depreciation and amortization. Computers and related equipment are depreciated on a straight-line basis over estimated useful lives of three years. Furniture and fixtures are depreciated on a straight-line basis over their estimated useful lives of seven years. Leasehold improvements are amortized on a straight-line basis over the terms of the related leases or estimated useful lives of the improvements, whichever period is shorter. Repairs and maintenance expenditures, which are not considered leasehold improvements and do not extend the useful life of the property and equipment, are expensed as incurred.

The Company performs a test for impairment whenever events or changes in circumstances indicate that the carrying amount of an individual asset or asset group may not be recoverable. Should projected undiscounted future cash flows be less than the carrying amount of the asset or asset group, an impairment charge reducing the carrying amount to fair value is required. Fair value is determined based on the most appropriate valuation technique, including discounted cash flows.

Goodwill

The Company is required to test goodwill for impairment annually, or more frequently if impairment indicators occur. Goodwill is tested for impairment based on the present value of discounted cash flows, and, if impaired, written down to fair value based on discounted cash flows. FactSet has three reporting units, which are consistent with the operating segments reported as there is no discrete financial information available for the subsidiaries within each operating segment. The reporting units evaluated for potential impairment were the U.S., Europe and Asia Pacific, which reflect the level of internal reporting the Company uses to manage its business and operations. The Company performed its annual goodwill impairment test during the fourth quarter of fiscal 2017, consistent with the timing of previous years, and concluded that there was no impairment, with the fair value of each of the Company's reporting units significantly exceeding carrying value.

Intangible Assets

FactSet's identifiable intangible assets consist of acquired content databases, client relationships, software technology, non-compete agreements and trade names resulting from acquisitions, which have been fully integrated into the Company's operations. Depending on the nature of the intangible asset, the identifiable intangible assets are amortized on either a straight-line or an accelerated basis using estimated useful lives ranging between two and twenty years. The remaining useful lives of intangible assets subject to amortization are evaluated quarterly to determine whether events and circumstances warrant a revision to the remaining period of amortization. If the estimate of the remaining useful life is changed, the remaining carrying amount of the intangible asset is amortized prospectively over that revised remaining useful life. These intangible assets have no assigned residual values. Intangible assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of such assets may not be recoverable. Determination of recoverability is based on an estimate of undiscounted future cash flows resulting from the use of the asset and its eventual disposition. Measurement of any impairment loss for intangible assets that management expects to hold and use is based on the amount the carrying value exceeds the fair value of the asset. No indicators of impairment of intangible assets has been identified during any of the fiscal years presented.

Accrued Liabilities

Accrued liabilities include estimates relating to employee compensation, operating expenses and tax liabilities. Approximately 15% of the Company's employee incentive compensation programs are discretionary. At the end of each fiscal year, FactSet conducts a final review of both Company and individual performance within each department to determine the amount of discretionary employee compensation. The Company also reviews compensation throughout the year to determine how overall performance tracks against management's expectations. Management takes these and other factors, including historical performance, into account in reviewing accrued compensation estimates quarterly and adjusting accrual rates as

appropriate. The amount of the variable employee compensation recorded within accrued compensation as of August 31, 2017 and 2016, was \$39.2 million and \$38.2 million, respectively.

Derivative Instruments

FactSet conducts business outside the U.S. in several currencies including the Indian Rupee, Philippine Peso, British Pound Sterling, Euro and Japanese Yen. As such, it is exposed to movements in foreign currency exchange rates compared to the U.S. dollar. The Company utilizes derivative instruments (foreign currency forward contracts) to manage the exposures related to the effects of foreign exchange rate fluctuations and reduce the volatility of earnings and cash flows associated with changes in foreign currency. The Company does not enter into foreign exchange forward contracts for trading or speculative purposes. In designing a specific hedging approach, FactSet considers several factors, including offsetting exposures, significance of exposures, forecasting risk and potential effectiveness of the hedge. These transactions are designated and accounted for as cash flow hedges in accordance with applicable accounting guidance. The changes in fair value for these foreign currency forward contracts are initially reported as a component of accumulated other comprehensive loss ("AOCL") and subsequently reclassified into operating expenses when the hedged exposure affects earnings. The gains and losses on foreign currency forward contracts mitigate the variability in operating expenses associated with currency movements. All derivatives are assessed for effectiveness at each reporting period.

Foreign Currency Translation

Certain wholly owned subsidiaries within the European and Asia Pacific segments operate under a functional currency different from the U.S. dollar, such as the British Pound Sterling, Euro, Japanese Yen, Indian Rupee and Philippine Peso. The financial statements of these foreign subsidiaries are translated into U.S. dollars using period-end rates of exchange for assets and liabilities, and average rates for the period for revenues and expenses. Translation gains and losses that arise from translating assets, liabilities, revenues and expenses of foreign operations are recorded in AOCL as a component of stockholders' equity. The accumulated foreign currency translation loss totaled \$38.5 million and \$67.3 million at August 31, 2017 and 2016, respectively.

Income and Deferred Taxes

Income tax expense is based on taxable income determined in accordance with currently enacted laws and tax rates. Deferred income taxes are recorded for the temporary differences between the financial statement and tax bases of assets and liabilities using currently enacted tax rates. FactSet recognizes the financial effect of an income tax position only if it is more likely than not (greater than 50%) that the tax position will prevail upon tax examination, based solely on the technical merits of the tax position as of the reporting date. Otherwise, no benefit or expense can be recognized in the consolidated financial statements. The tax benefits recognized are measured based on the largest benefit that has a greater than 50% likelihood of being realized upon ultimate settlement. Additionally, FactSet accrues interest on all tax exposures for which reserves have been established consistent with jurisdictional tax laws. Interest is classified as income tax expense in the financial statements. As of August 31, 2017, the Company had gross unrecognized tax benefits totaling \$11.5 million, including \$1.5 million of accrued interest, recorded as *Taxes Payable* (non-current) on the Consolidated Balance Sheet.

Stock-Based Compensation

Accounting guidance requires the measurement and recognition of compensation expense for all share-based payment awards made to employees and directors including stock options, restricted stock and common shares acquired under employee stock purchases based on estimated fair values of the share awards that are scheduled to vest during the period. FactSet uses the straight-line attribution method for all awards with graded vesting features and service conditions only. Under this method, the amount of compensation expense that is recognized on any date is at least equal to the vested portion of the award on that date. For all stock-based awards with performance conditions, the graded vesting attribution method is used by the Company to determine the monthly stock-based compensation expense over the applicable vesting periods.

As stock-based compensation expense recognized is based on awards ultimately expected to vest, it has been reduced for estimated forfeitures. Forfeitures are estimated at the time of grant and revised, if necessary, in subsequent periods if actual forfeitures differ from those estimates. Forfeitures are estimated based primarily on historical experience. Windfall tax benefits, defined as tax deductions that exceed recorded stock-based compensation, are classified as cash inflows from financing activities.

Performance-based stock options require management to make assumptions regarding the likelihood of achieving Company performance targets on a quarterly basis. The number of performance-based options that vest will be predicated on the Company achieving certain performance levels. A change in the financial performance levels the Company achieves could result in changes to FactSet's current estimate of the vesting percentage and related stock-based compensation.

Treasury Stock

The Company accounts for repurchased common stock under the cost method and includes such treasury stock as a component of its stockholders' equity. At the time treasury stock retirement is approved by FactSet's Board of Directors, the Company's accounting policy is to deduct its par value from common stock, reduce APIC by the amount recorded in APIC when the stock was originally issued and any remaining excess of cost as a deduction from retained earnings.

Operating Leases

The Company conducts all of its operations in leased facilities which have minimum lease obligations under non-cancelable operating leases. Certain of these leases contain rent escalations based on specified percentages. Most of the leases contain renewal options and require payments for taxes, insurance and maintenance. Rent expense is charged to operations as incurred except for escalating rents, which are charged to operations on a straight-line basis over the life of the lease. Lease incentives, relating to allowances provided by landlords, are amortized over the term of the lease as a reduction of rent expense. Costs associated with acquiring a subtenant, including broker commissions and tenant allowances, are amortized over the sublease term as a reduction of sublease income.

Business Combinations

The Company records acquisitions using the purchase method of accounting. All of the assets acquired, liabilities assumed, contractual contingencies and contingent consideration are recognized at their fair value on the acquisition date. The application of the purchase method of accounting for business combinations requires management to make significant estimates and assumptions in the determination of the fair value of assets acquired and liabilities assumed in order to properly allocate purchase price consideration between assets that are depreciated and amortized from goodwill. The excess of the fair value of purchase consideration over the fair values of these identifiable assets and liabilities is recorded as goodwill. Acquisition-related expenses and restructuring costs are recognized separately from the business combination and are expensed as incurred.

Concentrations of Risk

Cash and cash equivalents are maintained with several financial institutions. Deposits held with banks may exceed the amount of insurance provided on such deposits. Generally, these deposits may be redeemed upon demand and are maintained with financial institutions with reputable credit and therefore bear minimal credit risk. The Company seeks to mitigate its credit risks by spreading such risks across multiple counterparties and monitoring the risk profiles of these counterparties.

New Accounting Standards or Updates Recently Adopted

As of the beginning of fiscal 2017, FactSet implemented all applicable new accounting standards and updates issued by the Financial Accounting Standards Board ("FASB") that were in effect. There were no new standards or updates adopted during the last three fiscal years that had a material impact on the consolidated financial statements.

Revenue Recognition

In May 2014 and July 2015, the FASB issued accounting standard updates which provide clarified principles for recognizing revenue arising from contracts with clients and supersede most current revenue recognition guidance, including industry-specific guidance. The core principle of the revenue model is that an entity recognizes revenue to depict the transfer of promised goods or services to clients in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. These accounting standard updates will be effective for FactSet beginning in the first quarter of fiscal 2019, with early adoption in fiscal 2018 permitted and allow for either full retrospective or modified retrospective adoption. The Company is currently evaluating the impact of these accounting standard updates on its consolidated financial statements including the method of adoption.

Balance Sheet Classification of Deferred Taxes

In November 2015, the FASB issued an accounting standard update to simplify the presentation of deferred taxes on the balance sheet. The accounting standard update will require an entity to present all deferred tax assets and deferred tax liabilities as non-current on the balance sheet. Under the current guidance, entities are required to separately present deferred taxes as current or non-current. Netting deferred tax assets and deferred tax liabilities by tax jurisdiction will still be required under the new guidance. This guidance is effective for FactSet beginning in the first quarter of fiscal 2018. The accounting standard update is a change in balance sheet presentation only and, as such, the Company does not believe this new accounting standard update will have a material impact on its consolidated financial statements

Recognition and Measurement of Financial Assets and Financial Liabilities

In January 2016, the FASB issued an accounting standard update to amend its current guidance on the classification and measurement of certain financial instruments. The accounting standard update significantly revises an entity's accounting related to the presentation of certain fair value changes for financial liabilities measured at fair value. This guidance also amends certain disclosure requirements associated with the fair value of financial instruments. This guidance will be effective for FactSet beginning in the first quarter of fiscal 2019. The Company is currently evaluating the impact of this accounting standard update on its consolidated financial statements.

Leases

In February 2016, the FASB issued an accounting standard update related to accounting for leases. The guidance introduces a lessee model that requires most leases to be reported on the balance sheet. The accounting standard update aligns many of the underlying principles of the new lessor model with those in the FASB's new revenue recognition standard. The guidance also eliminates the requirement in current U.S. GAAP for an entity to use bright-line tests in determining lease classification. This accounting standard update will be effective for FactSet beginning in the first quarter of fiscal 2020, with early adoption in fiscal 2019 permitted. The Company is currently evaluating the impact of this accounting standard update on its consolidated financial statements.

Share-Based Payments

In March 2016, the FASB issued an accounting standard update which simplifies several aspects of the accounting for employee share-based payment transactions, including the accounting for income taxes, forfeitures and statutory tax withholding requirements, as well as classification in the statement of cash flow. This accounting standard update will be effective for FactSet beginning in the first quarter of fiscal 2018. The Company believes that the adoption of this accounting standard will increase the volatility within our provision for income taxes, as all excess tax benefits or deficiencies related to share-based payments that were previously reported within equity will now be recognized in the statement of income. In addition, excess tax benefits were historically reflected as a financing activity in the statements of cash flows, and after adoption, will be included within operating activities. Share-based payment expense will continue to reflect estimated forfeitures of share-based payment awards. The Company is unable to quantify the impact on the adoption of this standard in fiscal 2018 due to the amount of variables that impact the calculation of the excess tax benefits, including the future stock price of FactSet and the volume of employee stock option exercises.

In May 2017, the FASB issued an accounting standard update, which amends the scope of modification accounting for share-based payment arrangements. The guidance focuses on changes to the terms or conditions of share-based payment awards that would require the application of modification accounting and specifies that an entity would not apply modification accounting if the fair value, vesting conditions and classification of the awards are the same immediately before and after the modification. This accounting standard update will be effective for FactSet beginning in the first quarter of fiscal 2019, with early adoption permitted. The Company is currently evaluating the impact of this accounting standard update on its consolidated financial statements.

Cash Flow Simplification

In August 2016, the FASB issued an accounting standard update which simplifies how certain transactions are classified in the statement of cash flows. This includes revised guidance on the cash flow classification of debt prepayments and debt extinguishment costs, contingent consideration payments made after a business combination and distributions received from equity method investments. The guidance is intended to reduce diversity in practice across all industries. This accounting standard update will be effective for FactSet beginning in the first quarter of fiscal 2019. The Company is currently evaluating the impact of this accounting standard update on its consolidated financial statements.

Income Taxes on Intra-Entity Transfers of Assets

In October 2016, the FASB issued an accounting standard update which removes the prohibition against the immediate recognition of the current and deferred income tax effects of intra-entity transfers of assets other than inventory. The guidance is intended to reduce diversity in practice related to the tax consequences of certain types of intra-entity asset transfers, particularly those involving intellectual property. This accounting standard update will be effective for FactSet beginning in the first quarter of fiscal 2019. The Company is currently evaluating the impact of this accounting standard update on its consolidated financial statements.

Goodwill Impairment Test

In January 2017, the FASB issued an accounting standard update which removes the requirement for companies to compare the implied fair value of goodwill with its carrying amount as part of step 2 of the goodwill impairment test. A goodwill impairment will now be the amount by which a reporting unit's carrying value exceeds its fair value, not to exceed the carrying

amount of goodwill. This accounting standard update will be effective for FactSet beginning in the first quarter of fiscal 2021, with early adoption permitted for any impairment tests performed after January 1, 2017 and is not expected to have a material impact on the Company.

Hedge Accounting Simplification

In August 2017, the FASB issued an accounting standard update to reduce the complexity of and simplify the application of hedging accounting. The guidance refines and expands hedge accounting for both financial and nonfinancial risk components, eliminates the need to separately measure and report hedge ineffectiveness, and aligns the recognition and presentation of the effects of the hedging instrument and the hedged item in the financial statements. This guidance will be effective for FactSet beginning in the first quarter of fiscal 2020, with early adoption permitted. The Company is currently evaluating the impact of this accounting standard update on its consolidated financial statements.

No other new accounting pronouncements issued or effective as of August 31, 2017, have had or are expected to have an impact on the Company's consolidated financial statements.

4. FAIR VALUE MEASURES

Fair value is defined as the price that would be received from selling an asset or paid to transfer a liability (i.e., the "exit price") in an orderly transaction between market participants at the measurement date. In determining fair value, the use of various valuation methodologies, including market, income and cost approaches is permissible. The Company considers the principal or most advantageous market in which it would transact and considers assumptions that market participants would use when pricing the asset or liability.

Fair Value Hierarchy

The accounting guidance for fair value measurements establishes a fair value hierarchy that requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. There are three levels of inputs that may be used to measure fair value based on the reliability of inputs. A financial instrument's categorization within the fair value hierarchy is based upon the lowest level of input that is significant to the fair value measurement. The Company's assessment of the significance of a particular input to the fair value measurement requires judgment and may affect their placement within the fair value hierarchy levels. FactSet has categorized its cash equivalents, investments and derivatives within the fair value hierarchy as follows:

Level 1 - applies to assets or liabilities for which there are quoted prices in active markets for identical assets or liabilities. These Level 1 assets and liabilities include FactSet's corporate money market funds that are classified as cash equivalents.

Level 2 - applies to assets or liabilities for which there are inputs other than quoted prices that are observable for the asset or liability such as quoted prices for similar assets or liabilities in active markets; quoted prices for identical assets or liabilities in markets with insufficient volume or infrequent transactions (less active markets); or model-derived valuations in which significant inputs are observable or can be derived principally from, or corroborated by, observable market data. The Company's certificates of deposit and derivative instruments are classified as Level 2.

Level 3 - applies to assets or liabilities for which there are unobservable inputs to the valuation methodology that are significant to the measurement of the fair value of the assets or liabilities. There were no Level 3 assets or liabilities held by FactSet as of August 31, 2017 or 2016.

(a) Assets and Liabilities Measured at Fair Value on a Recurring Basis

The following tables shows by level within the fair value hierarchy the Company's assets and liabilities that are measured at fair value on a recurring basis at August 31, 2017 and 2016:

(in thousands)	Fair Value Measurements at August 31, 2017			
	Level 1	Level 2	Level 3	Total
Assets				
Corporate money market funds ⁽¹⁾	\$ 26,677	\$ —	\$ —	\$ 26,677
Mutual Funds ⁽²⁾	—	18,364	—	18,364
Certificates of deposit ⁽³⁾	—	14,080	—	14,080
Derivative instruments ⁽⁴⁾	—	6,142	—	6,142
<i>Total assets measured at fair value</i>	<i>\$ 26,677</i>	<i>\$ 38,586</i>	<i>\$ —</i>	<i>\$ 65,263</i>
Liabilities				
Derivative instruments ⁽⁴⁾	\$ —	\$ —	\$ —	\$ —
<i>Total liabilities measured at fair value</i>	<i>\$ —</i>	<i>\$ —</i>	<i>\$ —</i>	<i>\$ —</i>

(in thousands)	Fair Value Measurements at August 31, 2016			
	Level 1	Level 2	Level 3	Total
Assets				
Corporate money market funds ⁽¹⁾	\$ 92,765	\$ —	\$ —	\$ 92,765
Certificates of deposit ⁽³⁾	—	24,217	—	24,217
Derivative instruments ⁽⁴⁾	—	869	—	869
<i>Total assets measured at fair value</i>	<i>\$ 92,765</i>	<i>\$ 25,086</i>	<i>\$ —</i>	<i>\$ 117,851</i>
Liabilities				
Derivative instruments ⁽⁴⁾	\$ —	\$ 2,791	\$ —	\$ 2,791
<i>Total liabilities measured at fair value</i>	<i>\$ —</i>	<i>\$ 2,791</i>	<i>\$ —</i>	<i>\$ 2,791</i>

⁽¹⁾ The Company's corporate money market funds are traded in an active market and the net asset value of each fund on the last day of the quarter is used to determine its fair value. As such, the Company's corporate money market funds are classified as Level 1 and included in Cash and cash equivalents within the Consolidated Balance Sheets.

⁽²⁾ The Company's mutual funds have a fair value based on the fair value of the underlying investments held by the mutual funds allocated to each share of the mutual fund using a net asset value approach. The fair value of the underlying investments is based on observable inputs. As such, the Company's mutual funds are classified as Level 2 and are classified as investments (short-term) on the Consolidated Balance Sheets.

⁽³⁾ The Company's certificates of deposit held for investment are not debt securities and are classified as Level 2. These certificates of deposit have original maturities greater than three months, but less than one year and, as such, are classified as Investments (short-term) within the Consolidated Balance Sheets.

⁽⁴⁾ The Company utilizes the income approach to measure fair value for its derivative instruments (foreign exchange forward contracts). The income approach uses pricing models that rely on market observable inputs such as spot, forward and interest rates, as well as credit default swap spreads and therefore are classified as Level 2.

The Company did not have any transfers between Level 1 and Level 2 fair value measurements during the periods presented.

(b) Assets and Liabilities Measured at Fair Value on a Non-recurring Basis

Certain assets, including goodwill and intangible assets, and liabilities, are measured at fair value on a non-recurring basis; that is, the assets and liabilities are not measured at fair value on an ongoing basis but are subject to fair value adjustments in certain circumstances such as when they are deemed to be other-than-temporarily impaired. The fair values of these non-financial assets and liabilities are determined based on valuation techniques using the best information available, and may include quoted market prices, market comparables, and discounted cash flow projections. An impairment charge is recorded when the cost exceeds its fair value, based upon the results of such valuations. During fiscal 2017 and 2016, no fair value adjustments or material fair value measurements were required for the Company's non-financial assets or liabilities.

(c) Assets and Liabilities Measured at Fair Value for Disclosure Purposes only

As of August 31, 2017 and 2016, the fair value of the Company's long-term debt was \$575.0 million and \$300.0 million, respectively, which approximated its carrying amount given its floating interest rate basis. The fair value of the Company's long-term debt was determined based on quoted market prices for debt with a similar maturity, and thus categorized as Level 2 in the fair value hierarchy.

5. DERIVATIVE INSTRUMENTS

Cash Flow Hedges

FactSet conducts business outside the U.S. in several currencies including the British Pound Sterling, Euro, Indian Rupee, Japanese Yen and Philippine Peso. As such, it is exposed to movements in foreign currency exchange rates compared to the U.S. dollar. The Company utilizes derivative instruments (foreign currency forward contracts) to manage the exposures related to the effects of foreign exchange rate fluctuations and reduce the volatility of earnings and cash flows associated with changes in foreign currency. The Company does not enter into foreign currency forward contracts for trading or speculative purposes. In designing a specific hedging approach, FactSet considered several factors, including offsetting exposures, the significance of exposures, the forecasting of risk and the potential effectiveness of the hedge. The gains and losses on foreign currency forward contracts offset the variability in operating expenses associated with currency movements. The changes in fair value for these foreign currency forward contracts are initially reported as a component of AOCL and subsequently reclassified into operating expenses when the hedged exposure affects earnings. There was no discontinuance of cash flow hedges during fiscal 2017 or 2016, and as such, no corresponding gains or losses related to changes in the value of the Company's contracts were reclassified into earnings prior to settlement.

As of August 31, 2017, FactSet maintained foreign currency forward contracts to hedge approximately 75% of its Indian Rupee exposure through the third quarter of fiscal 2019.

The following is a summary of all hedging positions and corresponding fair values:

Currency Hedged <i>(in thousands, in U.S. dollars)</i>	Gross Notional Value		Fair Value (Liability) Asset	
	August 31, 2017	August 31, 2016	August 31, 2017	August 31, 2016
British Pound Sterling	\$ —	\$ 33,280	\$ —	\$ (2,791)
Indian Rupee	51,000	58,410	6,142	869
Total	\$ 51,000	\$ 91,690	\$ 6,142	\$ (1,922)

As of August 31, 2017, the gross notional value of foreign currency forward contracts to purchase Indian Rupees with U.S. dollars was Rs. 3.8 billion.

Counterparty Credit Risk

As a result of the use of derivative instruments, the Company is exposed to counterparty credit risk. FactSet has incorporated counterparty risk into the fair value of its derivative assets and its own credit risk into the value of the Company's derivative liabilities. FactSet calculates credit risk from observable data related to credit default swaps ("CDS") as quoted by publicly available information. Counterparty risk is represented by CDS spreads related to the senior secured debt of the respective bank with whom FactSet has executed these derivative transactions. Because CDS spread information is not available for FactSet, the Company's credit risk is determined based on using a simple average of CDS spreads for peer companies. To mitigate counterparty credit risk, FactSet enters into contracts with large financial institutions. The Company regularly reviews its credit exposure balances as well as the creditworthiness of the counterparties. The Company does not expect any losses as a result of default of its counterparties.

Fair Value of Derivative Instruments

The following tables provide a summary of the fair value amounts of derivative instruments and gains and losses on derivative instruments:

Designation of Derivatives <i>(in thousands)</i>	Balance Sheet Location	August 31, 2017	August 31, 2016
Derivatives designated as hedging instruments	Assets: Foreign Currency Forward Contracts		
	Prepaid expenses and other current assets	\$ 3,796	\$ 163
	Other assets	\$ 2,346	\$ 706
	Liabilities: Foreign Currency Forward Contracts		
	Accounts payable and accrued expenses	\$ —	\$ 2,791
	Deferred rent and other non-current liabilities	\$ —	\$ —

All derivatives were designated as hedging instruments as of August 31, 2017 and 2016, respectively.

Derivatives in Cash Flow Hedging Relationships

The following table provides the pre-tax effect of derivative instruments in cash flow hedging relationships for the each of the three fiscal years ended August 31,

(in thousands):

Derivatives in Cash Flow Hedging Relationships	Gain (Loss) Recognized in AOCL on Derivatives (Effective Portion)			Location of Loss Reclassified from AOCL into Income (Effective Portion)	Loss Reclassified from AOCL into Income (Effective Portion)		
	2017	2016	2015		2017	2016	2015
Foreign currency forward contracts	\$ 5,183	\$ (1,806)	\$ (1,939)	SG&A	\$ (2,883)	\$ (451)	\$ (559)

No amount of ineffectiveness was recorded in the Consolidated Statements of Income for these designated cash flow hedges and all components of each derivative's gain or loss was included in the assessment of hedge effectiveness. As of August 31, 2017, FactSet estimates that \$3.8 million of net derivative gains related to its cash flow hedges included in AOCL will be reclassified into earnings within the next 12 months.

Offsetting of Derivative Instruments

FactSet's master netting and other similar arrangements with its respective counterparties allow for net settlement under certain conditions. As of August 31, 2017 and 2016, there were no net settlements recorded on Consolidated Balance Sheets.

6. OTHER COMPREHENSIVE (LOSS) INCOME AND ACCUMULATED OTHER COMPREHENSIVE LOSS

The components of other comprehensive (loss) income during the fiscal years ended August 31, 2017, 2016 and 2015 are as follows:

(in thousands)

	August 31, 2017		August 31, 2016		August 31, 2015	
	Pre-tax	Net of tax	Pre-tax	Net of tax	Pre-tax	Net of tax
Foreign currency translation adjustments	\$ 28,816	\$ 28,816	\$ (23,644)	\$ (23,644)	\$ (25,263)	\$ (25,263)
Realized loss on cash flow hedges reclassified to earnings ⁽¹⁾	2,883	1,813	451	284	559	352
Unrealized gain (loss) on cash flow hedges recognized in AOCL	5,183	3,204	(1,806)	(1,141)	(1,939)	(1,220)
<i>Other comprehensive income (loss)</i>	\$ 36,882	\$ 33,833	\$ (24,999)	\$ (24,501)	\$ (26,643)	\$ (26,131)

⁽¹⁾ Reclassified to Selling, General and Administrative Expenses

The components of AOCL are as follows:

(in thousands)

	August 31, 2017	August 31, 2016
Accumulated unrealized losses on cash flow hedges, net of tax	\$ 3,802	\$ (1,215)
Accumulated foreign currency translation adjustments	(38,522)	(67,338)
<i>Total accumulated other comprehensive loss</i>	\$ (34,720)	\$ (68,553)

7. SEGMENT INFORMATION

Operating segments are defined as components of an enterprise that engage in business activities from which they may earn revenues and incur expenses, whose operating results are regularly reviewed by the enterprise's chief operating decision maker to make decisions about resources to be allocated to the segment and assess its performance, and for which discrete financial information is available. Financial information at the operating segment level is reviewed jointly by the Chief Executive Officer ("CEO") and senior management. Senior management consists of executives who directly report to the CEO, comprising the Chief Financial Officer, Chief Operating Officer, Global Head of Sales and Client Solutions, General Counsel, and Chief Human Resources Officer. Senior management, along with the CEO, constitute FactSet's chief operating decision making group ("CODMG") and is responsible for making decisions about resources allocated among the operating segments based on actual results.

FactSet's operating segments are aligned with how the Company, including its CODMG, manages the business and the demographic markets in which FactSet serves. The Company's internal financial reporting structure is based on three

segments; the U.S., Europe and Asia Pacific. FactSet believes this alignment helps it better manage the business and view the markets the Company serves, which are centered on providing integrated global financial and economic information. Sales, consulting, data collection, product development and software engineering are the primary functional groups within the U.S., Europe and Asia Pacific segments that provide global financial and economic information to investment managers, investment banks and other financial services professionals. The U.S. segment services investment professionals including financial institutions throughout the Americas. The European and Asia Pacific segments service investment professionals located throughout Europe and the Asia Pacific region, respectively. The accounting policies of the segments are the same as those described in the Note 3, *Summary of Significant Accounting Policies*.

The European segment maintains office locations in Bulgaria, Dubai, England, France, Germany, Italy, Latvia, the Netherlands, Spain, and Switzerland. The Asia Pacific segment has office locations in Australia, Hong Kong, India, Japan, and Singapore. Segment revenues reflect direct sales to clients based in their respective geographic locations. There are no intersegment or intercompany sales of FactSet services. Each segment records compensation expense, including stock-based compensation, amortization of intangible assets, depreciation of furniture and fixtures, amortization of leasehold improvements, communication costs, professional fees, rent expense, travel, marketing, office and other direct expenses.

Expenditures associated with the Company's data centers, third party data costs and corporate headquarters charges are recorded by the U.S. segment and are not allocated to the other segments. The content collection centers located in India and the Philippines benefit all of the Company's operating segments and thus the expenses incurred at these locations are allocated to each segment based on a percentage of revenues. Of the total \$707.6 million of goodwill reported by the Company at August 31, 2017, 54% was recorded in the U.S. segment, 45% in the European segment and the remaining 1% in the Asia Pacific segment.

The following reflects the results of operations of the segments consistent with the Company's management system. These results are used, in part, by management, both in evaluating the performance of, and in allocating resources to, each of the segments.

(in thousands)

Year Ended August 31, 2017	U.S.		Europe		Asia Pacific		Total

GEOGRAPHIC INFORMATION - The following table sets forth information for those countries that are 10% or more of revenues:

Years ended August 31,

<i>(in thousands)</i>	2017	2016	2015
Revenues⁽¹⁾			
United States	\$ 784,146	\$ 755,492	\$ 678,774
United Kingdom	163,732	154,902	144,769
All other European countries	166,600	122,780	106,753
Asia Pacific	106,701	93,918	76,472
Total revenues	\$ 1,221,179	\$ 1,127,092	\$ 1,006,768

⁽¹⁾ Revenues are attributed to countries based on the location of the client.

The following table sets forth long-lived assets by geographic area:

At August 31,

<i>(in thousands)</i>	2017	2016	2015
Long-lived Assets⁽¹⁾			
United States	\$ 79,299	\$ 70,646	\$ 49,923
United Kingdom	6,012	5,772	3,655
All other European countries	6,306	1,018	1,322
Asia Pacific	8,837	7,186	4,364
Total long-lived assets	\$ 100,454	\$ 84,622	\$ 59,264

⁽¹⁾ Long-lived assets consist of property, equipment and leasehold improvements, net of accumulated depreciation and amortization and exclude goodwill, intangible assets, deferred taxes and other assets.

8. BUSINESS COMBINATIONS

BISAM

On March 17, 2017, FactSet acquired BI-SAM Technologies (“BISAM”) for a total purchase price of \$217.6 million. BISAM is a global provider of portfolio performance and attribution, multi-asset risk, GIPS composites management and reporting. BISAM’s product offerings include B-One, BISAM’s cross-asset solution, which will serve as a complement to both FactSet’s portfolio analytics suite and client reporting solutions, and Cognity, which enhances FactSet’s risk analysis for derivatives and quantitative portfolio construction. These factors contributed to a purchase price in excess of fair value of BISAM’s net tangible and intangible assets, leading to the recognition of goodwill. At the time of acquisition, BISAM employed over 160 employees based primarily in its New York, Boston, Paris, London and Sofia offices. Total transaction costs related to the acquisition were \$3.2 million in fiscal 2017 and were recorded within Selling, General and Administrative (“SG&A”) expenses in the Consolidated Statements of Income.

Allocation of the purchase price to the assets acquired and liabilities assumed was finalized during the fourth quarter of fiscal 2017. There were no significant adjustments between the preliminary and final allocation. The total purchase price was allocated to BISAM’s net tangible and intangible assets based upon their estimated fair value as of the date of acquisition.

(in thousands)

Tangible assets acquired	\$	27,583
Amortizable intangible assets		
Software technology		18,261
Client relationships		37,597
Trade name		741
Goodwill		173,898
Total assets acquired	\$	258,080
Liabilities assumed		(40,443)
Net assets acquired	\$	217,637

Intangible assets of \$56.6 million have been allocated to amortizable intangible assets consisting of client relationships, amortized over 16 years using an accelerated amortization method; software technology, amortized over five years using a straight-line amortization method; and a trade name, amortized over four years using a straight-line amortization method.

Goodwill totaling \$173.9 million represents the excess of the purchase price over the fair value of the net tangible and intangible assets acquired. Goodwill generated from the BISAM acquisition is included in the US and European segments and is not deductible for income tax purposes. The results of operations of BISAM have been included in the Company's Consolidated Statements of Income since the completion of the acquisition on March 17, 2017. Pro forma information has not been presented because the effect of the BISAM acquisition is not material to the Company's consolidated financial results.

Vermilion

On November 8, 2016, FactSet acquired Vermilion Holdings Limited ("Vermilion") for a total purchase price of \$67.9 million. Vermilion is a global provider of client reporting and communications software and services to the financial services industry. Client reporting is a growing area of the market as regulatory requirements rise and with the acquisition of Vermilion and its Vermilion Reporting Suite ("VRS"), FactSet now offers a workflow around all elements of the client reporting process, which it expects will expand as investors grow increasingly sophisticated. This factor contributed to a purchase price in excess of fair value of Vermilion's net tangible and intangible assets, leading to the recognition of goodwill. At the time of acquisition, Vermilion employed 59 individuals in its London, Boston and Singapore offices. Total transaction costs related to the acquisition were \$0.7 million in fiscal 2017 and recorded within SG&A expenses in the Consolidated Statements of Income.

Allocation of the purchase price to the assets acquired and liabilities assumed was finalized during the third quarter of fiscal 2017. There were no significant adjustments between the preliminary and final allocation. The total purchase price was allocated to Vermilion's net tangible and intangible assets based upon their estimated fair value as of the date of acquisition. Based upon the purchase price and the valuation, the allocation is as follows:

(in thousands)

Tangible assets acquired	\$	7,916
Amortizable intangible assets		
Software technology		10,916
Client relationships		5,954
Non-compete agreements		806
Trade name		571
Goodwill		51,157
Total assets acquired	\$	77,320
Liabilities assumed		(9,434)
Net assets acquired	\$	67,886

Intangible assets of \$18.2 million have been allocated to amortizable intangible assets consisting of client relationships, amortized over 15 years using an accelerated amortization method; software technology, amortized over six years using a straight-line amortization method; non-compete agreements, amortized over three years using a straight-line amortization method; and a trade name, amortized over four years using a straight-line amortization method.

Goodwill totaling \$51.2 million represents the excess of the purchase price over the fair value of the net tangible and intangible assets acquired. Goodwill generated from the Vermilion acquisition is included in the European segment and is not deductible for income tax purposes. The results of operations of Vermilion have been included in the Company's Consolidated Statements of Income since the completion of the acquisition on November 8, 2016. Pro forma information has not been presented because the effect of the Vermilion acquisition is not material to the Company's consolidated financial results.

Portware LLC

On October 16, 2015, FactSet acquired Portware LLC ("Portware") for a total purchase price of \$263.6 million. At the time of acquisition, Portware employed 166 individuals in its New York, London, Hong Kong, and Hyderabad, India offices. Portware is a global provider of multi-asset trade automation solutions for mega and large asset managers. With the acquisition of Portware, FactSet now offers a platform that it expects will increase value to global asset managers by expanding its capabilities to include multi-asset trade automation. This factor contributed to a purchase price in excess of fair value of Portware's net tangible and intangible assets, leading to the recognition of goodwill. Total transaction costs related to the acquisition were \$0.7 million for the year ended August 31, 2016. These transaction expenses were recorded within SG&A expenses in the Consolidated Statements of Income.

The total purchase price was allocated to Portware’s net tangible and intangible assets based upon their estimated fair value as of the date of acquisition. Based upon the purchase price and the valuation, the allocation is as follows:

(in thousands)

Tangible assets acquired	\$	9,656
Amortizable intangible assets		
Software technology		43,000
Client relationships		27,000
Non-compete agreements		3,500
Trade name		2,000
Goodwill		187,378
Total assets acquired	\$	272,534
Liabilities assumed		(8,951)
Net assets acquired	\$	263,583

Intangible assets of \$75.5 million have been allocated to amortizable intangible assets consisting of client relationships, amortized over 16 years using an accelerated amortization method; software technology, amortized over eight years using a straight-line amortization method; non-compete agreements, amortized over seven years using a straight-line amortization method; and a trade name, amortized over five years using a straight-line amortization method.

Goodwill totaling \$187.4 million represents the excess of the purchase price over the fair value of the net tangible and intangible assets acquired and is included in the U.S. segment. Approximately 77% of the total goodwill generated from the Portware acquisition is deductible for income tax purposes. The results of operations of Portware have been included in the Company’s Consolidated Statements of Income since the completion of the acquisition on October 16, 2015. Pro forma information has not been presented because the effect of the Portware acquisition is not material to the Company’s consolidated financial results.

9. DISPOSITIONS

During the third quarter of fiscal 2016, the Company entered into a definitive stock purchase agreement (the “Purchase Agreement”) pursuant to which the Company agreed to sell its market research business, consisting of Market Metrics LLC and Matrix-Data Limited (collectively “Market Metrics” or the “disposal group”) and associated assets (the “Transaction”). On July 1, 2016, FactSet completed the Transaction and received \$165.0 million in cash, less estimated working capital and certain adjustments set forth in the Purchase Agreement, including a \$9.7 million bonus adjustment amount. The Company recognized a pre-tax gain on the sale of \$112.5 million in fourth quarter of fiscal 2016, which is recorded within *other (expense) income* in the Consolidated Statements of Income. In the second quarter of fiscal 2017, the Company finalized the working capital adjustment and recognized a pre-tax loss of \$1.2 million within *other (expense) income* in the Consolidated Statements of Income.

The Company assessed the Transaction and the disposal group and determined that the sale does not represent a strategic shift in its business that has a major effect on its consolidated results of operations, financial position or cash flows. Accordingly, the disposal group is not presented in the consolidated financial statements as a discontinued operation. The results of the disposal group through the date the Transaction closed are reported within the U.S. segment (for Market Metrics LLC) and the European segment (for Matrix-Data Limited).

10. GOODWILL

Changes in the carrying amount of goodwill by segment for fiscal years ended August 31, 2017 and 2016 are as follows:

(in thousands)	U.S.		Europe		Asia Pacific		Total	
Balance at August 31, 2015	\$	211,869	\$	93,725	\$	2,693	\$	308,287
Acquisitions and other adjustments		187,352		—		—		187,352
Disposition		(31,741)		(665)		—		(32,406)
Foreign currency translations		—		(10,780)		462		(10,318)
Balance at August 31, 2016	\$	367,480	\$	82,280	\$	3,155	\$	452,915
Acquisitions and other adjustments		19,355		216,047		—		235,402
Foreign currency translations		—		19,432		(189)		19,243
Balance at August 31, 2017	\$	386,835	\$	317,759	\$	2,966	\$	707,560

Goodwill is not amortized as it is estimated to have an indefinite life. At least annually, the Company is required to test goodwill at the reporting unit level for potential impairment, and, if impaired, write down to fair value based on the present value of discounted cash flows. The Company’s reporting units evaluated for potential impairment were the U.S., Europe and Asia

Pacific, which reflect the level of internal reporting the Company uses to manage its business and operations. The three reporting units are consistent with the operating segments reported as there is no discrete financial information available for the subsidiaries within each operating segment. The Company performed its annual goodwill impairment test during the fourth quarter of fiscal 2017, consistent with the timing of previous years, at which time it was determined that there was no impairment, with the fair value of each of the Company's reporting units significantly exceeding carrying value. During fiscal 2017 the Company acquired goodwill of \$235.4 million representing the excess of the purchase price over the fair value of the net tangible and intangible assets from acquisitions completed in fiscal 2017.

11. INTANGIBLE ASSETS

FactSet's identifiable intangible assets consist of acquired content databases, client relationships, software technology, non-compete agreements and trade names resulting from previous acquisitions, which have been fully integrated into the Company's operations. The weighted average useful life of the Company's acquired intangible assets at August 31, 2017 was 11.5 years. The Company amortizes intangible assets over their estimated useful lives, which are evaluated quarterly to determine whether events and circumstances warrant a revision to the remaining period of amortization. There were no changes to the estimate of the remaining useful lives during fiscal years 2017, 2016 and 2015. Amortizable intangible assets are tested for impairment, if indicators are present, based on undiscounted cash flows, and, if impaired, written down to fair value based on discounted cash flows. No impairment of intangible assets has been identified during any of the periods presented. The intangible assets have no assigned residual values.

During fiscal 2017, \$93.2 million of intangible assets were acquired with a weighted average useful life of 11.5 years. The details of the intangible assets acquired during fiscal 2017 are outlined as follows:

Acquired Intangible Assets Allocation <i>(in thousands)</i>	Amortization Period	Acquisition Cost
Client relationships	16.1 years	\$ 50,152
Software technology	6.3 years	40,826
Non-compete agreements	3.1 years	862
Trade name	4.0 years	1,354
<i>Total</i>	11.5 years	\$ 93,194

The gross carrying amounts and accumulated amortization totals related to the Company's identifiable intangible assets are as follows:

At August 31, 2017 <i>(in thousands)</i>	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount
Data content	\$ 34,116	\$ 18,899	\$ 15,217
Client relationships	99,779	22,339	77,440
Software technology	105,963	30,889	75,074
Non-compete agreements	4,833	1,518	3,315
Trade names	4,080	1,583	2,497
<i>Total</i>	\$ 248,771	\$ 75,228	\$ 173,543

At August 31, 2016 <i>(in thousands)</i>	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount
Data content	\$ 34,167	\$ 16,758	\$ 17,409
Client relationships	45,185	16,480	28,705
Software technology	62,560	20,545	42,015
Non-compete agreements	4,344	1,118	3,226
Trade names	2,728	922	1,806
<i>Total</i>	\$ 148,984	\$ 55,823	\$ 93,161

Amortization expense recorded for intangible assets during fiscal years 2017, 2016 and 2015 was \$19.9 million, \$14.8 million and \$8.2 million, respectively. As of August 31, 2017, estimated intangible asset amortization expense for each of the next five years and thereafter are as follows:

Fiscal Year <i>(in thousands)</i>	Estimated Amortization Expense	
2018	\$	24,475
2019		23,634
2020		22,978
2021		21,404
2022		19,081
Thereafter		61,971
<i>Total</i>	\$	173,543

12. PROPERTY, EQUIPMENT AND LEASEHOLD IMPROVEMENTS

Property, equipment and leasehold improvements consist of the following:

<i>(in thousands)</i>	August 31,	
	2017	2016
Leasehold improvements	\$ 113,760	\$ 103,238
Computers and related equipment	138,195	110,661
Furniture and fixtures	42,532	39,375
<i>Subtotal</i>	\$ 294,487	\$ 253,274
Less accumulated depreciation and amortization	(194,033)	(168,652)
Property, equipment and leasehold improvements, net	\$ 100,454	\$ 84,622

Depreciation expense was \$28.0 million, \$23.3 million and \$23.1 million for fiscal years 2017, 2016 and 2015, respectively.

13. COMMON STOCK AND EARNINGS PER SHARE

On May 5, 2017, FactSet's Board of Directors approved a 12.0% increase in the regular quarterly dividend from \$0.50 to \$0.56 per share, or \$2.24 per share per annum.

Shares of common stock outstanding were as follows:

<i>(in thousands)</i>	Years ended August 31,		
	2017	2016	2015
Balance, beginning of year (September 1)	40,038	41,317	41,793
Common stock issued for employee stock plans	693	823	1,213
Repurchase of common stock from employees ⁽¹⁾	(50)	(28)	(23)
Repurchase of common stock under the share repurchase program	(1,555)	(1,478)	(1,666)
Repurchase of common stock under accelerated share repurchase agreement	(103)	(596)	—
Balance, end of year (August 31)	39,023	40,038	41,317

⁽¹⁾ For fiscal 2017, 2016 and 2015, the Company repurchased 49,771, 27,625 and 23,192 shares, or \$7.8 million, \$4.5 million and \$3.1 million, of common stock, respectively, in settlement of employee tax withholding obligations due upon the vesting of restricted stock.

A reconciliation of the weighted average shares outstanding used in the basic and diluted EPS computations is as follows:

<i>(in thousands, except per share data)</i>	Net Income (Numerator)	Weighted Average Common Shares (Denominator)	Per Share Amount
For the year ended August 31, 2017			
Basic EPS			
Income available to common stockholders	\$ 258,259	39,444	\$ 6.55
Diluted EPS			
Dilutive effect of stock options and restricted stock		198	
Income available to common stockholders plus assumed conversions	\$ 258,259	39,642	\$ 6.51
For the year ended August 31, 2016			
Basic EPS			
Income available to common stockholders	\$ 338,815	40,880	\$ 8.29
Diluted EPS			
Dilutive effect of stock options and restricted stock		485	
Income available to common stockholders plus assumed conversions	\$ 338,815	41,365	\$ 8.19
For the year ended August 31, 2015			
Basic EPS			
Income available to common stockholders	\$ 241,051	41,572	\$ 5.80
Diluted EPS			
Dilutive effect of stock options and restricted stock		663	
Income available to common stockholders plus assumed conversions	\$ 241,051	42,235	\$ 5.71

Dilutive potential common shares consist of stock options and unvested restricted stock. There were 704,786, 507,658 and 88,090 stock options excluded from the fiscal 2017, 2016 and 2015 calculations of diluted EPS, respectively, because their inclusion would have been anti-dilutive.

As of August 31, 2017, 2016 and 2015, 415,061, 782,843 and 478,945, respectively, performance-based stock options were excluded from the calculation of diluted EPS. Performance-based stock options are omitted from the calculation of diluted EPS until the performance criteria is considered probable of being met.

14. STOCKHOLDERS' EQUITY

Preferred Stock

At August 31, 2017 and 2016, there were 10,000,000 shares of preferred stock (\$.01 par value per share) authorized, of which no shares were issued and outstanding. FactSet's Board of Directors may from time to time authorize the issuance of one or more series of preferred stock and, in connection with the creation of such series, determine the characteristics of each such series including, without limitation, the preference and relative, participating, optional or other special rights, and the qualifications, limitations or restrictions of the series.

Common Stock

At August 31, 2017 and 2016, there were 150,000,000 shares of common stock (\$.01 par value per share) authorized, of which 51,845,132 and 51,150,978 shares were issued, respectively. The authorized shares of common stock are issuable for any proper corporate purpose, including future stock splits, stock dividends, acquisitions, raising equity capital or to adopt additional employee benefit plans.

Treasury Stock

At August 31, 2017 and 2016, there were 12,822,100 and 11,112,753 shares of treasury stock (at cost) outstanding, respectively. As a result, 39,023,032 and 40,038,225 shares of FactSet common stock were outstanding at August 31, 2017 and 2016, respectively.

Share Repurchase Program

Repurchases will be made from time to time in the open market and privately negotiated transactions, subject to market conditions. During fiscal 2017, the Company repurchased 1,554,822 shares for \$252.8 million. During fiscal 2016, the Company repurchased 1,478,000 shares for \$232.3 million.

On July 1, 2016, FactSet entered into an accelerated share repurchase agreement (the "ASR Agreement") to repurchase \$120.0 million of FactSet common stock. The Company received 595,607 shares of common stock on July 5, 2016, which was

approximately 80% of the total number of shares of common stock expected to be repurchased under the ASR Agreement. The final settlement of the ASR Agreement occurred in the first quarter of fiscal 2017 with FactSet receiving an additional 102,916 shares of its common stock.

On March 27, 2017, the Board of Directors of FactSet approved a \$300.0 million expansion of to the existing share repurchase program. At August 31, 2017, \$244.1 million remained authorized for future share repurchases. No minimum number of shares to be repurchased has been fixed. There is no timeframe to complete the share repurchase program and it is expected that share repurchases will be paid for using existing and future cash generated by operations.

Restricted Stock

Restricted stock awards entitle the holder to shares of common stock as the awards vest over time. During fiscal 2017, 132,194 shares of previously granted restricted stock awards vested and were included in common stock outstanding as of August 31, 2017 (less 49,771 shares repurchased from employees at a cost of \$7.8 million to cover their cost of taxes upon vesting of the restricted stock). During fiscal 2016, 69,244 shares of previously granted restricted stock awards vested and were included in common stock outstanding as of August 31, 2016 (less 27,625 shares repurchased from employees at a cost of \$4.5 million to cover their cost of taxes upon vesting of the restricted stock).

Dividends

The Company's Board of Directors declared the following dividends during the periods presented:

Declaration Date	Dividends Per Share of Common Stock	Type	Record Date	Total \$ Amount (in thousands)	Payment Date
August 10, 2017	\$ 0.56	Regular (cash)	August 31, 2017	\$ 21,853	September 19, 2017
May 5, 2017	\$ 0.56	Regular (cash)	May 31, 2017	\$ 21,951	June 20, 2017
February 6, 2017	\$ 0.50	Regular (cash)	February 28, 2017	\$ 19,709	March 21, 2017
November 10, 2016	\$ 0.50	Regular (cash)	November 30, 2016	\$ 19,852	December 20, 2016
August 5, 2016	\$ 0.50	Regular (cash)	August 31, 2016	\$ 20,019	September 20, 2016
May 6, 2016	\$ 0.50	Regular (cash)	May 31, 2016	\$ 20,171	June 21, 2016
February 5, 2016	\$ 0.44	Regular (cash)	February 29, 2016	\$ 18,044	March 15, 2016
November 6, 2015	\$ 0.44	Regular (cash)	November 30, 2015	\$ 18,208	December 15, 2015
August 10, 2015	\$ 0.44	Regular (cash)	August 31, 2015	\$ 18,179	September 15, 2015
May 12, 2015	\$ 0.44	Regular (cash)	May 29, 2015	\$ 18,274	June 16, 2015
February 11, 2015	\$ 0.39	Regular (cash)	February 27, 2015	\$ 16,236	March 17, 2015
November 12, 2014	\$ 0.39	Regular (cash)	November 28, 2014	\$ 16,216	December 16, 2014

All of the above cash dividends were paid from existing cash resources. Future dividend payments will depend on the Company's earnings, capital requirements, financial condition and other factors considered relevant by the Company and is subject to final determination by the Company's Board of Directors.

15. STOCK OPTION AND RETIREMENT PLANS

Stock Options

The FactSet Research Systems Inc. 2004 Stock Option and Award Plan, as Amended and Restated (the "Option Plan") provides for the grant of share-based awards, including stock options and restricted stock awards to employees of FactSet. The expiration date of the Option Plan is December 14, 2020. Stock options granted under the Option Plan expire either seven or ten years from the date of grant and the majority vest ratably over a period of five years. Options become vested and exercisable provided the employee continues employment with the Company through the applicable vesting date and remain exercisable until expiration or cancellation. Options are not transferable or assignable other than by will or the laws of descent and distribution. During the grantee's lifetime, the options may be exercised only by the grantee.

As of August 31, 2017, a total of 3,366,070 stock options were outstanding at a weighted average exercise price of \$139.29. Unamortized stock-based compensation of \$57.7 million is expected to be recognized as stock-based compensation expense over the remaining vesting period of 3.3 years.

Stock Option Activity

In fiscal years 2017, 2016 and 2015, stock options to purchase 1,026,984, 1,195,649, and 828,652 shares of common stock, respectively, were granted to existing employees and non-employee directors of the Company. These options have a weighted average grant date exercise price of \$157.09, \$168.14 and \$141.79 for fiscal years 2017, 2016 and 2015, respectively.

A summary of stock option activity is as follows:

<i>(in thousands, except per share data)</i>	Number Outstanding	Weighted Average Exercise Price Per Share
Balance at August 31, 2014	3,482	\$ 79.67
Granted – non performance-based	677	\$ 140.49
Granted – performance-based	138	\$ 148.52
Granted – non-employee Directors grant	14	\$ 138.48
Exercised	(1,060)	\$ 63.03
Forfeited	(134)	\$ 106.01
Balance at August 31, 2015	3,117	\$ 100.71
Granted – non performance-based	622	\$ 171.18
Granted – performance-based	551	\$ 165.59
Granted – non-employee Directors grant	23	\$ 146.82
Exercised	(681)	\$ 71.52
Forfeited	(268)	\$ 113.70
Balance at August 31, 2016	3,364	\$ 129.54
Granted – non performance-based	713	\$ 152.89
Granted – performance-based	291	\$ 166.29
Granted – non-employee Directors grant	24	\$ 170.24
Exercised	(487)	\$ 86.17
Forfeited	(539)	\$ 160.31
Balance at August 31, 2017	3,366	\$ 139.29

Stock Options Outstanding and Exercisable

The following table summarizes ranges of outstanding and exercisable options as of August 31, 2017 (in thousands, except per share data and the weighted average remaining years of contractual life):

Range of Exercise Prices Per Share	Outstanding			Exercisable			
	Number Outstanding	Weighted Average Remaining Years of Contractual Life	Weighted Average Exercise Price Per Share	Aggregate Intrinsic Value	Number Exercisable	Weighted Average Exercise Price Per Share	Aggregate Intrinsic Value
\$87.26- \$92.22	627	4.7	\$ 91.59	\$ 41,122	536	\$ 91.61	\$ 35,146
\$94.84 - \$110.31	306	4.9	\$ 99.02	\$ 17,797	240	\$ 97.41	\$ 14,345
\$131.31- \$148.52	540	7.1	\$ 135.46	\$ 11,730	4	\$ 138.48	\$ 75
\$150.81 - \$152.28	729	9.1	\$ 152.25	\$ 3,595	20	\$ 152.05	\$ 102
\$159.14 - \$170.24	692	8.7	\$ 165.23	\$ —	27	\$ 164.90	\$ —
\$171.22 - \$175.20	472	8.1	\$ 173.39	\$ —	91	\$ 175.20	\$ —
Total Fiscal 2017	3,366	7.4	\$ 139.29	\$ 74,244	918	\$ 105.14	\$ 49,668

Prior Year Amounts	August 31, 2016		August 31, 2015	
	Number of Shares	Weighted Average Exercise Price Per Share	Number of Shares	Weighted Average Exercise Price Per Share
Outstanding at fiscal year end	3,364	\$ 129.54	3,117	\$ 100.71
Exercisable at fiscal year end	970	\$ 89.42	1,352	\$ 78.70

The aggregate intrinsic value of in-the-money stock options exercisable at August 31, 2017 and 2016 was \$49.7 million and \$86.0 million, respectively. Aggregate intrinsic value represents the difference between the Company's closing stock price of \$157.18 at August 31, 2017 and the exercise price multiplied by the number of options exercisable as of that date. The weighted average remaining contractual life of stock options exercisable at August 31, 2017 and 2016 was 5.1 years and 4.5 years, respectively. The total pre-tax intrinsic value of stock options exercised during fiscal 2017, 2016 and 2015 was \$38.0 million, \$60.8 million and \$92.7 million, respectively.

Performance-based Stock Options

Performance-based stock options require management to make assumptions regarding the likelihood of achieving Company performance targets. The number of performance-based options that vest will be predicated on the Company achieving performance levels during the measurement period subsequent to the date of grant. Dependent on the financial performance levels attained by FactSet, a percentage of the performance-based stock options will vest to the grantees of those stock options. However, there is no current guarantee that such options will vest in whole or in part.

February 2015 Performance-based Option Grant Review

In connection with the acquisition of Code Red, FactSet granted 137,522 performance-based stock options during the second quarter of fiscal 2015. Of the total amount granted, 68,761 performance-based options were eligible to vest if certain Code Red ASV and operating margin targets were achieved over a two-year measurement period ending February 28, 2017. At the conclusion of the measurement period, 70% of the options were deemed eligible to vest, with the remaining options being forfeited. The option holders must remain employed by FactSet through February 28, 2019 in order for the options to vest. As of August 31, 2017, total unamortized stock-based compensation of \$0.8 million will be recognized as expense over the remaining vesting period of 1.4 years.

The remaining 68,761 options granted in February 2015 are eligible to cliff vest based on a four-year measurement period ending February 28, 2019. As of August 31, 2017, total unamortized stock-based compensation of \$0.4 million will be recognized as expense over the remaining vesting period of 1.4 years. A change, up or down, in the actual financial performance levels achieved by Code Red in future fiscal years could result in the following changes to the current estimate of the vesting percentage and related expense:

Vesting Percentage (in thousands)	Cumulative Catch-up Adjustment*	Remaining Expense to be Recognized
0%	\$ (769)	\$ —
10%	\$ (577)	\$ 108
40% (current expectation)	\$ —	\$ 431
70%	\$ 577	\$ 755
100%	\$ 1,153	\$ 1,078

* Amounts represent the cumulative catch-up adjustment to be recorded if there was a change in the vesting percentage as of August 31, 2017.

October 2015 and August 2016 Performance-based Option Grant Review

In connection with the acquisition of Portware during the first quarter of fiscal 2016, FactSet granted 530,418 performance-based stock options. In the fourth quarter of fiscal 2017, FactSet modified the vesting of these grants to allow 70% of the options to become eligible to vest, with the remaining options being forfeited. In conjunction with this modification, FactSet recognized a cumulative catch-up adjustment of \$1.8 million. The remaining options will vest 40% on the second anniversary date of the grant and 20% on each subsequent anniversary date provided the option holders remain employed by FactSet. As of August 31, 2017, total unamortized stock-based compensation of \$2.9 million will be recognized as expense over the remaining vesting period of 3.1 years.

FactSet granted 20,911 additional performance-based stock options to Portware employees in the fourth quarter of fiscal 2016 with similar performance conditions. In the fourth quarter of fiscal 2017, FactSet modified the vesting of these grants to allow 70% of the options to become eligible to vest, with the remaining options being forfeited. In conjunction with this modification, FactSet recognized a cumulative catch-up adjustment of \$0.1 million. The remaining options will vest 40% on the second anniversary date of the grant and 20% on each subsequent anniversary date provided the option holders remain employed by FactSet. As of August 31, 2017, total unamortized stock-based compensation of \$0.4 million will be recognized as expense over the remaining vesting period of 3.9 years.

January 2017 Performance-based Option Grant Review

In connection with the acquisition of Vermilion, FactSet granted 61,744 performance-based stock options in January 2017. These performance-based options will vest 40% on the second anniversary date of the grant and 20% on each subsequent anniversary date if certain Vermilion revenue and operating income targets are achieved by November 30, 2018. The option holders must also remain employed by FactSet for the options to be eligible to vest. As of August 31, 2017, FactSet does not believe these growth targets are probable of being achieved, and as such, no stock-based compensation expense is expected to be recognized in connection with these performance-based options. A change in the actual financial performance levels achieved by Vermilion in future fiscal years could result in the following changes to the current estimate of the vesting percentage and related expense:

Vesting Percentage (in thousands)	Cumulative Catch-up Adjustment*	Remaining Expense to be Recognized
0% (current expectation)	\$ —	\$ —
100%	\$ 338	\$ 2,367

* Amounts represent the cumulative catch-up adjustment to be recorded if there was a change in the vesting percentage as of August 31, 2017.

June 2017 Performance-based Option Grant Review

In connection with the acquisition of BISAM, FactSet granted 206,417 performance-based stock options in June 2017. These performance-based options will vest 40% on the second anniversary date of the grant and 20% on each subsequent anniversary date if certain BISAM revenue and operating income targets are achieved by March 31, 2019. The option holders must also remain employed by FactSet for the options to be eligible to vest. As of August 31, 2017, FactSet does not believe these growth targets are probable of being achieved, and as such, no stock-based compensation expense is expected to be recognized in connection with these performance-based options. A change in the actual financial performance levels achieved by BISAM in future fiscal years could result in the following changes to the current estimate of the vesting percentage and related expense:

Vesting Percentage (in thousands)	Cumulative Catch-up Adjustment*	Remaining Expense to be Recognized
0%(current expectation)	\$ —	\$ —
80%	\$ 237	\$ 6,870
90%	\$ 267	\$ 7,729
100%	\$ 296	\$ 8,588

* Amounts represent the cumulative catch-up adjustment to be recorded if there was a change in the vesting percentage as of August 31, 2017.

Restricted Stock and Stock Unit Awards

The Company's Option Plan plans permit the issuance of restricted stock and restricted stock units. Restricted stock awards are subject to continued employment over a specified period.

Restricted Stock and Stock Unit Awards Activity

In fiscal years 2017, 2016 and 2015, FactSet granted 62,400, 97,319 and 54,862 restricted stock awards to employees of the Company, respectively. These awards have a weighted average grant date fair value of \$158.26, \$159.64 and \$138.23 for fiscal years 2017, 2016 and 2015, respectively.

As of August 31, 2017, a total of 182,175 shares of restricted stock and restricted stock units were unvested and outstanding, which results in unamortized stock-based compensation of \$19.1 million to be recognized as stock-based compensation expense over the remaining vesting period of 3.4 years.

A summary of restricted stock award activity is as follows:

<i>(in thousands, except per award data)</i>	Number Outstanding	Weighted Average Grant Date Fair Value Per Award
Balance at August 31, 2014	368	\$ 89.77
Granted (restricted stock and stock units)	55	\$ 138.23
Vested ⁽¹⁾	(95)	\$ 70.94
Canceled/forfeited	(15)	\$ 101.04
Balance at August 31, 2015	313	\$ 103.34
Granted (restricted stock and stock units)	97	\$ 159.64
Vested ⁽²⁾	(69)	\$ 85.04
Canceled/forfeited	(79)	\$ 112.51
Balance at August 31, 2016	262	\$ 126.27
Granted (restricted stock and stock units)	62	\$ 158.26
Vested ⁽³⁾	(132)	\$ 123.28
Canceled/forfeited	(10)	\$ 130.32
Balance at August 31, 2017	182	\$ 138.62

⁽¹⁾ The 94,870 restricted stock awards that vested during fiscal 2015 were comprised of: 53,495 of awards granted on October 23, 2009, which cliff vested 60% after three years (on October 23, 2012) and 40% after five years (on October 23, 2014); 14,683 restricted stock awards that were granted on April 8, 2013, which cliff vest 20% annually upon the anniversary date of the grant; 17,228 awards relating to restricted stock granted on February 9, 2010; and 9,464 restricted stock awards that were previously granted between November 2013 and November 2014.

⁽²⁾ The 69,244 restricted stock awards that vested during fiscal 2016 were comprised of: 37,079 of awards relating to restricted stock granted on November 8, 2010 (remaining 40%) and 14,683 restricted stock awards that were granted on April 8, 2013, which cliff vest 20% annually upon the anniversary date of the grant. Additionally, 17,482 awards vested related to other grants.

⁽³⁾ The 132,194 restricted stock awards that vested during fiscal 2017 were comprised of: 73,522 of awards relating to restricted stock granted on November 1, 2013, which cliff vested 60% after three years, 17,328 of awards relating to restricted stock granted on October 16, 2015, which vested 20% annually upon the anniversary date of the grant and 30,162 of awards relating to restricted stock granted on October 16, 2015, which were modified to accelerate vest 100% in conjunction with employee severance. Additionally, 11,182 awards vested related to other grants.

Share-based Awards Available for Grant

A summary of share-based awards available for grant is as follows:

<i>(in thousands)</i>	Share-based Awards Available for Grant under the Employee Stock Option Plan	Share-based Awards Available for Grant under the Non-Employee Stock Option Plan
Balance at August 31, 2014	3,222	102
Granted – non performance-based options	(677)	—
Granted – performance-based options	(138)	—
Granted – non-employee Directors grant	—	(14)
Restricted stock awards granted ⁽¹⁾	(137)	—
Share-based awards canceled/forfeited ⁽²⁾	171	—
Balance at August 31, 2015	2,441	88
Granted – non performance-based options	(622)	—
Granted – performance-based options	(551)	—
Granted – non-employee Directors grant	—	(22)
Restricted stock awards granted ⁽¹⁾	(243)	—
Share-based awards canceled/forfeited ⁽²⁾	466	—
Balance at August 31, 2016	1,491	66
Granted – non performance-based options	(713)	—
Granted – performance-based options	(291)	—
Granted – non-employee Directors grant	—	(24)
Restricted stock awards granted ⁽¹⁾	(156)	—
Share-based awards canceled/forfeited ⁽²⁾	566	—
Balance at August 31, 2017	897	42

⁽¹⁾ Each restricted stock award granted is equivalent to 2.5 shares granted under the Company's Option Plan.

⁽²⁾ Under the Company's Option Plan, for each restricted stock award canceled/forfeited, an equivalent of 2.5 shares is added back to the available share-based awards balance.

Employee Stock Purchase Plan

Shares of FactSet common stock may be purchased by eligible employees under the Amended and Restated FactSet Research Systems Inc. 2008 Employee Stock Purchase Plan (the "Purchase Plan") in three-month intervals at a purchase price equal to at least 85% of the lesser of the fair market value of the Company's common stock on either the first day or the last day of each three-month offering period. Employee purchases may not exceed 10% of their gross compensation during an offering period.

During fiscal 2017, employees purchased 75,372 shares as compared to 73,072 shares in fiscal 2016 and 63,265 shares in fiscal 2015. At August 31, 2017, 333,172 shares were reserved for future issuance under the Purchase Plan.

401(k) Plan

The Company established its 401(k) Plan in fiscal 1993. The 401(k) Plan is a defined contribution plan covering all full-time, U.S. employees of the Company and is subject to the provisions of the Employee Retirement Income Security Act of 1974 and the Internal Revenue Code of 1986 ("IRC"). Each year, participants may contribute up to 60% of their eligible annual compensation, subject to annual limitations established by the IRC. The Company matches up to 4% of employees' earnings, capped at the Internal Revenue Service annual maximum. Company matching contributions are subject to a five year graduated vesting schedule. All full-time, U.S. employees are eligible for the matching contribution by the Company. The Company contributed \$10.1 million, \$9.7 million, and \$8.6 million in matching contributions to employee 401(k) accounts during fiscal 2017, 2016 and 2015, respectively.

16. STOCK-BASED COMPENSATION

The Company recognized total stock-based compensation expense of \$34.2 million, \$29.8 million and \$26.4 million in fiscal 2017, 2016 and 2015, respectively. As of August 31, 2017, \$76.9 million of total unrecognized compensation expense related to non-vested awards is expected to be recognized over a weighted average period of 3.3 years. There was no stock-based compensation capitalized as of August 31, 2017 and 2016, respectively.

Employee Stock Option Fair Value Determinations

The Company utilizes the lattice-binomial option-pricing model ("binomial model") to estimate the fair value of new employee stock option grants. The Company's determination of fair value of stock option awards on the date of grant using the binomial

model is affected by the Company's stock price as well as assumptions regarding a number of variables. These variables include, but are not limited to the Company's expected stock price volatility over the term of the awards, interest rates, option forfeitures and employee stock option exercise behaviors.

Q1 2017	671,263 non performance-based employee stock options and 22,460 performance-based employee stock options were granted at a weighted average exercise price of \$152.51 and a weighted average estimated fair value of \$39.60 per share.
Q2 2017	61,744 performance-based employee stock options were granted at a weighted average exercise price of \$169.16 and a weighted average estimated fair value of \$43.81 per share.
Q3 2017	11,604 non performance-based employee stock options were granted at a weighted average exercise price of \$163.05 and a weighted average estimated fair value of \$42.23 per share.
Q4 2017	29,650 non performance-based employee stock options and 206,417 performance-based employee stock options were granted at a weighted average exercise price of \$165.75 and a weighted average estimated fair value of \$42.93 per share.
Q1 2016	513,785 non performance-based employee stock options and 530,418 performance-based employee stock options were granted at a weighted average exercise price of \$170.21 and a weighted average estimated fair value of \$46.62 per share.
Q2 2016	4,073 non performance-based employee stock options were granted at an exercise price of \$150.81 and an estimated fair value of \$40.51 per share.
Q3 2016	103,903 non performance-based employee stock options were granted at an exercise price of \$152.10 and an estimated fair value of \$40.57 per share.
Q4 2016	20,911 performance-based employee stock options were granted at an exercise price of \$171.22 and an estimated fair value of \$47.82 per share.
Q1 2015	462,913 non performance-based employee stock options were granted at a weighted average exercise price of \$131.31 and a weighted average estimated fair value of \$37.67 per share.
Q2 2015	25,075 non performance-based employee stock options and 137,522 performance-based employee stock options were granted at a weighted average exercise price of \$147.05 and a weighted average estimated fair value of \$43.05 per share.
Q3 2015	61,210 non performance-based employee stock options were granted at a weighted average exercise price of \$159.14 and a weighted average estimated fair value of \$44.95 per share.
Q4 2015	128,090 non performance-based employee stock options were granted at a weighted average exercise price of \$165.02 and a weighted average estimated fair value of \$54.10 per share.

The weighted average estimated fair value of employee stock options granted during fiscal 2017, 2016 and 2015 was determined using the binomial model with the following weighted average assumptions:

	2017	2016	2015
Term structure of risk-free interest rate	0.07% - 2.09%	0.07% - 2.1%	0.01% - 2.3%
Expected life (years)	7.4 - 8.1	7.3 - 8.1	5.8 - 9.4
Term structure of volatility	21% - 30%	21% - 30%	20% - 31%
Dividend yield	1.18%	1.09%	1.32%
Weighted average estimated fair value	\$40.68	\$46.08	\$41.87
Weighted average exercise price	\$156.77	\$168.55	\$141.84
Fair value as a percentage of exercise price	25.9%	27.3%	29.5%

The risk-free interest rate assumption for periods within the contractual life of the option is based on the U.S. Treasury yield curve in effect at the time of grant. Expected volatility is based on a combination of historical volatility of the Company's stock and implied volatilities of publicly traded options to buy FactSet common stock with contractual terms closest to the expected life of options granted to employees. The approach to utilize a mix of historical and implied volatility was based upon the availability of actively traded options on the Company's stock and the Company's assessment that a combination of implied volatility and historical volatility is best representative of future stock price trends. The Company uses historical data to estimate option exercises and employee termination within the valuation model. The dividend yield assumption is based on the Company's history and expectation of dividend payouts. The expected life of employee stock options represents the weighted average period the stock options are expected to remain outstanding and is a derived output of the binomial model. The binomial model estimates employees exercise behavior based on the option's remaining vested life and the extent to which the option is in-the-money. The binomial model estimates the probability of exercise as a function of these two variables based on the entire history of exercises and cancellations of all past option grants made by the Company.

Non-Employee Director Stock Option Fair Value Determinations

The 2008 Non-Employee Directors' Stock Option Plan (the "Directors' Plan") provides for the grant of share-based awards, including stock options, to non-employee directors of FactSet. A total of 250,000 shares of FactSet common stock have been reserved for issuance under the Directors' Plan. The expiration date of the Directors' Plan is December 1, 2018.

The Company utilizes the Black-Scholes model to estimate the fair value of new non-employee Director stock option grants. The Company's determination of fair value of share-based payment awards on the date of grant is affected by the Company's stock price as well as assumptions regarding a number of variables. These variables include, but are not limited to the Company's expected stock price volatility over the term of the awards, interest rates, option forfeitures and employee stock option exercise behaviors.

Fiscal 2017

On January 13, 2017, FactSet granted 23,846 stock options to the Company's non-employee Directors, including one-time new director grants of 2,104 for both Malcolm Frank and Sheila B. Jordan, who were elected to FactSet's Board of Directors on December 20, 2016. All of the options granted on January 13, 2017, have a weighted average estimated fair value of \$35.65 per share, using the Black-Scholes option-pricing model with the following weighted average assumptions:

Risk-free interest rate	1.95%
Expected life (years)	5.4
Expected volatility	22.7%
Dividend yield	1.24%

Fiscal 2016

On January 15, 2016, FactSet granted 22,559 stock options to the Company's non-employee Directors, including a one-time new director grant of 2,417 for Laurie Siegel, who was elected to FactSet's Board of Directors on December 15, 2015. All of the options granted on January 15, 2016, have a weighted average estimated fair value of \$31.03 per share, using the Black-Scholes option-pricing model with the following weighted average assumptions:

Risk-free interest rate	1.62%
Expected life (years)	5.4
Expected volatility	23.0%
Dividend yield	1.05%

Fiscal 2015

On January 15, 2015, FactSet granted 13,842 stock options to the Company's non-employee directors at a weighted average estimated fair value of \$28.18 per share, using the Black-Scholes option-pricing model with the following weighted average assumptions:

Risk-free interest rate	1.45 %
Expected life (years)	5.4
Expected volatility	23 %
Dividend yield	1.30 %

Restricted Stock Fair Value Determinations

Restricted stock granted to employees entitle the holder to shares of common stock as the award vests over time, but not to dividends declared on the underlying shares while the restricted stock is unvested. The grant date fair value of restricted stock awards are measured by reducing the grant date price of FactSet's share by the present value of the dividends expected to be paid on the underlying stock during the requisite service period, discounted at the appropriate risk-free interest rate. Restricted stock awards are amortized to expense over the vesting period.

Q1 2017	5,084 shares of restricted stock were granted at a weighted average estimated fair value of \$151.63 per share.
Q2 2017	7,843 shares of restricted stock were granted at a weighted average estimated fair value of \$161.31 per share.
Q3 2017	No restricted stock granted.
Q4 2017	49,473 shares of restricted stock were granted at a weighted average estimated fair value of \$158.46 per share.
Q1 2016	93,120 shares of restricted stock were granted at a weighted average estimated fair value of \$159.46 per share.
Q2 2016	No restricted stock granted.
Q3 2016	255 shares of restricted stock were granted at a weighted average estimated fair value of \$146.20 per share.
Q4 2016	3,944 shares of restricted stock were granted at a weighted average estimated fair value of \$164.77 per share.
Q1 2015	10,225 shares of restricted stock were granted at a weighted average estimated fair value of \$127.58 per share.
Q2 2015	38,088 shares of restricted stock were granted at a weighted average estimated fair value of \$137.83 per share.
Q3 2015	845 shares of restricted stock were granted at a weighted average estimated fair value of \$152.77 per share.
Q4 2015	5,704 shares of restricted stock were granted at a weighted average estimated fair value of \$157.84 per share.

Employee Stock Purchase Plan Fair Value Determinations

During fiscal 2017, employees purchased 75,372 shares at a weighted average price of \$136.34 compared to 73,072 shares at a weighted average price of \$131.14 in fiscal 2016 and 63,265 shares at a weighted average price of \$122.76 in fiscal 2015. Stock-based compensation expense recorded during fiscal 2017, 2016 and 2015 relating to the employee stock purchase plan was \$2.1 million, \$1.9 million and \$1.5 million, respectively.

The Company uses the Black-Scholes model to calculate the estimated fair value for the employee stock purchase plan. The weighted average estimated fair value of employee stock purchase plan grants during fiscal years 2017, 2016 and 2015, were \$28.16, \$26.87 and \$24.05 per share, respectively, with the following weighted average assumptions:

	2017	2016	2015
Risk-free interest rate	0.69%	0.22%	0.03%
Expected life (months)	3	3	3
Expected volatility	8.6%	10.7%	16.3%
Dividend yield	1.25%	1.18%	1.15%

Accuracy of Fair Value Estimates

The Company is responsible for determining the assumptions used in estimating the fair value of its share-based payment awards. The Company's determination of fair value of share-based payment awards on the date of grant using an option-pricing model is affected by the Company's stock price as well as assumptions regarding a number of highly complex and subjective variables. These variables include, but are not limited to the Company's expected stock price volatility over the term of the awards, interest rates, option forfeiture rates and actual and projected employee stock option exercise behaviors. Option-pricing models were developed for use in estimating the value of traded options that have no vesting or hedging restrictions and are fully transferable.

17. INCOME TAXES

Income tax expense is based on taxable income determined in accordance with current enacted laws and tax rates. Deferred income taxes are recorded for the temporary differences between the financial statement and tax bases of assets and liabilities using currently enacted tax rates.

Provision for Income Taxes

The provision for income taxes is as follows:

<i>(in thousands)</i>	Years ended August 31,		
	2017	2016	2015
U.S. operations	\$ 218,650	\$ 353,434	\$ 263,411
Non-U.S. operations	125,662	107,559	70,343
<i>Income before income taxes</i>	\$ 344,312	\$ 460,993	\$ 333,754
U.S. operations	\$ 65,403	\$ 106,671	\$ 88,147
Non-U.S. operations	20,650	15,507	4,556
<i>Total provision for income taxes</i>	\$ 86,053	\$ 122,178	\$ 92,703
Effective tax rate	25.0%	26.5%	27.8%

The components of the provision for income taxes consist of the following:

<i>(in thousands)</i>	Years ended August 31,		
	2017	2016	2015
Current			
U.S. federal	\$ 58,057	\$ 97,703	\$ 82,885
U.S. state and local	5,659	4,917	4,419
Non-U.S.	17,458	15,030	6,368
Total current taxes	\$ 81,174	\$ 117,650	\$ 93,672
Deferred			
U.S. federal	\$ 4,320	\$ 3,915	\$ 720
U.S. state and local	(77)	136	123
Non-U.S.	636	477	(1,812)
Total deferred taxes	\$ 4,879	\$ 4,528	\$ (969)
<i>Total provision for income taxes</i>	\$ 86,053	\$ 122,178	\$ 92,703

The provision for income taxes differs from the amount of income tax determined by applying the U.S. statutory federal income tax rate to income before income taxes as a result of the following factors:

(expressed as a percentage of income before income taxes)	Years ended August 31,		
	2017	2016	2015
Tax at U.S. Federal statutory tax rate	35.0%	35.0%	35.0%
Increase (decrease) in taxes resulting from:			
State and local taxes, net of U.S. federal income tax benefit	1.8	1.5	1.6
Foreign income at other than U.S. rates	(7.0) ⁽¹⁾	(5.0) ⁽²⁾	(3.0)
Domestic production activities deduction	(2.1)	(1.5)	(2.2)
Income tax benefits from R&D tax credits	(3.3)	(3.6)	(2.7)
Income tax benefits from foreign tax credits	(0.3)	(0.2)	(0.3)
Other, net	0.9	0.3	(0.6)
Effective tax rate	25.0%	26.5% ⁽³⁾	27.8% ⁽⁴⁾

⁽¹⁾ Includes a 200 basis point benefit as a result of FactSet's global realignment. Effective September 1, 2016, FactSet realigned certain aspects of its global operations from FactSet Research Systems Inc., its U.S. parent company, to FactSet UK Limited, a U.K. operating company, to better position the Company to serve its growing client base outside the U.S. This realignment allows the Company to further implement strategic corporate objectives and helps achieve operational and financial efficiencies, while complementing FactSet's increasing global growth and reach.

⁽²⁾ Includes a portion of the gain from the sale of the Market Metrics business that was not taxable in the UK

⁽³⁾ The fiscal 2016 effective tax rate of 26.5% includes income tax benefits of \$10.5 million primarily from the permanent reenactment of the U.S. Federal R&D Tax Credit (the "R&D tax credit") in December 2015, finalizing the fiscal 2015 tax returns and other discrete items. The reenactment of the R&D tax credit was retroactive to January 1, 2015, and eliminates the yearly uncertainty surrounding the extension of the credit.

⁽⁴⁾ The fiscal 2015 effective tax rate of 27.8% includes income tax benefits of \$8.8 million primarily from the reenactment of the R&D tax credit in December 2014, finalizing the fiscal 2014 tax returns and other discrete items.

Deferred Tax Assets and Liabilities

The significant components of deferred tax assets that are recorded within the Consolidated Balance Sheets were as follows:

(in thousands)	At August 31,	
	2017	2016
Current		
Receivable reserve	\$ 811	\$ 531
Deferred rent	1,321	1,022
Other	536	1,605
Net current deferred tax assets	\$ 2,668	\$ 3,158
Non-current		
Depreciation on property, equipment and leasehold improvements	\$ 2,220	\$ 5,194
Deferred rent	10,294	9,626
Stock-based compensation	20,117	19,927
Purchased intangible assets, including acquired technology	(32,742)	(24,645)
Other	7,523	3,304
Net non-current deferred tax assets	\$ 7,412	\$ 13,406
Total deferred tax assets	\$ 10,080	\$ 16,564

The significant components of deferred tax liabilities that are recorded within the Consolidated Balance Sheets were as follows:

(in thousands)	At August 31,	
	2017	2016
Current		
Other	\$ 2,382	\$ 291
Net current deferred tax liabilities	\$ 2,382	\$ 291
Non-current		
Stock-based compensation	\$ (815)	\$ —
Purchased intangible assets, including acquired technology	26,231	1,666
Other	(524)	42
Net non-current deferred tax liabilities	\$ 24,892	\$ 1,708
Total deferred tax liabilities	\$ 27,274	\$ 1,999

No U.S. income taxes have been provided on filing-basis undistributed foreign earnings and profits of \$223.6 million as of August 31, 2017, as FactSet plans to permanently reinvest these amounts and use the earnings to fund non-U.S. operations and working capital needs as well as facilities overseas. These needs include, but are not limited to, capital expenditures and

acquisitions intended to further FactSet's global growth strategy. At each reporting period, FactSet assesses its position with regard to undistributed foreign earnings of its subsidiaries. To the extent that earnings can no longer be indefinitely reinvested, the Company will accrue the tax impact, if any, attributable to those earnings, including the impact of foreign tax credits, at such time. If such earnings are repatriated, additional tax expense may result, although the flexibility inherent in the U.S. Internal Revenue Code may permit the ultimate distribution to be tax-free depending on the nature of the distribution. Therefore the Company does not believe it is practicable to estimate, with reasonable accuracy, the hypothetical amount of the unrecognized deferred tax liability on its undistributed foreign earnings given the many factors and assumptions necessary to estimate the amount of the federal income tax that may be payable in the future on the undistributed earnings.

Unrecognized Tax Positions

Applicable accounting guidance prescribes a comprehensive model for the financial statement recognition, measurement, classification and disclosure of uncertain tax positions that a company has taken or expects to take on a tax return. A company can recognize the financial effect of an income tax position only if it is more likely than not (greater than 50%) that the tax position will prevail upon tax examination, based solely on the technical merits of the tax position. Otherwise, no benefit or expense can be recognized in the consolidated financial statements. The tax benefits recognized are measured based on the largest benefit that has a greater than fifty percent likelihood of being realized upon ultimate settlement. Additionally, companies are required to accrue interest on all tax exposures for which reserves have been established consistent with jurisdictional tax laws.

As of August 31, 2017, the Company had gross unrecognized tax benefits totaling \$11.5 million, including \$1.5 million of accrued interest, recorded as Taxes Payable (non-current) on the Consolidated Balance Sheet. As of August 31, 2016, the Company had gross unrecognized tax benefits totaling \$8.8 million, including \$1.3 million of accrued interest, recorded as Taxes Payable (non-current) on the Consolidated Balance Sheet. The Company recognizes interest and penalty charges related to unrecognized tax benefits as income tax expense, which is consistent with the recognition in prior reporting periods. The Company recognized interest charges of less than \$0.2 million in each of the fiscal years ended August 31, 2017, 2016 and 2015, respectively.

Unrecognized tax benefits represent tax positions taken on tax returns but not yet recognized in the consolidated financial statements. When applicable, the Company adjusts the previously recorded tax expense to reflect examination results when the position is ultimately settled. The Company regularly engages in discussions and negotiations with tax authorities regarding tax matters in various jurisdictions. It is reasonably possible that certain federal, foreign, and state tax matters may be concluded in the next 12 months. However, FactSet has no reason to believe that such audits will result in the payment of additional taxes and/or penalties that would have a material adverse effect on the Company's results of operations or financial position, beyond current estimates. Any changes in accounting estimates resulting from new developments with respect to uncertain tax positions will be recorded as appropriate. The Company does not currently anticipate that the total amounts of unrecognized tax benefits will significantly change within the next 12 months.

The following table summarizes the changes in the balance of gross unrecognized tax benefits:

(in thousands)

Unrecognized income tax benefits at August 31, 2014	\$ 5,501
Additions based on tax positions related to the current year	962
Additions for tax positions of prior years	1,122
Statute of limitations lapse	(809)
Unrecognized income tax benefits at August 31, 2015	\$ 6,776
Additions based on tax positions related to the current year	1,779
Additions for tax positions of prior years	1,436
Statute of limitations lapse	(1,209)
Unrecognized income tax benefits at August 31, 2016	\$ 8,782
Additions based on tax positions related to the current year	3,896
Additions for tax positions of prior years	628
Statute of limitations lapse	(1,822)
Unrecognized income tax benefits at August 31, 2017	\$ 11,484

In the normal course of business, the Company's tax filings are subject to audit by federal, state and foreign tax authorities. At August 31, 2017, the Company remained subject to examination in the following major tax jurisdictions for the tax years as indicated below:

Major Tax Jurisdictions	Open Tax Years
U.S.	
Federal	2014 through 2017
State (various)	2010 through 2017
Europe	
United Kingdom	2014 through 2017
France	2016 through 2017
Germany	2017

18. DEBT

FactSet's debt obligations consisted of the following:

<i>(in thousands)</i>	At August 31,	
	2017	2016
2017 Revolving Credit Facility (maturity date of March 17, 2020)	575,000	—
2015 Revolving Credit Facility (maturity date of September 21, 2018)	\$ —	\$ 300,000
Total Outstanding Debt	\$ 575,000	\$ 300,000

On March 17, 2017, the Company entered into a Credit Agreement (the "2017 Credit Agreement") between FactSet, as the borrower, and PNC Bank, National Association ("PNC"), as the administrative agent and lender. The 2017 Credit Agreement provides for a \$575.0 million revolving credit facility (the "2017 Revolving Credit Facility"). FactSet may request borrowings under the 2017 Revolving Credit Facility until its maturity date of March 17, 2020. The 2017 Credit Agreement also allows FactSet, subject to certain requirements, to arrange for additional borrowings with PNC for an aggregate amount of up to \$225.0 million, provided that any such request for additional borrowings must be in a minimum amount of \$25.0 million. Borrowings under the loan bear interest on the outstanding principal amount at a rate equal to the daily LIBOR rate plus 1.00%. Interest on the loan outstanding is payable quarterly in arrears and on the maturity date. There are no prepayment penalties if the Company elects to prepay the outstanding loan amounts prior to the scheduled maturity date. The principal balance is payable in full on the maturity date.

In conjunction with FactSet's entrance into the 2017 Credit Agreement, the Company borrowed \$575.0 million in the form of a LIBOR rate loan under the 2017 Revolving Credit Facility and retired the outstanding debt under its previous credit agreement between FactSet, as the borrower, and Bank of America, N.A., as the lender. The total principal amount of the debt outstanding at the time of retirement was \$365.0 million and there were no prepayment penalties. Proceeds from the 2017 Revolving Credit Facility were also used to fund FactSet's acquisition of BISAM.

All outstanding loan amounts are reported as *Long-term debt* within the Consolidated Balance Sheet at August 31, 2017. During fiscal 2017 and 2016, we paid approximately \$8.4 million and \$3.1 million in interest on its outstanding debt amounts, respectively. The principal balance is payable in full on the maturity date.

As of August 31, 2017, no commitment fee was owed by FactSet since it borrowed the full amount under the 2017 Credit Agreement. In fiscal 2017, FactSet incurred approximately \$0.4 million in legal costs to draft and review the 2017 Credit Agreement. These costs were capitalized as loan origination fees and are amortized into interest expense over the term of the loan using the effective interest method.

The 2017 Credit Agreement contained covenants restricting certain FactSet activities, which are usual and customary for this type of loan.

In addition, the 2017 Credit Agreement required that FactSet maintain a consolidated leverage ratio, as measured by total funded debt/EBITDA below a specified level as of the end of each fiscal quarter. The Company was in compliance with all of the covenants of the 2017 Credit Agreement as of August 31, 2017.

19. COMMITMENTS AND CONTINGENCIES

Commitments represent obligations, such as those for future purchases of goods or services that are not yet recorded on the balance sheet as liabilities. FactSet records liabilities for commitments when incurred (i.e., when the goods or services are received).

Lease Commitments

At August 31, 2017, FactSet leased approximately 1,143,000 square feet of office space under various non-cancelable operating leases which expire on various dates through 2031. Total minimum rental payments associated with the leases are recorded as rent expense (a component of *Selling, General & Administrative* expense) on a straight-line basis over the periods of the respective non-cancelable lease terms. Future minimum commitments for the Company's operating leases in place as of August 31, 2017 are as follows:

Years ended August 31, <i>(in thousands)</i>	Minimum Lease Payments
2018	\$38,056
2019	35,627
2020	27,834
2021	20,836
2022	20,215
Thereafter	139,099
Total	\$281,667

During fiscal 2017, 2016 and 2015, rent expense (including operating costs) for all operating leases amounted to \$48.4 million, \$43.2 million and \$38.6 million, respectively. At August 31, 2017 and 2016, deferred rent reported within the Consolidated Balance Sheets totaled \$37.4 million and \$34.4 million, of which \$33.5 million and \$31.2 million, respectively, was reported as a non-current liability within the line item Deferred Rent and Other Non-Current Liabilities.

Approximately \$1.9 million of standby letters of credit have been issued during the ordinary course of business in connection with the Company's current leased office space as of August 31, 2017. These standby letters of credit contain covenants that, among other things, require FactSet to maintain minimum levels of consolidated net worth and certain leverage and fixed charge ratios. As of August 31, 2017 and 2016, FactSet was in compliance with all covenants contained in the standby letters of credit.

Purchase Commitments with Suppliers

Purchase obligations represent payments due in future periods in respect of commitments to the Company's various data vendors as well as commitments to purchase goods and services such as telecommunication and computer maintenance services. These purchase commitments are agreements that are enforceable and legally binding on FactSet and that specify all significant terms, including: fixed or minimum quantities to be purchased; fixed, minimum or variable price provisions; and the approximate timing of the transaction. As of August 31, 2017 and 2016, the Company had total purchase commitments with suppliers of \$81.0 million and \$67.5 million, respectively.

Contingencies

Legal Matters

FactSet accrues non income-tax liabilities for contingencies when management believes that a loss is probable and the amounts can be reasonably estimated, while contingent gains are recognized only when realized. The Company is subject to legal proceedings, claims and litigation arising in the ordinary course of business, including intellectual property litigation. Based on information available at August 31, 2017, FactSet's management does not believe that the ultimate outcome of these unresolved matters against the Company, individually or in the aggregate, is likely to have a material adverse effect on the Company's consolidated financial position, its results of operations or its cash flows.

Income Taxes

Uncertain income tax positions are accounted for in accordance with applicable accounting guidance (see Note 17). FactSet is currently under audit by tax authorities and has reserved for potential adjustments to its provision for income taxes that may result from examinations by, or any negotiated settlements with, these tax authorities. The Company believes that the final outcome of these examinations or settlements will not have a material effect on its results of operations. If events occur which

indicate payment of these amounts is unnecessary, the reversal of the liabilities would result in the recognition of tax benefits in the period FactSet determines the liabilities are no longer necessary. If the Company's estimates of the federal, state, and foreign income tax liabilities are less than the ultimate assessment, a further charge to expense would result.

Indemnifications

As permitted or required under Delaware law and to the maximum extent allowable under that law, FactSet has certain obligations to indemnify its current and former officers and directors for certain events or occurrences while the officer or director is, or was serving, at FactSet's request in such capacity. These indemnification obligations are valid as long as the director or officer acted in good faith and in a manner the person reasonably believed to be in, or not opposed to, the best interests of the Company, and with respect to any criminal action or proceeding, had no reasonable cause to believe his or her conduct was unlawful. The maximum potential amount of future payments FactSet could be required to make under these indemnification obligations is unlimited; however, FactSet has a director and officer insurance policy that it believes mitigates FactSet's exposure and may enable FactSet to recover a portion of any future amounts paid. The Company believes the estimated fair value of these indemnification obligations is immaterial.

20. RISKS AND CONCENTRATIONS OF CREDIT RISK

Financial Risk Management

Foreign Currency Exchange Risk

The Company is exposed to changes in foreign currency exchange rates, which could affect its operating results, financial position and cash flows. The Company's primary foreign currency market exposures include the British Pound Sterling, Euro, Japanese Yen, Indian Rupee and Philippine Peso. To the extent that FactSet's international activities recorded in local currencies increase in the future, its exposure to fluctuations in currency exchange rates will correspondingly increase. FactSet manages its exposure to foreign currency exchange risk through its regular operating and financing activities and, when appropriate, through the use of derivative financial instruments. These derivative financial instruments are utilized to hedge currency exposures as well as to reduce earnings volatility resulting from shifts in market rates. FactSet only enters into foreign currency forward contracts to manage foreign currency exposures. The fair market values of all the Company's derivative contracts change with fluctuations in currency rates and are designed so that any changes in their values are offset by changes in the values of the underlying exposures. See Note 5, *Derivative Instruments*, for additional analysis of the Company's foreign currency exchange rate risk.

Interest Rate Risk

Cash and Cash Equivalents - The fair market value of FactSet's cash and investments at August 31, 2017 was \$227.2 million. The Company's cash and cash equivalents consist of demand deposits and money market funds with original maturities of three months or less and are reported at fair value. The Company's investments consist of certificates of deposits with original maturities greater than three months, but less than one year and, as such, are classified as Investments within the Consolidated Balance Sheet. It is anticipated that the fair market value of its cash and investments will continue to be immaterially affected by fluctuations in interest rates. Preservation of principal is the primary goal of FactSet's cash and investment policy. Pursuant to established investment guidelines, the Company tries to achieve high levels of credit quality, liquidity and diversification. Its investment guidelines do not permit FactSet to invest in puts, calls, strips, short sales, straddles, options, commodities, precious metals, futures or investments on margin. Because the Company has a restrictive investment policy, its financial exposure to fluctuations in interest rates is expected to remain low. The Company does not believe that the value or liquidity of its cash and investments have been significantly impacted by current market events.

Debt - As of August 31, 2017, the fair value of FactSet's long-term debt was \$575.0 million, which approximated its carrying amount and was determined based on quoted market prices for debt with a similar maturity. It is anticipated that the fair market value of FactSet's debt will continue to be immaterially affected by fluctuations in interest rates and it does not believe that the value of its debt has been significantly impacted by current market events. The debt bears interest on the outstanding principal amount at a rate equal to the daily LIBOR rate plus 1.00%. During the years ended August 31, 2017 and 2016, we recorded interest expense of \$8.4 million and \$3.1 million in interest on our outstanding debt amounts, respectively. Assuming all terms of the Company's outstanding long-term debt remained the same, a hypothetical 25 basis point change (up or down) in the one-month LIBOR rate would result in a \$1.4 million change in its annual interest expense.

Current market events have not required the Company to modify materially or change its financial risk management strategies with respect to its exposures to foreign currency exchange risk and interest rate risk.

Concentrations of Credit Risk

Cash equivalents

Cash and cash equivalents are primarily maintained with two financial institutions. Deposits held with banks may exceed the amount of insurance provided on such deposits. These deposits may be redeemed upon demand and are maintained with financial institutions with reputable credit and therefore bear minimal credit risk. The Company seeks to mitigate its credit risks by spreading such risks across multiple counterparties and monitoring the risk profiles of these counterparties.

Accounts Receivable

Accounts receivable are unsecured and are derived from revenues earned from clients located around the globe. FactSet performs ongoing credit evaluations of its clients and does not require collateral from its clients. The Company maintains reserves for potential write-offs and these losses have historically been within expectations. No single client represented 10% or more of FactSet's total revenues in any fiscal year presented. At August 31, 2017, the Company's largest individual client accounted for 2% of total subscriptions and annual subscriptions from the ten largest clients did not surpass 15% of total subscriptions, consistent with August 31, 2016. At August 31, 2017 and 2016, the receivable reserve was \$2.7 million and \$1.5 million, respectively.

Derivative Instruments

As a result of the use of derivative instruments, the Company is exposed to counterparty credit risk. FactSet has incorporated counterparty risk into the fair value of its derivative assets and its own credit risk into the value of the Company's derivative liabilities. FactSet calculates credit risk from observable data related to CDS as quoted by publicly available information. Counterparty risk is represented by CDS spreads related to the senior secured debt of the respective bank with whom FactSet has executed these derivative transactions. Because CDS spread information is not available for FactSet, the Company's credit risk is determined based on using a simple average of CDS spreads for peer companies as determined by FactSet. To mitigate counterparty credit risk, FactSet enters into contracts with large financial institutions and regularly review credit exposure balances as well as the creditworthiness of the counterparties.

Data Content Providers

Certain data sets that FactSet relies on have a limited number of suppliers, although the Company makes every effort to assure that, where reasonable, alternative sources are available. However, FactSet is not dependent on any one third party data supplier in order to meet the needs of its clients. FactSet combines the data from these commercial databases into its own dedicated single online service, which the client accesses to perform their analysis. No single vendor or data supplier represented more than 10% of FactSet's total data expenses in any fiscal year presented.

21. UNAUDITED QUARTERLY FINANCIAL DATA

The following table presents selected unaudited financial information for each of the quarterly periods in the years ended August 31, 2017 and 2016. The results for any quarter are not necessarily indicative of future quarterly results and, accordingly, period-to-period comparisons should not be relied upon as an indication of future performance.

Fiscal 2017 <i>(in thousands, except per share data)</i>	First Quarter	Second Quarter	Third Quarter	Fourth Quarter
Revenues	\$ 288,063	\$ 294,354	\$ 312,120	\$ 326,642
Cost of services	\$ 127,250	\$ 131,635	\$ 146,426	\$ 161,269
Selling, general and administrative	\$ 70,494	\$ 70,973	\$ 78,052	\$ 82,945
Operating income	\$ 90,319	\$ 91,746	\$ 87,642	\$ 82,428
Net income	\$ 66,583	\$ 66,710	\$ 65,414	\$ 59,552
Diluted earnings per common share ⁽¹⁾	\$ 1.66	\$ 1.68	\$ 1.66	\$ 1.52
Weighted average common shares (diluted)	40,100	39,700	39,457	39,281

⁽¹⁾ Diluted earnings per common share is calculated independently for each of the periods presented. Accordingly, the sum of the quarterly EPS amounts may not equal the total for the fiscal year.

Fiscal 2016 <i>(in thousands, except per share data)</i>	First Quarter	Second Quarter	Third Quarter	Fourth Quarter
Revenues	\$ 270,504	\$ 281,796	\$ 287,501	\$ 287,291
Cost of services	\$ 114,736	\$ 123,911	\$ 124,602	\$ 124,160
Selling, general and administrative	\$ 68,460	\$ 72,541	\$ 73,609	\$ 75,397
Operating income	\$ 87,308	\$ 85,344	\$ 89,290	\$ 87,734
Net income	\$ 59,965	\$ 67,763	\$ 66,781	\$ 144,306
Diluted earnings per common share ⁽¹⁾	\$ 1.43	\$ 1.63	\$ 1.62	\$ 3.55
Weighted average common shares (diluted)	42,063	41,536	41,189	40,673

⁽¹⁾ *Diluted earnings per common share is calculated independently for each of the periods presented. Accordingly, the sum of the quarterly EPS amounts may not equal the total for the fiscal year.*

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

ITEM 9A. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

Under the supervision and with the participation of the Company's management, including the principal executive officer and principal financial officer, the Company has evaluated the effectiveness of its disclosure controls and procedures pursuant to Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as of the end of the annual period covered by this report. Based on that evaluation, the principal executive officer and principal financial officer have concluded that the Company's disclosure controls and procedures as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended, (the "Exchange Act") are effective to ensure that information required to be disclosed by the Company in reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in Securities and Exchange Commission rules and forms and is accumulated and communicated to the Company's management, including its principal executive officer and principal financial officer, as appropriate to allow timely decisions regarding required disclosure.

Changes in Internal Control over Financial Reporting

There have been no changes in the Company's internal control over financial reporting (as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) during the fourth quarter of fiscal 2017 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

In fiscal 2017, we acquired BI-SAM Technologies ("BISAM"), FactSet Digital Solutions and Vermilion Holdings Limited ("Vermilion"). Refer to Note 8, Business Combinations, in the Notes to the Consolidated Financial Statements for further discussion of the acquisitions. We are currently in the process of integrating the internal controls and procedures of Vermilion and BISAM into our internal controls over financial reporting. As provided under the Sarbanes-Oxley Act of 2002 and the applicable rules and regulations of the Securities and Exchange Commission, we will include the internal controls and procedures of Vermilion and BISAM in our annual assessment of the effectiveness of our internal control over financial reporting for our 2018 fiscal year.

Management assessed the effectiveness of the Company's internal control over financial reporting as of August 31, 2017, except for the internal controls of BISAM, FactSet Digital Solutions and Vermilion which, in aggregate, constituted 4.8% of net assets (excluding goodwill and intangible assets) and 4.5% of revenues as included in FactSet's Consolidated Financial Statements for the year ended August 31, 2017. In making this assessment, management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in Internal Control—Integrated Framework. Based on this assessment and those criteria, management believes that the Company maintained effective internal control over financial reporting as of August 31, 2017.

Management's Report on Internal Control over Financial Reporting

See Management's Report on Internal Control over Financial Reporting under Item 8 on page 44.

Report of Independent Registered Public Accounting Firm

See Report of Independent Registered Public Accounting Firm under Item 8 on page 46.

ITEM 9B. OTHER INFORMATION

None.

PART III

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

The information required by this item relating to FactSet's directors and nominees, regarding compliance with Section 16(a) of the Securities Act of 1934, and regarding its Audit Committee is included under the captions "Corporate Governance" and "Security Ownership of Certain Beneficial Owners and Management" and contained in the definitive Proxy Statement dated October 30, 2017, all of which information is incorporated herein by reference.

Pursuant to General Instruction G(3) of Form 10-K, the information required by this item relating to FactSet's executive officers is included under the caption "Executive Officers" of the Company's definitive Proxy Statement dated October 30, 2017, all of which information is incorporated herein by reference.

The Company has adopted a code of ethics that applies to its principal executive officer and all members of its finance department, including the principal financial officer and principal accounting officer. This code of ethics, which consists of the "Code of Ethical Conduct for Financial Managers," is posted on FactSet's website. The Corporate Governance Guidelines and the charters of committees of its Board of Directors, including the Audit Committee, Compensation and Talent Committee and Nominating and Corporate Governance Committee are also available on FactSet's website. The Internet address for the Company's Website is www.factset.com, and the code of ethics may be found in the "Investor Relations" section under "Corporate Governance." All employees, officers and directors are also subject to FactSet's "Code of Business Conduct and Ethics," also posted on the "Corporate Governance" page of the website and the same information is available in print free of charge to any stockholder who submits a written request to the Company's Investor Relations department at its corporate headquarters at 601 Merritt 7, Norwalk, Connecticut 06851.

The Company intends to satisfy any disclosure requirement under Item 5.05 of Form 8-K regarding an amendment to, or waiver from, a provision of this code of ethics by posting such information on its website, at the address and general location specified above.

ITEM 11. EXECUTIVE COMPENSATION

The information required by this item relating to FactSet's executive compensation is included under the caption "Executive Compensation" contained in the definitive Proxy Statement dated October 30, 2017, all of which information is incorporated herein by reference.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

The information required by this item relating to security ownership of certain beneficial owners and management is included under the caption "Security Ownership of Certain Beneficial Owners and Management" and the information required by this item relating to securities authorized for issuance under equity compensation plans is included under the caption "Equity Compensation Plan Information," in the definitive Proxy Statement dated October 30, 2017, all of which information is incorporated herein by reference.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE

The information required by this item relating to review, approval or ratification of transactions with related persons is included under the caption "Certain Relationships and Related Transactions" and the information required by this item relating to director independence is included under the caption "Corporate Governance" contained in the definitive Proxy Statement dated October 30, 2017, all of which information is incorporated herein by reference.

ITEM 14. PRINCIPAL ACCOUNTING FEES AND SERVICES

The information required by this item is included under the caption "Proposal 2: Ratification of Independent Registered Public Accounting Firm" in the definitive Proxy Statement dated October 30, 2017, all of which information is incorporated herein by reference.

PART IV

ITEM 15. EXHIBITS, FINANCIAL STATEMENT SCHEDULES

1. Consolidated Financial Statements

The Index to Consolidated Financial Statements under Item 8 on page 43 is incorporated herein by reference as the list of financial statements required as part of this report.

2. Financial Statement Schedule

Schedule II – Valuation and Qualifying Accounts

Years ended August 31, 2017, 2016 and 2015 (in thousands):

Receivable reserve and billing adjustments ⁽¹⁾	Balance at Beginning of Year	Charged to Expense/ Against Revenue	Write-offs, Net of Recoveries	Balance at End of Year
2017	\$ 1,521	\$ 3,381	\$ 2,164	\$ 2,738
2016	\$ 1,580	\$ 1,917	\$ 1,976	\$ 1,521
2015	\$ 1,662	\$ 2,268	\$ 2,350	\$ 1,580

⁽¹⁾ Additions to the receivable reserve for doubtful accounts are charged to bad debt expense. Additions to the receivable reserve for billing adjustments are charged against revenues.

Additional financial statement schedules have been omitted since they are either not required, not applicable, or the information is otherwise included.
